Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas - Also Maryland, New Jersey and Delaware

VOL. 23 No. 12 | Lancaster Farming, Saturday, January 21, 1978 | $6.00 Per Year

A foot of snow fell on Pennsylvania Thursday, leaving the countryside pretty as a bride. This farm scene is near Lititz.

Dairy officials worried by surplus

By DIETER KRIEG

QUARRYVILLE – Officials at Inter-State Milk Producers Cooperative see some clouds on the horizon due to the increasing buildup of surplus stocks. The situation has forced the Philadelphia-based cooperative to dig into its coffers to meet excess marketing costs.

At a meeting of dairymen here on Thursday, Inter State's director for member and public relations, Boyd Gartley, told the dairymen that IMPCO members will be faced with a 60 cents per hundredweight deduction on surplus milk for December. Termed a temporary arrangement, the measure is needed in order to continue to meet the extra marketing costs incurred when production in Order 4 is running six per cent of where it was last year.

Stoltzfus herd tops Chester DHIA

By DIETER KRIEG

GUTHRIESVILLE -- Despite an ongoing snow storm that dumped as much as eight inches of the fluffy white stuff on southeastern Pennsylvania, Chester County dairymen gathered here on Thursday night for their annual DHIA dinner. More than 200 people were in attendance for the event, which has been held on a snowy night for the past three years now.

The leading herd in the Chester County DHIA

Cull cow prices rising

By JOANNE SPAHR

LITITZ – Slaughter cows were selling for as high as $33 at Lancaster County auctions this week, a price seven to 10 cents higher than the market six weeks ago.

At Thursday's New Holland Auction a few No. 1 to No. 3 utility and commerical cows sold for 34, in comparison to 24.00 to 26.50 six weeks ago, with a few selling as high at that time as 26.60 to 27.75.

This week No. 1 to No. 2 cutters went for 31.50-33.00, in compairson to 22.10 to 24.50 six weeks ago at the Lancaster Stockyards.

Vintage showed the same upward fluctuation with No. 1 to No. 3 utility and commerical animals selling for 29.75-33.00. Where as six weeks ago they ranged from 25.00 to 28.35 with a few at 28.50 to 29.50. A few canner and low cutters sold for 20.00 to 23.50 on November 29. Where as on Tuesday of this week at Vintage that same type animal went for as high as 33.75.

This seven to 10 cent spread in price over the past week has dairy farmers smiling and small butcher shops worrying.

"If the prices are this high, now, when they are culling their herds, I'm concerned where they are going to get cows in the Spring," states Krall Hostetter, owner of

(Turn to Page 32)

Notice

The heavy accumulation of snow which descended on Pennsylvania since Thursday afternoon brought with it a list of cancellations and postponements.

The snow storm has left us without several market reports due to businesses not being able to open or being short staffed.

We may incur a later than normal press time due to the weather and some deliveries may therefore also be late.

PACMA Facts

PACMA-FACTS

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent, The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Farm point prices prevailing for fowl to be marketed by members during the week of January 16 were 9 at farm weight; 11 at plant weight.

Delmarva Poultry

January 18, 1978

Ready to cook movement continues good. Slaughter schedules fairly heavy. Today's LTL asking prices unchanged at 42 on plant grade and 43 cents on Grade A. Advance interest slow in developing as traders await further market development. Live supplies adequate at mostly desirable weights. Undertone fully steady to firm.

Current broiler-fryer negotiated prices for immediate includes mostly multiple-drop shipments to New York City from Delmarva.

Range: U.S. Grade A 41-44; Plant Grade 41-42½; Premium (X) U.S. Grade A 49; Premium (X) Plant Grade 47.

Wtd. Avg: U.S. Grade A 42.55; Plant Grade 41.69; Premium (X) U.S. Grade A 49.00; Premium (X) Plant Grade 47.00.

(X) includes special services, selected competitive brands, etc.

Philadelphia Eggs

January 18, 1978

Prices unchanged. Cartoning demand good on mediums fair on balance. Offerings adequate on mediums, fully adequate on larger sizes. Undertone fully steady to firm.

SALE EVERY MONDAY 2 P.M. Melvin M. Lehman (Owner)

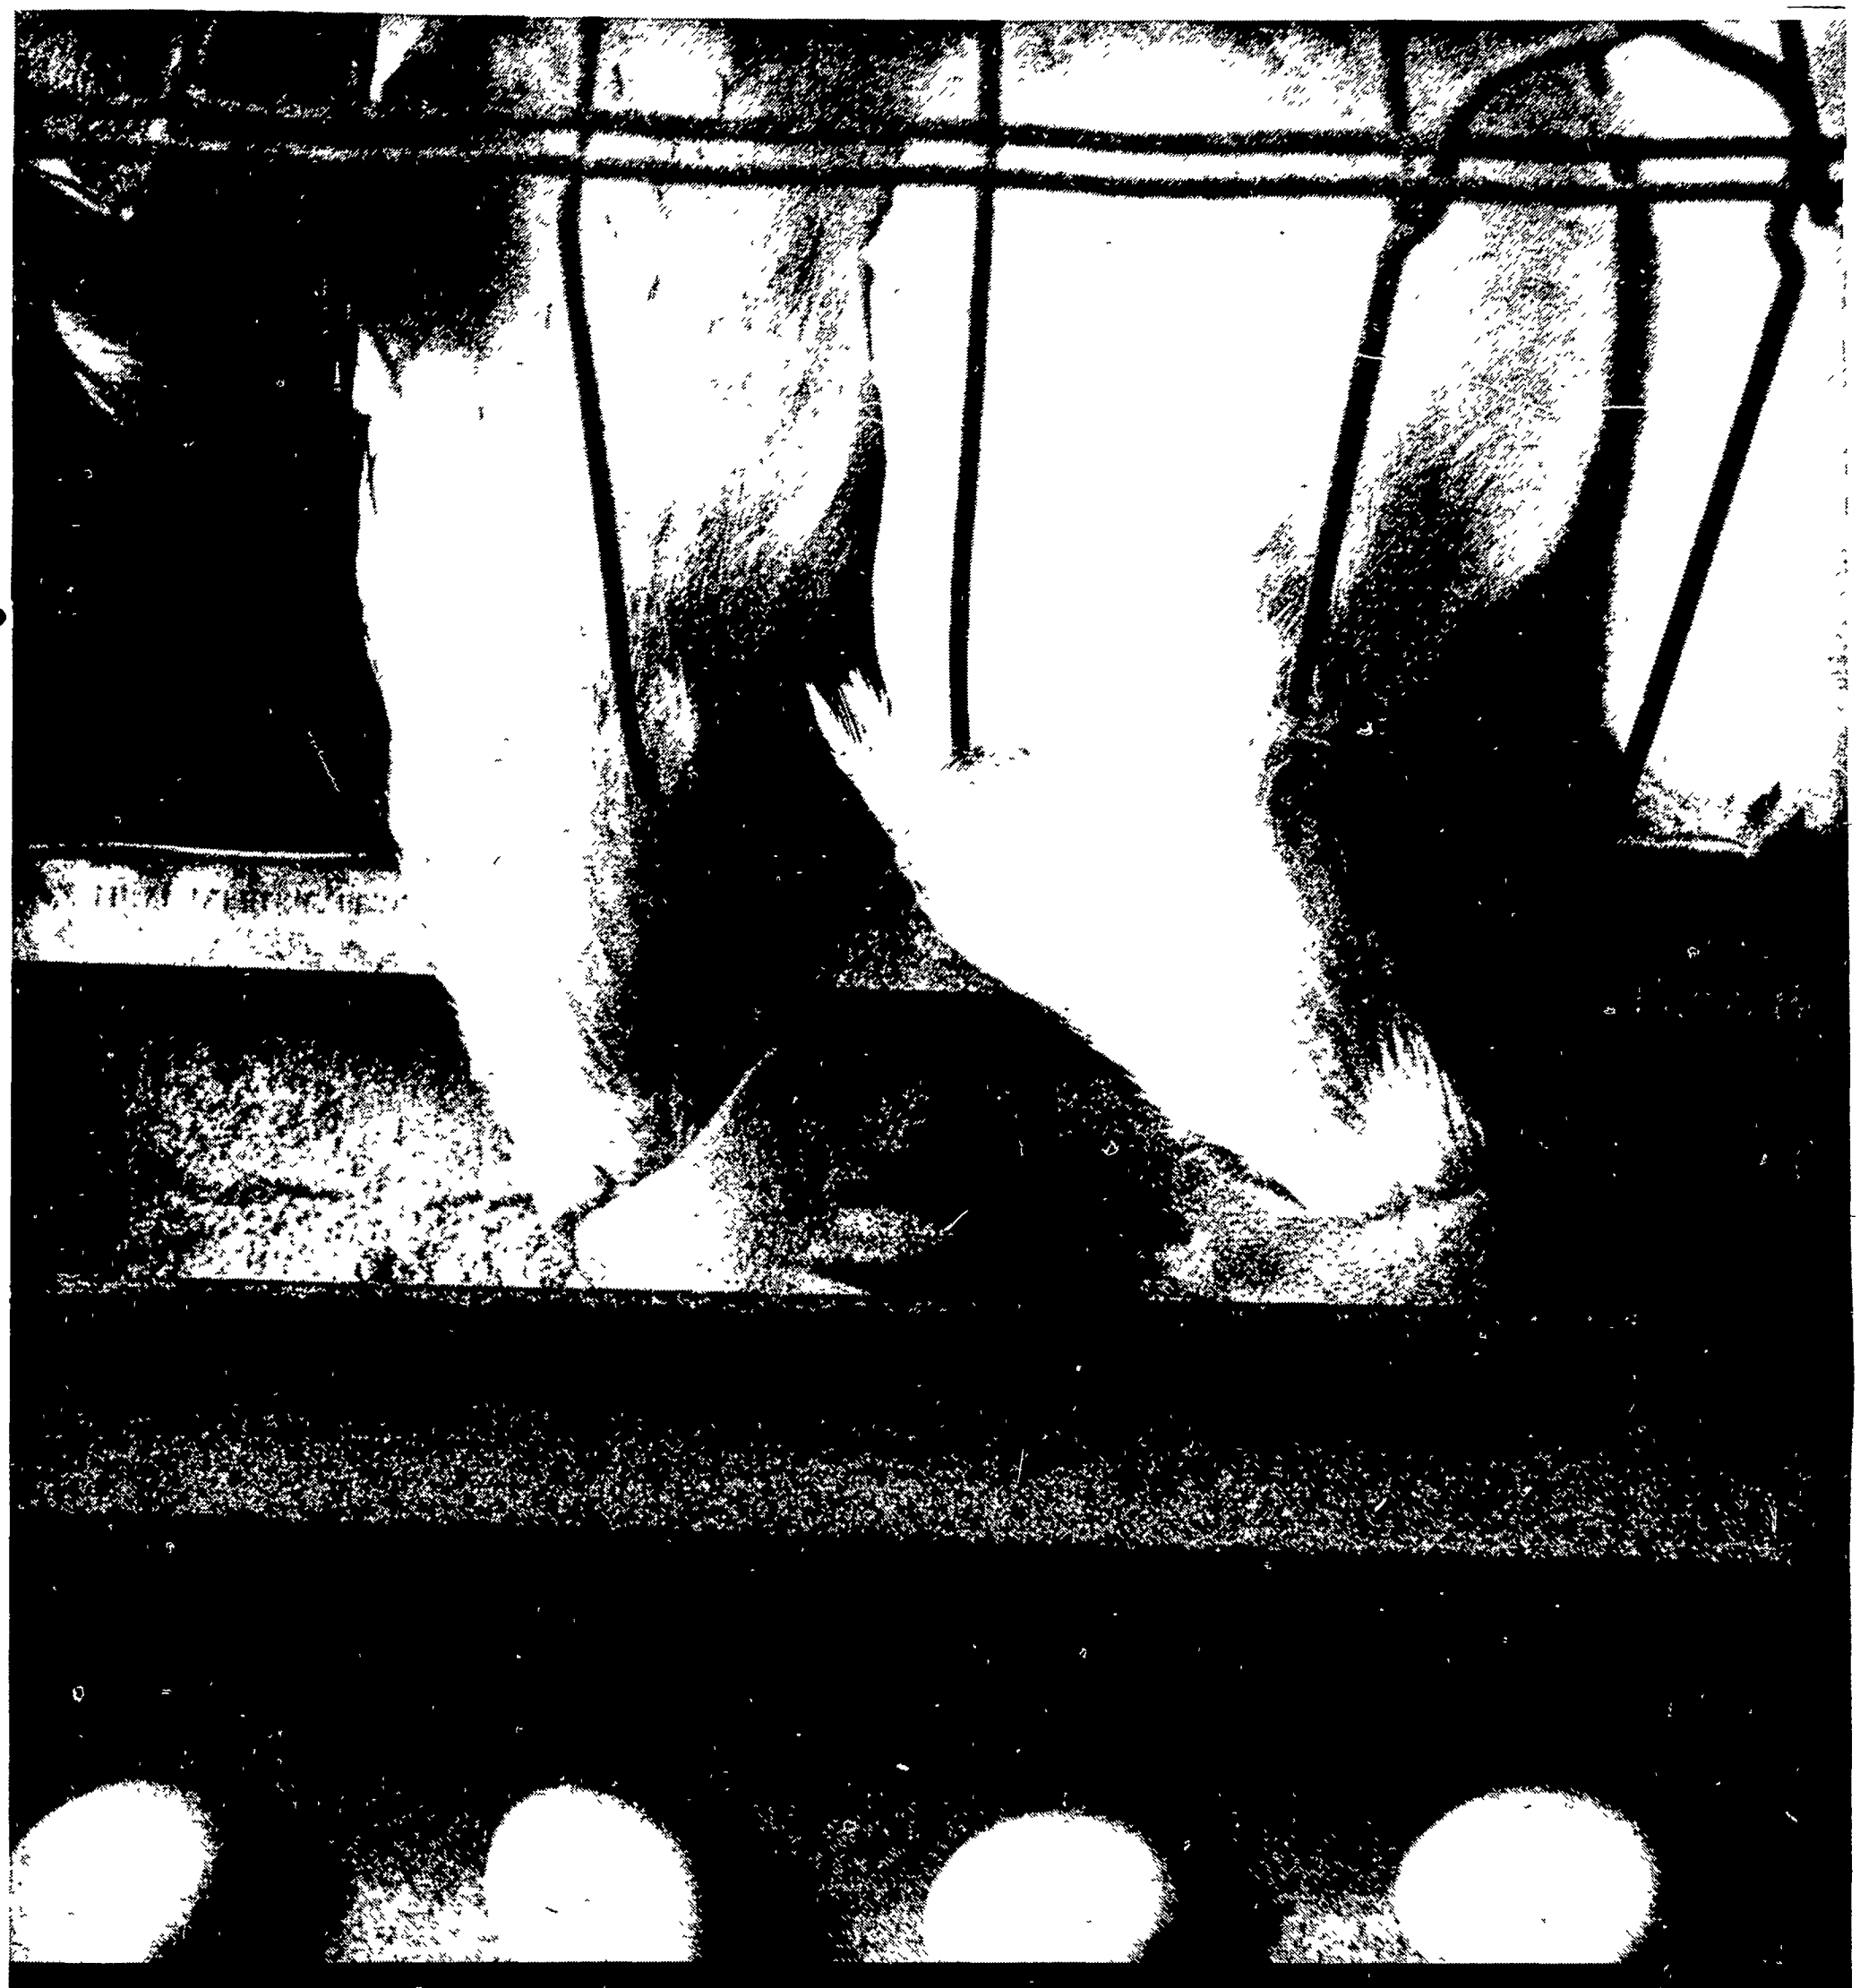
Moyer's CHICKS, INC.
Quakertown, PA. 18951
(215) 536-3155

Before you place your next order for ready-to-lay pullets, sit down and list some reasons for your choice of layer. Do they include - locally grown pullets, fed to optimum body weight, well developed, early maturing, high production peaks, sustained shell quality.

Whatever your choices, you'll find:

Moyer's DEKALB—A Bird For All Reasons

XL-Link 231 DK-137 Sal-Link



From chick to cage, we formulate feeds and feeding programs with your profit in mind.

Do you have an open mind?

Are you ready to devote an hour or two of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop *custom* feeding programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. The health and overall condition of your birds. Whether you grow chicks or buy started pullets. The type of equipment you use The production potential of your flock. Your management practices. And other factors that have an effect on your profit potential.

With the aid of computers, we then design a feeding program specifically tailored to *your* birds needs—a program that can improve your profits by reducing expenses, increasing production, or both.

For example, when we recommended producers switch from a competitive 18% protein feed to an optimum-nutrient density Pennfield feed, there was no loss in production—and this one recommendation has saved as much as $12,000 a year depending on flock size.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604. Local calls· Lancaster 299-2561, Red Lion 244-4511 In 717 and 215 areas dial toll free 800-732-0467

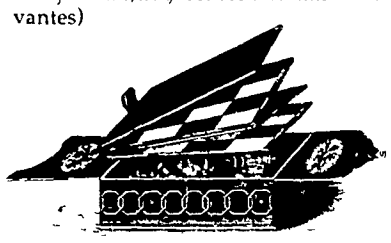
THE OLD FARMER'S ALMANAC

JAN. 23-29, 1978

Wet noses we supposes

Don't bathe your dog now Winston Churchill died Jan 24 1965 Full moon Jan 24 Average length of days for the week, 9 hours, 47 minutes Buffalo was snowed in this week last year Gold was discovered in Sutter's Mill, Calif *Jan 24, 1848* *Valor lies just halfway between rashness and cowardice* (Miguel de Cervantes)



Ask the Old Farmer Isn't there a rhyme about the color of the moon and how this color can foretell the weather? D A, Lynn, Mass

There are several, but the one most familiar to us is "Pale moon doth rain, red moon doth blow white moon doth neither rain nor snow

Home Hints To thaw frozen water pipes use the blower end of a tank vacuum cleaner

OLD FARMER'S WEATHER FORECASTS

New England· Week begins partly sunny with scattered snow through Tuesday, expect a blizzard with 12-15 inches south and on coast for remainder of week

Greater New York-New Jersey: Sunny to start, then rain and snow with blizzard for end of week

Middle Atlantic Coastal· Rain and heavy snow, blizzard for most of the week

Piedmont & Southeast Coastal: Rain and very warm all week

Florida: Hot with light showers, rain, cold with snow in north for week's end

Upstate N.Y.-Toronto & Montreal: Intermittent snow through Tuesday, then rainy and mild at midweek, cold with snow, heavy in southeast for weekend

Greater Ohio Valley: Snow changing to rain through Friday, cloudy and very cold for weekend

Deep South. Rain to start then turning very cold with snowstorm for rest of week

Chicago & Southern Great Plains: Snow on and off through Thursday, cold and partly sunny, flurries east for rest of week

Northern Great Plains-Great Lakes: Very cold with some snow throughout most of week, clearing Sunday

Central Great Plains: Snowstorm expected, end of week sunny but very cold

Texas-Oklahoma. Rain changing to snow to start, then end of week is seasonal and very cold

Rocky Mountain· Rain and snow to start, then partly sunny, very cold, snow north for remainder of week

Southwest Desert: Week begins partly sunny, few showers, cool then cloudy, cold, frost at midweek, week's end clear and hot

Pacific Northwest: Snowy and very cold to midweek, remainder of week brings heavy rain north, warming and floods

California· Partial clearing, cool with frost inland through Thursday, sunny and much warmer for week's end

Some of the old tractors are today's classics

By JERRY WEBB
University of Delaware

NEWARK, Del. – Kidding a farmer friend the other day about an old Farmall tractor parked under a tree in his backyard, I was reminded of the important role that breed of tractor played in this nation's agricultural progress.

I had jokingly accused this fellow, who is a member of the Board of Trustees of the Delaware Agricultural Museum Association, of starting his own backyard collection. He quickly told me how useful a pair of those old Farmalls are around his place and what it would cost to replace them with today's comparable machines.

Antiques? Indeed not. Thousands of them are still hardworking machines with most replacement parts still available from the dealers. Hardly a day goes by when I don't see a Farmall H or M doing some useful farm work.

Farmall tractors, manufactured by the International Harvester Company in a half-dozen sizes, helped revolutionize agriculture in the 1930's and 40's. The first ones were steel-wheeled monsters with size classifications like F20 and F30. They were as good as any back in the early days of farm tractors – big and slow, hard to turn, hand-crank starting and no mechanical or hydraulic lifts for mounted equipment. It took a good man to run one of those early models.

Then, in the late 30's, International Harvester redesigned its entire line of farm tractors. The result was an agricultural classic – a machine that met the challenge of that day and beyond, one that has truly met the test of time.

Though lacking the horsepower of today's big tractors, those old Farmalls have everything needed for the lighter jobs around the farm from pulling grain wagons back and forth to the field to mowing and raking.

Considering that International Harvester stopped making its Farmalls in the early 1950's there are sure a lot of them still in use. In fact, there's hardly a farm that doesn't have one resting in a shed or hiding behind a barn waiting for the next challenge for a small all-purpose tractor.

But it wasn't always that way. Back in the 40's that Farmall M was a star. It was the heavy duty tractor of its time, pulling a big 3-bottom plow or a field chopper with relative ease. It could do the biggest jobs that farmers could think of and hardly ever need repairs.

For about 15 years those old Farmalls dominated agriculture – but finally the need for more horsepower caught up with them. International Harvester made an abortive effort to stay in the game with its Super H's and Super M's. These were the same tractors with souped-up engines. A farmer could convert his old tractor with a dealer overhaul and if he wanted to spring for a paint job at the same time he got the new Super decals.

But Super M's weren't quite up to the jobs ahead. They lacked the horsepower, weight and even more important, a whole new concept in hooking up field equipment had come on the scene. Named the Fergusen system for its English designer, this was the original three-point hitch that has become standard for most of today's equipment makers. This hydraulically controlled system revolutionized equipment design and operator convenience and comfort.

Since the basic system was covered by patents, International Harvester had to develop an alternative, the two-point hitch–an ill-fated design that was standard on the IH tractors that followed the Farmalls. Tractor designs came and went and the two-point hitch wound up in the junkyard as manufacturers switched to three-point hitches. Horsepower and size zoomed upward each year as competing manufacturers vied for farmer acceptability with bigger machines and staggering price tags.

Today, the largest Internationl Harvester tractor weighs 10 tons or more, has four-wheel drive, 250 horsepower, and sells for $40,000. Meanwhile its older brothers -- that long dependable line of Farmalls – still labor quietly in so many ways. For as farmers added newer models they kept the old ones. Farmers are funny that way. They don't like to trade in a good tractor – there's always a place to use a second or third machine, pulling wagons or hooked to a mower or scraper. So a quarter of a century and maybe tractors later those Farmalls are still out there working.

The first new tractor I ever saw was a Farmall H – the first post-war model delivered in our neighborhood. What a beauty, all shiny and red, it was about the most beautiful thing a farm boy was apt to see. Those I had seen prior to that were the pre-war models, old and faded, mounted on steel wheels, many of them with hand cranks sticking through their radiators. By

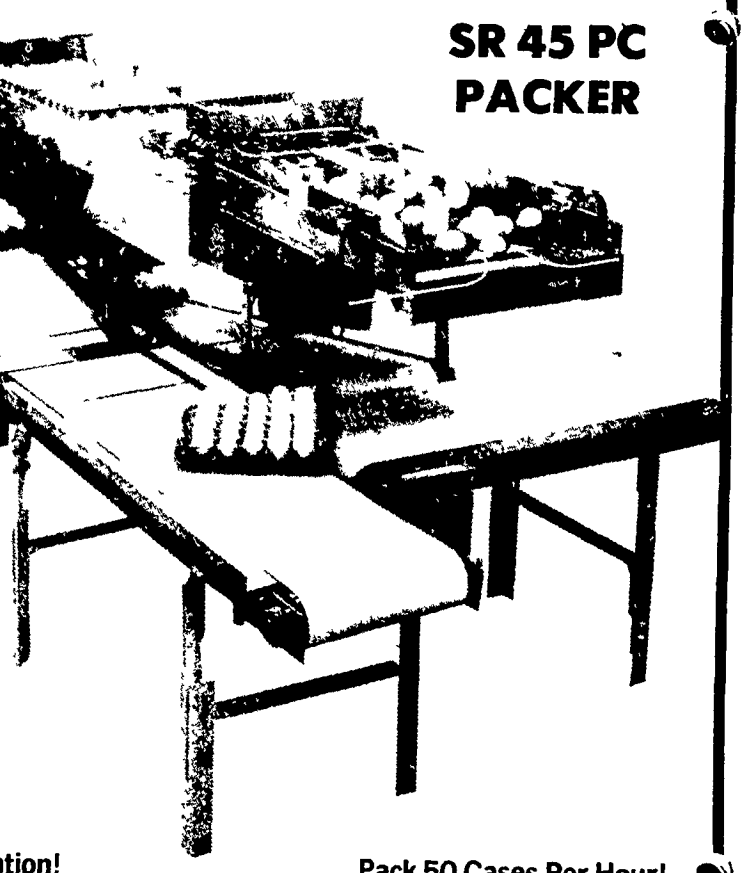
EGOMATIC

SR 45 PC PACKER



For Use With Automatic Belt Collecting Systems!

One Person Operation!

Pack 50 Cases Per Hour!

The spring cushion conveyors, for more gentle and positive egg handling, take the eggs thru the disc type orientors, which softly place them, points facing the same direction, into our blue cups. Here the operator merely places the package over the eggs.

After going around the stainless steel drum and onto the take-away belts, your uncracked and unchecked eggs are ready for your cooler.

We also feature a sponge type egg oiler which can be added to your packer now or in the future

The totally mechanical, no electronic Egomatic SR 45 PC Packer, with it's limited maintenance, will give you years of trouble free packing

Stoltzfus herd

(Continued from Page 1)

program is that of Jacob Stoltzfus, Oxford R1. His is one of the few in the state to surpass the 800 pounds of butterfat mark. Milking an average of 58.1 cows throughout the year, Stoltzfus averaged 19,856 pounds of milk and 838 pounds of butterfat per head.

Runner-up in the butterfat list is Robert Pepple, another Oxford area dairyman whose 76 Holsteins averaged 19,010 pounds of milk and 770 of butterfat. Jefferson Yoder of Elverson, who took the crown for the previous two years, finished third with his herd average of 18,473 pounds of milk and 751 of butterfat on 59 cows.

The list of dairymen who eclipsed the 700 pounds of butterfat mark continues with:

Ardrossan Farms, Villanova, milking 122 Ayrshires, averaged 16,406 pounds of milk and 715 of fat. David E. Weaver, Glen Moore, had his 52 head average 17,992 pounds of milk and 715 of fat. George Lamborn, Nottingham, comes next on the list with 39 cows averaging 18,190 pounds of milk and 707 of butterfat. The final herd to break 700 pounds of butterfat was that of John Stoltzfus, Atglen. His 59 cows averaged 17,718 pounds of milk and 701 of fat.

Eight more herds averaged more than 650 pounds of butterfat with their herds, and 29 more went above 600 pounds.

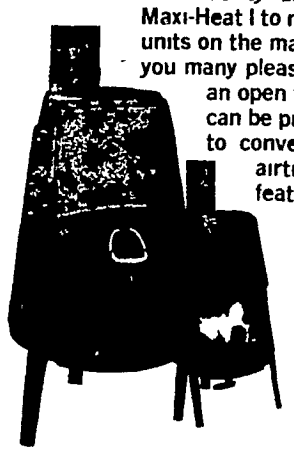
Chester County's DHIA average for 1977 stands at 14,238 pounds of milk with a 3.9 per cent test and 551 pounds of butterfat. A year earlier it stood at 13,354 pounds of milk, 3.9 per cent, and 516 pounds of butterfat. That state's average this year is 14,142 pounds of milk, a 3.9 per cent test, and 545 pounds of butterfat.

The average feed cost per hundred pounds of milk is calculated at $4.05, according to DHIA figures for Chester County.

An average of over 700 pounds of butterfat per cow was attained by these Chester County dairymen, left to right: George Lamborn, Jefferson Yoder, John Stoltzfus, Al Stoltzfus, David Weaver, Robert Pepple, and Richard Billhine for Ardrossan Farms. Al Stoltzfus, holding the largest plaque, accepted it for Jacob K. Stoltzfus, whose herd averaged 838 pounds of butterfat.

MAXI-HEAT I

Combination Fireplace and stove



Versatility and function are combined in Maxi-Heat I to make it one of the most popular units on the market. As a fireplace it will give you many pleasant hours of relaxation before an open fire. But in an instant the door can be pulled up from under the firebox to convert it into an energy-efficient airtight stove. Another popular feature of the Maxi-Heat I is its ability to be vented either out the back or through the top of the unit. Maxi-Heat I develops up to 50,000 BTU's, and can economically heat up to 1,200 square feet. Built of rugged cast iron identically to the Jotul #4 but for less money!

COMMENTS FROM READERS

Reader says do less and get more

Editor, Lancaster Farming:

There has been a lot of controversy over the farm strike situation and food prices. I feel that if farmers had more education beyond the second grade maybe they would be able to understand the simple theory of supply and demand. For some reason or other farmers go out of their way to over-produce whether it be grain, milk, or beef, etc. What are they trying to prove? Who are they trying to impress? Have any of these farmers ever benefited from over-production other than getting a pat on the head for doing a good job? Farmers have more power than any organization in the country; they control the stomachs of every person in the U S. I think it's about time that the farmers made the people put food at the head of the necessity list. As long as the public is going away from the dinner table full, they couldn't care less about the predicament the farmers are in.

I am not ahamed to say that I would like to make some money farming, certainly there must be an easier way to make a buck. However, the way things are going I'll have to rob a bank. The American people have been eating cheap long enough. I am not slaving 16 hrs. a day, seven days a week just to get the satisfaction of feeding my urban counterpart at my cost.

Follow the footsteps of the machinery companies and oil companies. Up until 1973 machinery companies had a very small profit margin so they created an artificial shortage for two years, jumped prices to where they felt comfortable and then controlled production very close to suit their needs. Same goes for the oil companies. Remember the gas lines? They also created an artifical shortage when the price of gas was low. Now that the price is up, do you see any gas lines or shortages? I'll bet those fat cats are happy now.

No way on earth are the farmers ever going to be able to control the price of their product directly, but they can indirectly. They can do this by stopping production and letting the law of supply and demand take over providing the government doesn't intervene and sabotage this movement with imports. Look at it this way, "Do Less-Get More." Less work hours, less acres to work, less animals to milk, less equipment, and less production. In return a profit, conserved energy, more leisure time and an all around better way of Life. I do not advocate starvation in this country, but people are going to have to pay more to eat if I am going to produce food for them. Furthermore, the public knows only too well the importance of agriculture; however, that doesn't help the farmer. The public can be exposed to all the ads on prime time TV but their opinion of farmers will never change. They will always consider him as a third rate persons that threatens their so-called high standard of living. (If they didn't have to pay for food they could have another flashy sports car, etc.) Being of the agricultural minority myself I think it's time for equal rights!

(Turn to Page 15)

EDITORIAL COMMENTS

Congratulations to all

Congratulations are in order to scores of people who contributed to making the Pennsylvania Farm Show a pleasant experience .We'll begin with the many exhibitors - champions, runner-ups and all other participants, including the agribusiness folks - for without them there would be no Farm Snow They showed us their best and we enjoyed it Special congratulations are in order for those who had the top animals and products

A note of appreciation is due to the Farm Show management and the scores of vo-ag teachers, Extension agents, and Farm Show employees who kept events flowing smoothly, and often assisted in making results available to news reporters That's a big plus for good coverage

Farm Calendar

Today, Jan. 21

York County 4-H officer training at the 4-H Center in Bair, 9 a.m. through 8:30 p.m. Workshops and square dancing.

New Jersey's 107th Farmers' Week begins today, runs through the 28th.

Monday, Jan. 23

Public hearing for southeastern Pennsylvania milk marketing area, in the Radnor Room of the Sheraton Valley Forge Motel, Route 363, King of Prussia. 1 p.m.

Fulton Grange meeting, 8 p.m., program: slide program on covered bridges from near and far, presented by Roger Small, Holtwood.

York County 4-H skating party, Delco skating rink, 7 to 10 p.m.

Dairy Interests Day in New Jersey, dairy farmer panel and program held as part of Farmers Week, Holiday Inn, Bordentown, 10:30 a.m.

Sheep husbandry meeting, Cumberland County Extension Building, Claremont Road, Carlisle, 7:30 p.m.

Tuesday, Jan. 24

Soil Conservation Service meeting concerning Chickies Creek, at the Manheim Community Building, 7:30 p.m.

Cattle Feeders' Day in Lancaster County. Topics of interest will be presented at the Farm and Home Center.

The 1978 Lime Fertilizer and Pesticide Conference begins at the J.O. Keller Conference Center, University Park. Programs continue through the 26th.

Garden Spot Young Farmers meeting, feeding animal wastes to livestock, 7:30 p.m. at the high school.

NOW IS THE TIME

By Max Smith, Lancaster County Agricultural Agent

Phone 394-6851

TO PREPARE FOR NEW—BORN ANIMALS

In dairy and swine breeding herds, calving and farrowing are quite common at any time of the year. With sheep flocks most of the lambing is done during early Spring. In all cases it is very important that the owner provide a clean, draft-free place for this new-born animal. Too many are into filthy and cold places that get them off to a poor start. The first hour of a new-born animal's life is very important; they should be kept warm, gotten dry as soon as possible, and then nurse with colostrum milk from the mother. For sheep producers we suggest supplemental heat at this time of the year to get the young lamb off to a good start. Most farrowing houses are built with extra heat for the farrowing pens. Dairyment should select a good clean box-stall for the cow that is calving. Remember, the care that is given a new-born animal the first few hours may be the difference between health and sickness.

TO PROVIDE SALT AND MINERALS

All types of animals crave salt and some minerals in order to be satisfied. The providing of free access to salt is a good practice in order to encourage consumption of large amounts of water. Heavy water consumption usually results in more efficient gains and greater milk production. In addition to salt mixed into the grain ration, we suggest that loose salt be provided free choice to all types of farm animals. The use of minerals is a bit more involved because of the many different elements. However, the providing of free-choice minerals is suggested in addition to those mixed in the feed. The forced feeding of needed minerals in the grain ration is a good practice and should be based upon a forage analysis test; this is especially true in breeding herds of both dairy and beef cattle. Beef cattle feeders can expect good results by providing free choice mineral mix in addition to salt.

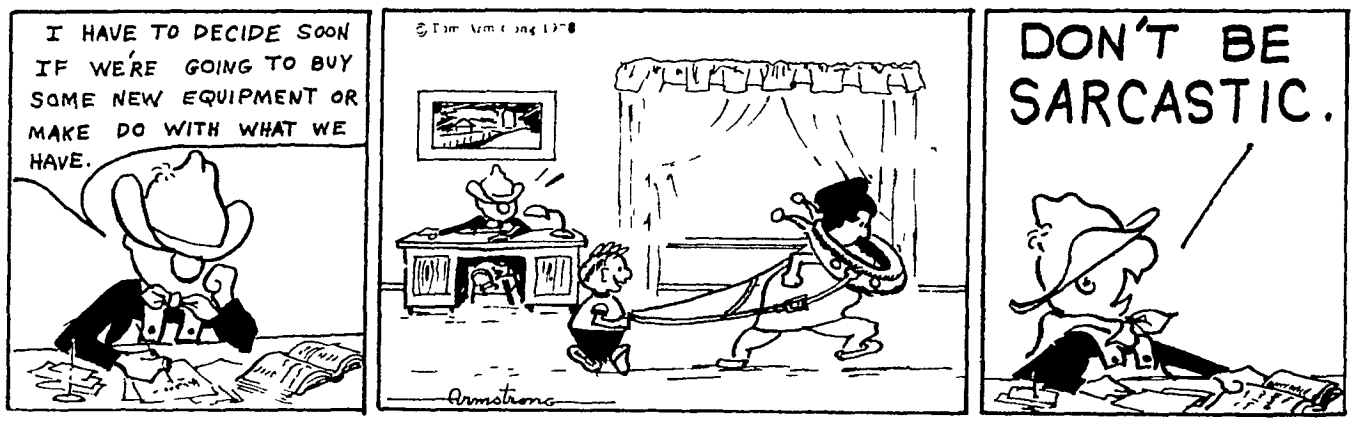
TO ESTABLISH SOIL SAVING PRACTICES

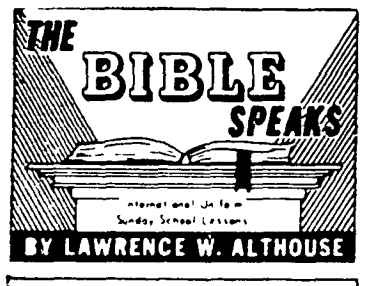
The Spring of the year is an excellent time to start some soil saving practices on the land. Contour strips, terraces, and diversion ditches can all be established before the 1978 crops are planted. These various methods of controlling water will not only prevent soil losses but will help hold more water higher on the slopes and fields. Good topsoil is a precious natural resource, and every land owner should make an effort to keep it in place. Farmers that are growing continuous corn should be very careful to keep their soil from eroding. In these cases terraces can be established to help slow down the loss of both water and soil. The adding of extra organic matter in the form of crop residues, green cover crops, and livestock manure will help keep the soil loose and of higher water holding capacity.

TO PROTECT BUILDINGS

During the Winter and Spring months, we get larger amounts of water from snow and rain. Is this water being properly carried away from your buildings? Some roof gutters and down-spouts may need adjustment or repairing in order to protect the building. Drainage water from around the buildings should be dtiched away from the building. I've noticed some buildings that were taking too much of this extra ground water at this time of the year. Extra moisture in or on a building means rotted wood and extra replacement costs. Good building protection is very much in order.

RURAL ROUTE By Tom Armstrong





A PLACE TO STAND

Lesson for January 22, 1978

Background Scripture:
Daniel 6
Devotional Reading:
Psalms 57

The story of Daniel in the lions' den is a study in contrasts.

On the one hand, we have the presidents and satraps of the Persian Kingdom in the reign of King Darius They sound like a familiar group of men for they were consumed by jealousy for Daniel, who occupied a place of special favor with the king Learning that the king planned to set him over the whole kingdom, "the presidents and satraps sought to find a ground of complaint against Daniel with regard to the kingdom" (Daniel 6 4)

The vulnerable point

The problem, they found, was that Daniel was held in such high esteem in the kingdom that nothing damaging could be found against him. Finally, however, they realized that there was one point at which this man was vulnerable: his faith in the God of Israel. If they could manuever him into having to make a choice between his faith and the king, they would have him, for they knew that his loyalty to the king was exceeded only by his loyalty to his God.

How many people do you know who have that kind of reputation today? Are you vulnerable because your highest loyalty is to your faith in God?

One thing we need to note that Daniel did not seek to become a martyr for his faith. When he learned about the ordinance the satraps and presidents had gotten the king to agree to, he did not blatantly and publicly defy the ordinance. He did not seek to become a controversial figure. He wanted only to continue to serve his God. So, we are told: "When Daniel knew that the document had been signed, he went to his house where he had windows in his upper chamber open toward Jerusalem; and he got down upon his knees three times a day and prayed and gave thanks before his God, as he had done previously" (6 10)

The anxious king

We have seen the envious, plotting enemies (and recognized their counterparts today). We have seen the faithful Daniel who doesn't look for touble, but won't run away if it means denying his faith. This brings us to the king, a man of good intentions and decent sympathies, but vascillating and even weak Instead of saving Daniel from his enemies, he wishes Daniel luck "May your God, whom you serve continually, deliver you!" The king is like many who want God to do what they themselves have the power to do. They want to do the right thing, but they do not have the courage.

So, Daniel is cast into the lion's den. He had chosen to make his stand there. There were many things he might do to avoid trouble, but he would not compromise his faith. So it is with us, too. Like Daniel we do not need to look for trouble as Christians There are issues which are hardly worth our efforts But be assured, there is for each of us a place where God calls us to stand.

Brock grain feed bins are famous for their strength, durability and good looks. But with Brock, you'll get far more than great products. You'll get a great dealer.

That's why we're proud to announce the appointment of Hershey Equipment Company, Lancaster, Pa., as the newest Brock dealer.

Hershey's Staff of experts can help you with system planning, financing and installation.

Plus a great service organization. That's why we chose them to be a Brock dealer. And that's why you should see them today. Hershey has Brock grain storage and drying systems, and feed storage and delivery systems to meet all your needs.

Now you can get a quality product from a quality dealer — and you can't ask for anything better than that.

BROCK® Brock Manufacturing, Inc. Milford, Indiana.

A quality dealer for quality products.

New swine confinement system studied in Del.

Swine research associate Ralph Lowe holds the snout of one of the Substation Swine Unit's new gilts while his assistant, Kip Foskey, earmarks her for identification purposes. The unit's 64 gilts arrived the week after Thanksgiving and have all been bred for a Spring farrowing.

DOVER, Del. – Delaware swine producers have become more sophisticated in recent years, graduating from the "woodlot" type of operation – practiced by the all-purpose farmers who kept a few feeder pigs rooting around the barnyard – to the "confinement" system, in which all or part of the operaton is enclosed in buildings.

This new system allows farmers to specialize in swine production, giving them better control of the breeding, gestation and farrowing of their hogs. But the idea of raising hogs completely indoors is new to many Delaware farmers and the confinement system is not without problems.

Thus, it assist those swine producers now wishing to upgrade their operations and to demonstrate the myriad new developments in swine production, the University of Delaware has designed and built a new Swine Research Unit at the University of Delaware Substation near Georgetown.

"The purpose of the unit is strictly functional," explains Extension livestock specialist Richard Fowler, who, along with a committee of swine producers led by William Gordy, Laurel, was instrumental in developing the unit. "We will be mainly demonstrating good swine production practices and trying to help Delaware farmers solve their practical production problems...we will not be doing basic research."

The unit was completed last fall and technically opened when Ralph Lowe, a young graduate of the University of Delaware's College of Agricultural Sciences, was hired in October. But the unit really went into operation when the University's swine herd–60 gilts and six boars–arrived the week after Thanksgiving.

The feeder pig production unit, designed to hold a total of 84 sows, consists of two 10-crate farrowing rooms, a nursery and a breeding and gestation house. It also has a flush waste system with lagoons which serve as a research disposal system.

"Delaware has had a shift in intensity of hog production," says Fowler. 'Producers have gone from a low capital investment with little or no equipment to a more intense operation with confinement buildings. And when the farmers spend the money for these facilities, they must expand production and sell more pigs in order to pay for it."

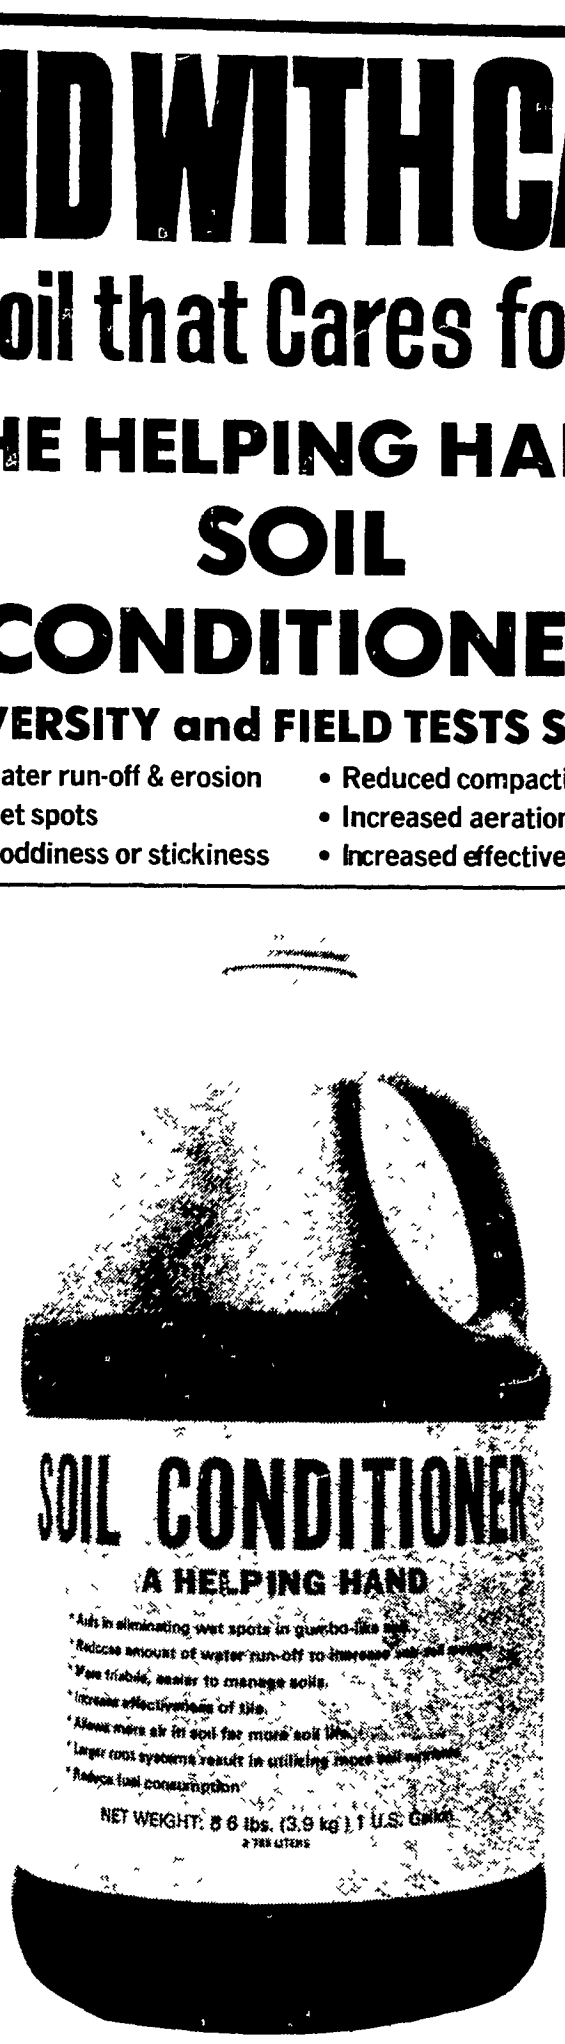
TEND WITH CARE

the Soil that Cares for You!

THE HELPING HAND SOIL CONDITIONER

UNIVERSITY and FIELD TESTS SHOW:

- Reduced water run-off & erosion
- Reduced wet spots
- Reduced cloddiness or stickiness
- Reduced compaction of soils
- Increased aeration of soils
- Increased effectiveness of fertilizer



THIS SOIL CONDITIONER is an organic material which improves soil texture so that water, fertilizer, and air can reach the root system. In this way, it assists the growth of healthier, more vigorous plants with stronger and deeper root systems.

Since SOIL CONDITIONER improves soil texture and water penetration, root development also improves. Root growth goes deeper into the subsoil for stored moisture and minerals. Roots produce more fine roots and root hairs, which allows roots more places to take up nutrients in the soil.

The now available nutrients in the soil are due in part to increased soil life. Because SOIL CONDITIONER has helped to cause an increase in soil life, there are now more available nutrients in the soil. Let SOIL CONDITIONER LEND "a helping hand" in your soil and water management.

AEROBIC RESEARCH & MARKETING, INC. SOIL CONDITIONER University test plots, independent research, and farmers' observations have shown that Ammonium Laureth Sulfate (Ammonium Alkyl Ether Sulfate) greatly improves soil and water management.

New swine confinement

(Continued from Page 12)

Fowler characterizes the changes these developments brought to the industry with the fact that swine farmers have now gone into year-round production. Since many swine producers used to let their sows farrow only during the spring after planting and during the fall after harvest, the result was an unbalanced -- and unprofitable -- economic situation.

"There was a depressed market at sale time and an elevated market for the rest of the year," says Fowler. "Producers now break down production into year-round farrowing, by breeding sows throughout the year and weaning at an earlier age."

One of the techniques Fowler and Lowe will be using at the new swine unit to get the sows to come into heat is to switch them around into different pens. Since sows always establish a pecking order within each pen, each time they are regrouped they will fight until a leader has been established. Fighting and stress will usually induce the estrus--or heat--cycle.

Taking the hogs out of their natural, outdoor environment creates more problems within the swine community than were originally expected. Whereas in nature the pigs can obtain enough iron from rooting around in the soil to keep them healthy, pigs raised in confinement have no way of getting that iron. Thus, another experiment conducted at the swine unit, according to Lowe, will be that of giving the newborn pigs iron by oral and injected dosages and then comparing the results.

Artificial insemination is another problem to be considered. Though artificial insemination would be as great a boost to the swine industry as it has been to the cattle industry, there have been problems in perfecting this technique, largely due to the fact that boar semen will not freeze well. In addition to increasing breeding control and maintaining better disease control, artificial insemination would eliminate the problem of getting hogs to breed in the unnatural setting of a concrete building.

"We also hope to experiment with cross-breeding," says Lowe, who was raised on a Sussex County farm. "Duroc, York and Hampshires are the major swine breeds and each is noted for a different quality...Yorks for their mothering ability, Durocs for their growth and feed conversion, and Hampshires for their carcass quality. By cross-breeding these varieties, we hope to develop a gilt which is better adapted to confinement life."

Lowe and Fowler will also be considering the problem of estrus synchronization, or breeding all gilts at the same time to make the farrowing operation easier. In addition, they will always double breed the sows as research shows they can get one extra pig per litter by so doing.

"One of the first projects we will be conducting is on a product called dichlorovos which is fed to sows for deworming," says Fowler. "It has been discovered that if this substance is fed to sows at low levels during late gestation for a continual period of time, it will increase litter sizes."

Experiments with dichlorovos and most of the other subjects to be considered at the Substation swine unit have already been conducted in many of the bigger hog-producing midwestern states. But Fowler feels these techniques should be localized and demonstrated under Delaware conditions.

The Delaware Swine Advisory Committee will be assisting with the planning of many of the programs conducted at the unit and it is their hope that the unit will serve as a focal point for pork meetings and swine short courses. Since Wednesday will be designated as Visiting Day at the unit, Folwer expects the same farmers to come back several times each year for advice.

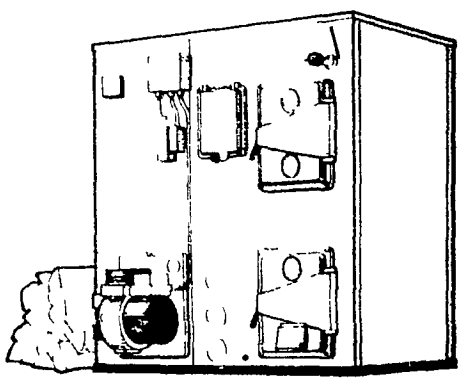
"The increase of swine production in Delaware can be attributed to the fact that farmers who were already raising hogs are expanding their facilities rather than new farmers going into the industry," explains Fowler. "Now our job is to help them iron out the problems they might be having with the new facilities."

With a total annual production of 100,000 hogs and a gross annual income of $4 million, Delaware swine production already plays a significant role in the state's overall agricultural picture. But the establishment of the unit and the dedication of the Extension swine specialists to the task of solving the problems of the confinement system can only serve to improve the swine industry's status in Delaware.

Two ways to reduce fuel costs.

The **HS Tarm Type OT** is a modern, efficient multi-fuel boiler for central hot water heating systems It's a unit which allows you to use low-cost wood in addition to electricity and oil or gas as your source of heat When fueled with wood, it warms your home and provides plenty of hot tap water as well Should the wood fire go untended, automatic controls will switch to another fuel, and the boiler will continue to supply all your heating and hot water needs

The **Tasso A-3** is a cast iron wood-burning boiler made to work in combination with existing oil- or gas fired hot water heating systems to give you multi fuel economy Used with your present boiler, it allows you to heat your whole house with wood all the time, or merely supplement your present fuel by burning wood Like the HS boiler the Tasso A-3 offers convenient operation if the wood fire dies out, your oil or gas burner will take over automatically



The HS·Tarm Type OT

Either the HS Tarm Type OT or the Tasso A-3 will give you reliable service while helping to protect you from fuel shortages and the high cost of commercial fuels Choose the boiler that's right for you!

The Tasso A-3

Some of the old tractors are today's classics

(Continued from Page 8)

comparison, that new Farmall with its new black tires, silver painted wheels and clean, white lettering was something to see.

We just stood around watching it for awhile as if it were going to do something on its own. Finally, somebody got the idea that we'd have to start it up if we were going to see it perform. So the proud owner hopped aboard and the show was on. Around the circular driveway at an astonishing speed and off to the field where its plow was waiting. Progress had definitely come to the farm.

It's a little sad as I think back – Farmall tractor is probably still doing its thing somewhere – but the farm is gone. Now that's real durability for you. Progress brought us a new tractor, then it eventually took the farm for its houses and shopping centers.

International Harvester has manufactured a lot of tractors since the last Farmall rolled off the assembly line a quarter of a century ago. No doubt the designers have made improvements and the company is still a giant of the industry. But in my mind those old Farmalls will always be the classics of agricultural technology. And when that Delaware Agricultural Museum is finally opened for business, I hope to see one of those Farmalls (in mint condition) given a place of honor – a silent spokesman for the thousands of its look-alikes that are still on the farm working.

4-H council meets

BAIR – Megan Shaub, a York County 4-H'er, showed slides of her trip to the National 4-H Club Congress at the recent meeting of the York County 4-H Council.

The public is invited to attend a family comedy and cartoon films to be shown on February 3 from 7:30 to 9:30 p.m. at the 4-H Center. A 75 cent donation will be collected at the door for the movie

Paul Myers, III, president, announced coming event. They include an officers training meeting on January 21; a roller skating party on January 23; a senior exchange meeting on January 31; and a five-county lock-in on February 17 to 18.

The next meeting of the County Council will be held on February 1. The program will be given by exchangees from Germany and New Zealand.

Steer sells for $7687

HARRISBURG – The traditional "Farm Show weather" reappeared Friday as snow fell once again in the Harrisburg area. As the snow rose on the ground outside the Farm Show Building, prices were rising in the small arena where the tops in junior market animals were being auctioned off.

The grand champion steer, "Snowball," owned by Brett Holzhauer, 14, of Holtwood, Lancaster County, sold for $6.15 a pound, for a total of $7,687.50. The 1,250 pound Angus-Chianina Crossbred steer was sold to Mr. Danny George, owner of George's Foodliner Market in Bethlehem. Mr. George has been attending the auctions at the Farm Show for several years, buying over $500,000 worth of top animals at the show.

The bidding on the grand champion steer stalled after moving quickly to about $5.50 a pound. At that point, Agriculture Secretary Kent Shelhamer stepped into the ring to lead the steer to its final price. Contending bidder was Robert Frame of the Vintage Sales Stables.

At $6.15 per pound, "Snowball" sold for ten cents more than last year's grand champion, but well below the record price of $6.40 set at the 1976 Farm Show. Brett, who attends the Swift Intermediate School and is a first-year member of the Red Rose 4-H Beef and Sheep Club, says that he will save the money.

The reserve grand champion steer, shown by Janice Kaylor of Elizabethtown, was also sold to Danny George for $1.80 per pound, or a total of $1,720. Miss Kaylor had shown the grand champion at last year's show.

Lancaster County's Abe Diffenbach from the New Holland Sales Stables did the auctioneering, with sons Abe J. and Alan taking the bids.

4-H'ers say thank you

LANCASTER – The members and leaders of the Red Rose Beef and Sheep Club are back in Lancaster County from the Farm Show. Before tackling their next projects, they'd like to thank the buyers of their animals. They are as follows: Acme Markets, Philadelphia; Baum's Bologna, Elizabethtown; Belleville Livestock Market, Belleville; Creutzburg Livestock Supplies, Paradise; Walter M. Dunlap Company, Lancaster; Dannie George, George's Foodliner, Bethlehem; Green Dragon Farm Market, Ephrata; Groff's Meat Market, Elizabethtown; Hendricks Meat Market, Columbia; Henry's Meat Market, Greencastle; R. E. Hershey Meats, Elizabethtown; Lancaster Farming, Lititz; Lauxmont Farms, Wrightsville; McCoy Cattle Company, Lancaster; Myers Black and White Holstein Farm, Lancaster; New Holland Sales Company, New Holland; Stonebridge Farms (John Brubaker), Mount Joy; H.S. Stoltzfus Level Flow Silo Co., Lancaster; Donald Templeton, Ebensburg; and Vintage Sales Company, Kinzers.

Figure it for yourself.

When you shortchange their nutrition, you shortchange yourself.

Looking for ways to cut on down on out-of-pocket feed costs without cutting down on milk production?

Cutting production costs will backfire if you end up shortchanging your herd's nutrition in the process.

But you can cut those costs safely by feeding homegrown grains and grain silage fortified with the right Vigortone Dairy Pre-Mix. These potent pre-mixes contain the proper levels of vitamins, calcium, phosphorus, and other minerals needed to balance your farm's feedstuffs.

Vigortone Dairy Pre-Mixes can be mixed in or metered on any palatable grain or roughage. This lets you change ration content to fit the supplies you have on hand without risking herd performance.

Better herd nutrition means a bigger milk check. Minimum out-of-pocket feed costs mean more in your pocket.

Your figures will prove it.

Dry cow nutrition pays future profits.

Shortchanging your dry cow's nutrition can be risky too. Most problems dairymen experience in getting cows back in the string can be traced to careless treatment during the dry period.

Keep them in top condition until their next lactation. To help you do it, Vigortone has developed unique dairy pre-mixes specially concentrated for dry cow rations.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's cost-saving dairy feeding programs with any other you name.

VIGORTONE
PRE-MIXES It's Time To Compare!

Pesticide course offered at Solanco High School, 7:30 p.m.

Saturday, Jan. 28

Blue Mountain Young Farmers hold barn dance, 7:30 p.m.

A simple way to save energy and reduce utility costs is to wash clothes in warm or cold water If everyone followed this simple procedure savings would amount to the equivalent of 100,000 barrels of oil per day That is 2½ per cent of the total demand for residential heating — enough to heat 1 6 million homes in winter

Reader says do less and get more

Continued from Page 10

If strikes, boycotts or any other types of rebellion fails, there is only one peaceful, practical alternative. The federal government should take over all farm land property. This system offers unlimited possibilities. You will be able to keep on farming, but you won't have to invest one cent of your own money. The best part of all is that you will be paid a guaranteed salary and everything you need to operate would be supplied by the government.

So, if we farmers cannot solve our problems on our own, there is always someone who will – and NOT ALWAYS TO OUR ADVANTAGE!

Yours truly
Willard Greene
Glens Falls, N.Y.

Swine future uncertain

HOUSTON, Tex. – Glenn Grimes, University of Missouri Extension economist, warns swine producers that marketing uncertainties would face them in 1978.

Grimes, speaking at the swine conference during the 59th annual meeting of the American Farm Bureau Federation, said: "The size of producing units is getting larger. They are increasing at the approximate rate of seven per cent per year.

"One larger unit is known to have 20,000 sows," he said, "and probably the ceiling hasn't been reached yet."

Large hog units are not uncommon and many are over 10 years old, but most are specialized-type units, he explained.

Also Grimes said more than 50 per cent raise no feed grain, this means grain for hog feed is a cash constant in the hog industry. With stable to higher grain prices and increased hog production expected in 1978, Grimes looks for the following price trends:

First Quarter: 20 million expected slaughter, $38-41 expected price;

Second Quarter: 20.5 million, $36-39;

Third Quarter: 21 million, $35-37;

Fourth quarter: 22 million $35.

Grimes believes with a trend to larger producing units, swine producers could see an eventual change in marketing and pricing patterns.

xxx

RETROACTIVE ALLOWANCE

The IRS rule allowing 17 cents a mile for the first 15,000 miles of business use of a vehicle is retroactive to January 1, 1977. Employees who have been reimbursed at less than the new allowable rate should file an "employee business expenses" form with their tax returns and claim the difference as a deduction. This can be done even it you don't itemize deductions.

MEDICINE AND MANAGEMENT

By CARL TROOP, VMD

Education keeps management sharp

Wintertime brings an opportunity to those in agriculture and agri-business that no other season can offer. It is the season of meetings and conferences, a time when life on the farm is slightly less hectic, when farmers and those whose business revolve around him have an opportunity to provide and attend educational meetings.

There are many meetings and events throughout the winter months. This gives farmers golden opportunities to learn about many of the things which are vital to their particular industry. Agribusinesses and Extension services go to great pains and expense to provide the farmer with the knowledge needed to efficiently and economically run his operation. There is information available to the farmer like there never has been in the history of agriculture. But nobody is going to go out to the farm and plant it in your head. You have to make the effort to learn.

Education is a very simple thing. You never really completely learn anything. Education is just another step in being better able to understand what you are trying to learn. There are very few things in this world that are black and white, one way or the other. And what is thought to be true at one time may be disproven at another. It is the narrow minded person who can claim for anything that this is the way it must be done, or that this is the way it is. For most endeavors there are many variables, many possibilities, each one influencing the other and the end result. The more we can learn about each possibility, the better prepared we are to manipulate the variables and influence the end result.

Let's take raising calves as an example. There are many ways to house calves, to wean calves, to feed calves, etc. Nobody can say this is the only right way to do the job. Every farm has its own set of circumstances for which many different management factors apply. So the more you know about every aspect, the better able you are to make the decisions which will best influence the desired result. And this is where education has its place.

But you say you can't attend every program available or read every magazine on farming. You must do some choosing and the rules you choose to govern your continuing education are the same whether it be for magazines, books, speakers, meetings or just plain on the farm discussions.

1. Choose those areas which are directly related to your operation. This is fairly simple. Dairymen go to dairy meetings and read dairy magazines.

2. If you must further choose, choose those areas in which you have the most interest. Again very simple. You will get more out of a meeting or magazine if you have a larger interest in it.

3. Try to watch from year to year and attend those meetings which deliver what they promise. I recently attended a meeting of a major feed dealer with the speaker being the head nutritionist of the company bringing the "latest in nutritional information and developments." Needless to say I looked forward to an evening of some good solid information. What we got was a talk about his job and the products of his company, just one big advertisement. Even with the free meal most of those in attendance considered it a wasted evening, and many, I am sure, will not return next year. Today's progressive farmers want information, not entertainment and a free meal. Many companies do provide excellent yearly conferences on the latest in whatever field they are in. Others have some catching up to do. You must do the sorting.

4. Most important- whatever you do hear or read, regardless of who speaks or writes it- take it with reservations, not as fact. Be skeptical. Just because a so called expert or authority on a subject says something, this does not make it true. Just because it appears in black and white does not make it true. Weigh its value in your own mind. Your judgement is as valid as anybody else's. Does it make sense? Does it sound reasonable? Just because it worked for somebody else, will it work in your situation? Just because it didn't work for somebody else doesn't -

$20,000 cow wins Guernsey show

The yellow breed has a rising star

By DIETER KRIEG

HARRISBURG – The Guernsey breed of dairy cattle is considered by some to be vanishing from the American agricultural scene, but fellows like Tweet Snider will never be convinced of that.

Snider has been associated with top quality Guernseys for all of his life – having grown up at Snider Homestead Farms, one of the most renowned Guernsey farms in the state. For the past four years, however, he's been employed as manager of South Penn Farms, which is located near his home farm in Bedford County. Although South Penn Farms, owned by Donald P. Moran, was the home of Angus cattle, Snider's love for Guernsey cows convinced Moran that the barns and pastures should be filled with the yellow dairy breed of cattle.

On October 1 of last year a brand new Guernsey farm came onto the Pennsylvania dairy scene and they're making waves which are being noticed all across the nation. The recent Pennsylvania Farm Show is just one more example in a long list which establishes South Penn Farms and manager Snider as a power to be reckoned with when top cows are discussed. The Farm Show's Guernsey champion was – you guessed it – exhibited by Snider.

Happy Hill AFC Lorna, a 5-year old, was the grand champion. Within the last few months that Snider and Moran have had her, she has stood first at the Pennsylvania All-American, the Maryland State Fair, and now the Farm Show.The stylish cow is also an All-American 3-year old for 1977.

Purchased by South Penn Farms last Fall for a record $20,000, the champion cow is a national class leader in milk production for 3-year olds Her record stands at 22,200 pounds of milk and 1021 pounds of butterfat, produced in 305 days She's currently milking 118 pounds of milk per day, says Snider, after having freshened last October.

The sire of the winning cow is Apple Brook Fames Corporal.

The recently established Guernsey herd at South Penn Farms is stabled in a new barn equipped with 80 Show-Ease stalls, and pipeline milkers Two hundred acres of fields devoted to corn and hay help supply the nutritional needs of the cattle Snider makes it a point to give them the best of care That's one of many reasons the farm came home from the Farm Show with the Premier Exhibitor banner

Snider considered this year's Guernsey show at the Farm Show to have been one of the best in years He's been a regular participant for the past 20 years According to him, this year's show was up in both quality and quantity, which is just one more sign that the Guernsey cow is here to stay

Showing the reserve grand champion at this year's Farm Show was Rutter Brothers of York. Tim Rutter, son of Mr. and Mrs. Leo Rutter, was at the halter of the animal, named Pineylane Champion Cherie, a 7-year old Young Rutter also had the junior champion, a senior yearling named Rutter Bros. Du Kes Susie The reserve ribbon was won by Ginger Sechrist of Fayetteville.

Following are the placings of the open Guernsey show:

Heifer Calf

1. Kevin Callihan, Imler; 2. John Marchezak, Bentleyville; 3. Jeff Benedict, Waynesboro; 4. David Briggs, Burgettstown; 5. Bernard Snider, New Enterprise.

Junior Yearling

1. Bernard Snider, 2. Donald Moran, New Enterprise; 3. Ginger Sechrist, 4. Jason Ivcic, Bentleyville; 5. Renee Fava, Scenery Hill.

Senior Yearling

1. Timy Rutter, 2. Ginger Sechrist, 3. Ruth Benedict, Fayetteville; 4 Alisa Marie Fava, Scenery Hill; 5. John Marchezak

Junior Get of Sire

1. John Marchezak, 2. Jeff Benedict.

3 or 4 Year Old Dry Cow

1. Bernard Snider, 2. John Marchezak, 3. Bernard Snider, 4 Rutter Brothers, 5. Donald Moran.

Aged Dry Cow

1. Donald Moran, 2. Bernard Snider, 3 Peggy McDonald, Imler; 4. Marion Benedict, 5. Michael Benedict, Waynesboro.

Two Year Olds

1. Marvin Miller, Strasburg; 2. Donald Moran, 3. Bernard Snider, 4. Darryl Rohrbaugh, New Freedom; 5. Cindy Rutter, York.

Three Year Olds

1 Timy Rutter, 2. Donald Moran, 3 Deborah Lehman, York; 4. Donald Moran, 5 Bernard Snider.

Four Year Olds

1 Patricia McMurray, Bentleyville; 2 Brian Lehman, York; 3 Renee Fava, 4 Renee Fava, 5. Donald Moran

Aged Cows

1 Donald Moran, 2 Barry Lehman, York; 3. John Marchezak; 4 Donald Moran, 5. Alisa Marie Fava

Open Get of Sire

1 Donald Moran, 2 Ellsworth Lehman, York, 3 Cindy Rutter

Dairy Herd

1 Donald Moran, 2 Deborah Lehman, 3 Patricia McMurray, 4 Michael Benedict, 5 Bernard Snider

Best 3 Females

1 Patricia McMurray, 2 Bernard Snider, 3 Brian Lehman, 4 Marion Benedict, 5 Timy Rutter

Produce of Dam

1 John Marchezak, 2 Jeff Benedict, 3 David Briggs

Premier Breeder

1 John Marchezak

Tweet Snider, at the halter of a $20,000 champion Guernsey, is serving notice that his breed of dairy cow is on the way up.

Looking a bit tired after a day of competition, Timy Rutter's reserve grand champion Guernsey longs for the comfort of the straw.

Lehigh Co. takes seven apple awards

HARRISBURG – Lehigh County rated the highest in apple displays at the Pennsylvania Farm Show with two orchards in the county taking seven out of 13 of the best-of-show awards offered last week Mohr Orchards, Orefield R1, earned the best bags, best try of 20, best roadside pack (8-15 pounds), best roadside pack (16-24 pounds), and best gift pack

Hausman Fruit Farm, Coopersburg R2, took the State Horticultural Association Award, and two best bushel awards

The Franklin County Horticultural Society earned both the best county exhibit and the Gabriel Heister awards

From Dauphin County, Strite's Orchards, Inc., Harrisburg, earned two top honors – the best overwarp tray and the best pears.

Friday and Haacher Farm, from Roaring Spring R1, Blair County, was judged as having the best plate of five

Dairy officials worried by surplus

(Continued from Page 1)

Gartley is quick to point out, however, that the dairy cooperative maintains a healthy financial base. Despite the more than $800,000 that were spent for excess marketing costs in 1977, IMPCO's treasury has a strong reserve fund. The cooperative is splitting its excess marketing costs between members and already accumulated funds.

Surplus milk is expected to be a burden for the next several months yet, thus additional costs can be expected along with some slippage in the savings schedule.

Dairy economists are predicting that the average blend price for 1978 will be up by about 30 cents from a year ago. While that will not likely cause a downturn in milk production, it is hoped that improved cull cow prices will thin out some herds enough to put the brakes on the milk flow.

Inter-State and Maryland Cooperative Milk Producers expect their jointly owned Holly Milk Cooperative to be completed this Spring, which will help alleviate the surplus condition. More than $8 million are being spent on the venture. Slides of the plant were shown at the Quarryville meeting.

Boyd Gartley

Aside from surplus milk production, Inter-State is very much concerned over antibiotics in milk, noting that 40 tankers tested positive for antibiotics during 1977. The losses incurred can be astronomical and dairymen are urged to do all they can to keep the drugs out.

Gartley has personally taken on a third problem of the dairy business, having recently launched his own crusade for fair publicity for milk. Telling his audience about the adverse publicity milk is occasionally receiving on television, Gartley said he recently returned from New York to straignten the matter with TV producers. He was well received, he says, and has been invited to go back. In a related development, the dairy spokesman will be appearing on the popular television game show "To Tell The Truth." Gartley's portion of the program has already been taped and is to be aired in March.

"Anytime you hear anything about milk you don't like, call me," Gartley concluded, noting that there is a continuing need to keep the positive qualities of milk before the public.

Another area of concern for dairymen are the moves in government which direct themselves towards the establishment of bureaucratic food standards. Dairy cooperatives recently won a hard fought battle against the Food and Drug Administration to keep foreign made artificial substances out of ice cream. Had FDA been successful with its proposal, dairymen would have lost one more marketing channel while consumers got stuck with a comparatively inferior product. Animal agriculture spokesman are repeatedly warning about the steps being taken in Washington to dictate eating habits for Americans. Should such a move ever be successful, it's generally acknowledged that

Melvin Neff, president of District 12 of Inter-State Milk Producers Cooperative, congratulates project book winners Christine Esbenshade, Nancy Akers and Doug Hershberger.

District 12 of Inter-State Milk Producers has these new 25-year members, left to right; John Groff of Peach Bottom, and the father and son team of Hiram and Dale Bollinger of Quarryville R4.

ag phases of animal agriculture will be hurt significiantly.

In other activities at the IMPCO District 12 meeting, three young adults were cited for their work with project books and three dairymen were recognized for 25 years of membership with Inter-State.

The three 4-H'ers to receive awards were Doug Hershberger, son of Mr. and Mrs. Robert Hershberger, Quarryville R4; Christine Esbenshade, daughter of Mr. and Mrs. Fred Esbenshade, Quarryville R2; and Nancy Akers, daughter of Mr. and Mrs. Curt Akers, Quarryville R1.

Honored for 25 years of membership were John Groff of Peach Bottom R1, Hiram and Dale Bollinger of Quarryville R4, and Sol E. Stoltzfus of Paradise R1.

An election of officers and delegates was held for both Quarryville and Christiana locals of District 12, with the following results:

James G. Kreider will serve as president of the Quarryville local, with Robert H. Kreider filling the vice presidential slot. H. Melvin Breneman will serve as secretary and Larry Breneman and Kenneth Rutt will both serve on the hauling committee. Delegates are C. Dale Bollinger, H. Melvin Breneman, R. Edwin Harnish, and Karl W. Herr.

For the Christiana local, J. Ray Ranck will serve as president, Allan D. Rohrer will be vice president, and James W. Bowman will be secretary. Delegates are Charles Groff and Donald Neff, with alternates being Kenneth Beiler and Benjamin Clark.

Corn drying to be discussed at corn clinic

Fred Huges

UNIVERSITY PARK – Can you count on a profit in drying your corn or beans? How about the storage costs versus selling? That's what Fred Hughes, Penn State Farm Management Expert, will present at the Southeastern Pennsylvania Corn and Soybean Clinic on February 7th and 8th at Westover Inn, Jeffersonville, Montgomery County. The entire program is pointed to the grower, an educational activity of the Cooperative Extension Service and commercial trade representatives.

Other features include program items dealing with soybean double cropping, weed control problems, drying and storage systems, aflatoxins, market tools, the new government program.

Complete programs and registration forms are available at all county cooperative extension offices.

Butz warns of attack on food

HOUSTON, Tex. – Former Secretary of Agriculture Earl Butz told delegates to the 59th annual meeting of the American Farm Bureau Federation recently that the nation's whole food system is under attack, with the government pursuing a philosophy of cheap food, and moving back into agriculture in a big way.

Butz said Congress is using no sense of fiscal responsibility, and he urged farmers to "attack and get some sense of responsibility back in government."

The former Secretary praised the Farm Bureau Federation in these words: "If ever there was a time in American agriculture when we ought be thankful for the kind of organization you are, that time is today."

He added, "With 2.8 million member families, I am glad there is a voice in this country that has the courage to take a position of moderation in government."

Butz said he is thankful for a voice coming out of American agriculture that stands tight on sound economic principles at a time when the philosophy coming out of government is to raise our costs.

He said inflation, which he called the cruelest tax of all, has hit farmers "in the solar plexus," and it has had the heaviest impact on those least able to pay.

Butz urged the AFBF to "stand firm on the principles of a sane fiscal policy, more freedom for farmers and access to public markets."

WHAT'S NEW

MF 2805 and MF2775 TRACTORS

One of two new large-orsepower, two-wheel-rive tractors available rom Massey-Ferguson, ıe MF 2805 ıs rated at 90 PTO horsepower - manufacturers' estimate) nd features a turbocharged 'erkins 640 cubic inch V-8 iesel engine. Both MF 2805 nd 160 hp MF 2775 offer all he features and benefits of ırevious models, MF 2800 nd MF 2770, plus a new lutch arrangement, a new steering system, and new power-assıt brakes. The muffler has also been relocated to provide exhaust-driven engine aır cleaner aspirator.

The new MF 2775 two-wheel-drive tractor from Massey-Ferguson is powered by naturally aspirated Perkins 640 cu. in. V-8 diesel engine rated at 160 PTO horsepower (mfgrs.' estimate). Either standard eight-speed or optional 24-speed, three-range transmission is available.

DISC HARROW

LA PORTE, Ind. - A new medium weight disc harrow, suitable for either primary tillage or seed bed preparation, ıs available ın centerfold and doublefold models from the Implement Division of Allis-Chalmers Corp.

Designated the Model 2600, the basic centerfold model comes ın 16 to 22 foot versions, while the doublefold ranges from 25 to 32 ft. Blade weights are available from 118 to 170 lbs., and the 24 in. diameter blades may be obtained in plain or notched versions. Blade spacings are nine or 11 in., or a combination of nine or 11 in. All in all, the 2600 disc harrow has 53 different model combinations to match almost any tillage operation.

Both basic folding models utilize two fast acting hydraulic cylinders that fold the unit to 13½ ft. widths for easy transport. Both models also have slotted wing cylinder brackets to allow a 10 per cent float, so the unit accurately follows the ground contour.

On the centerfold units, walking beam dual wheels on the center section provide a shock absorbing action. If one wheel on the axle drops into a hole, the other wheel remains level to reduce shock saving tires and spindle life.

The centerfold model utilizes overlapping front gangs to eliminate untilled center strips in a field. Both front and rear gangs are adjustable, while flotation wheels add stability to the unit. For even more flotation, extra outboard duals are available as an option.

Working depth of the Model 2600 may be controlled by depth stop collars. The linkage assures that the harrow raises and lowers on level, and that the unit's weight is centered on the disc baldes rather than the drawbar. For additional penetrating weight all the wheels may be lifted off the ground. Adjustable turn buckles connect the wing cross-axles, and also aid in leveling.

Backup plates to the disc blade provide extra strength at the most important blade stress points. Also, the four-inch space spools provide accurate spacing and extra reinforcement for the blades.

Education

(Continued from Page 16)

mean it can't work for you. Keep an open mind. There is much to be learned. And the learning is the understanding, and with the better understanding you can weigh each decisions on its own merits, not what somebody else has told you to be so. So be skeptical, always questioning.

It seems that the first part of our lives is spent in education, granted some much longer than others, then the rest of our lives using it. But life itself is a continuing practical education. And there are many fine meetings and conferences to fortify our practical working education with a background or foundation of further and better understanding of the problems we are encountering. They can do nothing but help. The man who has time or takes time to learn will have more time and will be taking the drudgery out and will be putting the interest into his work. The opportunities are there. One has only to take advantage of them.

It takes a special breed of hybrids for high performance corn silage. Not just stalk and leaf tonnage that might look impressive. But with the extra grain production that packs silage with protein power as well as taste appeal. That extra feeding value can be measured in terms of better milk and beef production.

There's a high performance, high energy Funk's-G silage hybrid in every maturity range. Your Hoffman Seed Man can help you select the best ones for your growing conditions.

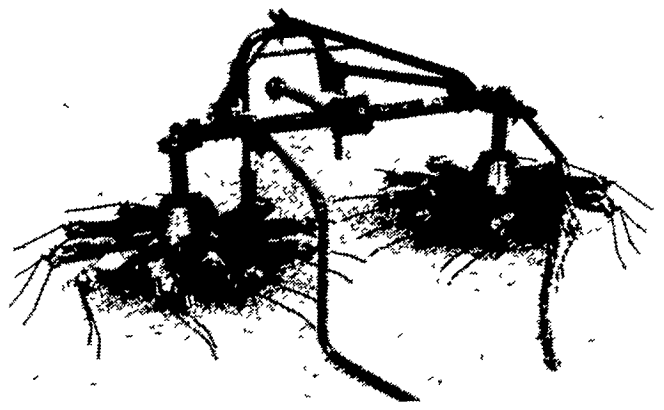
WHAT'S NEW

SWATHER

Massey-Ferguson is introducing the MF 775 hydrostatic swather in 1978. It offers a number of improvements over the MF 655 which it replaces. These include a larger radiator intake screen with greater surface area to allow more air movement for better cooling.

The MF 775 will feature as standard equipment a high header lift system which enables the cutter bar to be raised to a maximum height of 39 inches above the ground. Previously available only as an extra cost option, the high lift system includes two additional hydraulic cylinders to provide the added height needed to clear high-cut windrows in field operations.



New 12 ft. and 14 ft. auger tables are available for the MF 775. They are designed to provide maximum capacity for cutting, conditioning and windrowing hay in one operation. Features include a wobble box knife drive, providing 1400 cuts per minute; a built-in 42-in. diameter 4-bat, cam-operated reel and 22-in. deep flight auger. An optional crimper-type hay conditioner is also available for direct mounting to the table.

Four sizes of draper tables are offered: 12, 15, 18, and 21 ft. widths. Cone dividers and extensions are standard on draper tables for use in standing or down hay or grain. The vinyl-impregnated dacron draper materials is resistant to shrink, stretch, rot, and mildew.

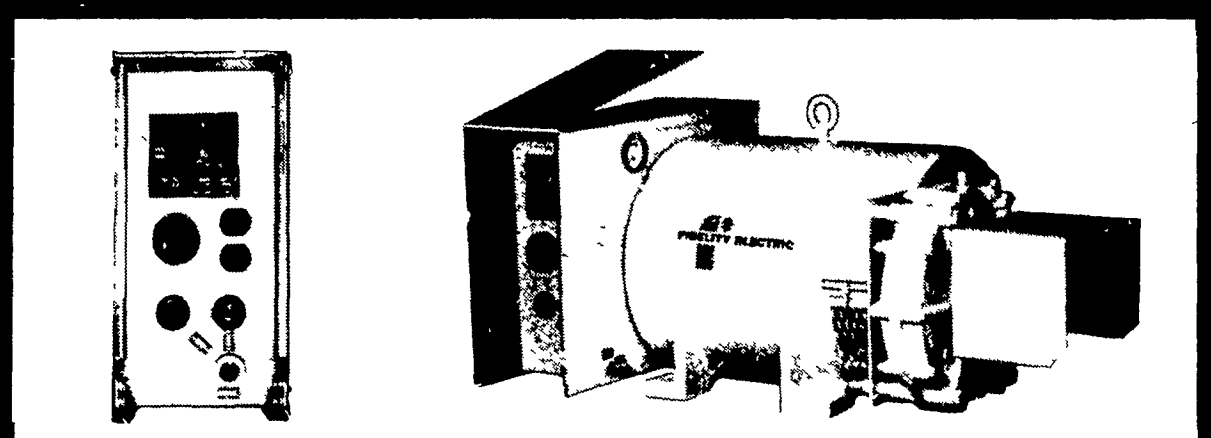
Like its predecessor, the MF 775 is powered by a 225 cu. in. Chrysler industrial 6-cylinder gasoline engine. Hydrostatic power transmission gives exacting speed control, and the hydrostatic motor drive is spring-loaded for longer life. A positive-action parking brake and built-in slow-down mechanism offers quick turns at any field speed.

YF meeting rescheduled

EPHRATA – The January meeting of the Ephrata Area Young Farmers Association has been rescheduled for the 24th of the month at 7:30 p.m. in the Ephrata Senior High School agriculture classroom. After the business meeting, which includes the election of officers, the topic of the evening will be "Wills and Farm Estate Planning." Elvin Byler, an attorney from Lancaster, will be speaker. Questions will be entertained as part of the program. Several community members involved in estates will be present.

STOP worrying about power brown-outs and black-outs!..

START all your motor driven equipment at ONE time with Fidelity PTO Alternator.



WHY NOT ENJOY FARMING? . . . ENJOY PEACE OF MIND . . . When you purchase a Fidelity PTO Alternator you not only buy protection against power failures that could spell financial ruin, you also buy peace of mind knowing that you have a faithful and dependable servant that is constantly ready to deliver all the power you need for as long as you need.

If you would like a free, no obligation demonstration at your farm, or more information, simply fill in and mail the coupon below.

ONLY FIDELITY PTO ALTERNATORS . . .

- offers you so many important safety and convenience features.
- starts all your motor driven equipment all at one time.
- offers you continuous-duty industrial ratings.
- are backed by an 80 year reputation for quality and workmanship.
- offers you a meaningful factory warranty.

And remember, one costly power failure can easily pay for the cost of a Fidelity PTO Alternator.

Beef industry future clouded by 'ifs'

HOUSTON, Tex. – There are better times ahead for U.S. beef production; that is, if the industry can get and keep a firm hand on disease control, nutritional information and foreign market development.

This was the concensus of three leading beef industry representatives attending the beef commodity conference during the 59th annual meeting of the American Farm Bureau Federation, here

Dr. Francis J. Mulhern, administrator for the U.S. Agriculture Department's Animal and Plant Health Inspection Service (APHIS), told Farm Bureau delegates that animal diseases represent one of the greatest threats to the beef production dollars.

A licensed veterinarian, Mulhern said complete beef industry support of federal animal disease inspection and control programs is necessary for the economic well-being of beef producers.

David H Stroud,president of the National Livestock and Meat Board, Chicago, Ill, said beef producers cannot expect any dividends without an investment. He was referring to what he sees as the need for producers to finance a national research and information program to combat inaccurate meat dietary information.

Said Stoud, "If meat is not to become simply a supplement to the American diet, beef producers must pursue an active and comprehensive campaign to inform the American consumer about the dietary benefits of meat."

Stroud expressed optimism that such a campaign would be effective against what he said was a trend by certain dietary reformers to convince consumers that meat is not good for thier health.

Discussing foreign beef market development, Allan "Bud" Middaugh said he believes that there is considerable potential for expansion of U.S. beef export markets.

Middaugh, president of the U.S. Meat Export Federation, Inc., Denver, Colo., cited Japan as an example for future export markets. He said that presently 85 per cent of that country's beef imports come from Australia while the U.S. only shares about 12 per cent of total beef imports.

Middaugh said the reputation of American beef is unequaled anywhere in the world. He added that future development of world export markets will require diligent effort by beef industry representatives but that the markets are there and the future economy of America's beef industry is dependent upon them.

The beef conference panel was part of a series of similar agricultural commodity conferences held Monday during the annual Farm Bureau meeting.

Penn Ag preparing for centennial year

EPHRATA - Government and agribusiness must work hand in hand to regulate the industries that help keep Pennsylvania's Farmers in business, according to William Ryan. Ryan took over for a year-long term as president of PennAg Industries Association on January 2. Ryan is also president of the Jesse Stewart Co., a Pittsburgh grain and feed dealer.

"The best way to keep government regulation from stifling an industry is to keep the people in that industry - as well as the general public - aware of what's going on," Ryan said. "PennAg's 100th anniversary in 1978 gives us an ideal opportunity to make this public more aware of the importance of agribusiness to the state economy."

With its century of existence, PennAg is the nation's oldest state-wide agribusiness association. The group's 400 members supply farmers with inputs such as feed, seed, fertilizer, and lime. A number of PennAg members also help farmers market their products. George Robinson, head of the convention committee, said his committee will be working to provide a program and speakers in keeping with the convention's centennial flavor. A convention subcommittee, chaired by Eugene E. Eby of H.R. Wentzel & Sons, Inc., Newport, Pa., will arrange for an historical exhibit of old milling equipment.

A number of speakers have already accepted invitations to appear on the convention program, Robinson noted. These include: Dr. James Beattie, dean of Penn State's College of Agriculture; the Hon. Kent Shalhmaer, Pennsylvania Secretary of Agriculture; Robert Graybill, president of Pennfield Corp., Rohrerstown, Pa., and G.A. Ensminger, president of Albers Milling Co., Los Angeles, Calif.

Morris Brown, Jr., of F.M.Brown's Sons, Inc., Birdsboro, Pa., is chairman of the promotion and publicity committee. He said his committee's biggest job during the PennAg's centennial year would be in getting across to the public the story of agriculture and the tremendous gains in efficiency that have occurred on the farm in recent years.

Organized labor hurting farmers

HOUSTON, Tex. – Excessive spending caused by organized labor creates problems for every farmer and every American, says Elton R. Smith, president of the Michigan Farm Bureau and chairman of the American Farm Bureau Federation (AFBF) Labor Study Committee.

"Labor costs have gone up 300 per cent since 1969 and that affects everyone," he said.

Smith made his comments at the AFBF's 59th annual meeting in Houston January 9 during the horticulture conference

"The job of farmers is not one of union denial but one of union prevention," said Smith. "Treated responsibly and paid fairly, farmworkers do not like to shell out union dues."

Smith challenged state Farm Bureaus to aggressively assess their labor problems and assist individual farmers with their work forces

"We must switch from fire fighting to fire prevention," Smith stressed

He also attacked Senate Bill 1883 which would amend the National Labor Relations Act and be "big labor's biggest power grab to date"

Bruce Hawley, AFBF assistant director for national affairs, warned conferees of propaganda and half-truths distributed by the Environmental Protection Agency (EPA).

"The former administrator of EPA sent out news releases telling us about thousands of deaths and hundreds of thousands of illnesses caused by pesticide use by farmworkers. What he didn't tell us is that 88 per cent of all pesticide fatalities occur in the suburbs and 90 per cent of all pesticide fatalities happen to children five years old or under. Only one per cent of the fatalities were in the farm population," Hawley said.

Fruit and vegetable growers conference slated

HERSHEY – The Hershey Convention Center will be the new site of the 1978 Pennsylvania Vegetable Conference and Trade Show, Jan. 31-Feb. 2. It will continue to be tri-sponsored by the Extension and Research Divisions of The Pennsylvania State University's Department of Horticulture; the Pennsylvania Vegetable Growers Association; and the Pennsylvania Food Processors Association, says Paul Rowe, Strasburg, president of the vegetable growers association.

The State Horticultural Association of Pennsylvania; Maryland and New Jersey Horticultural Societies; and the Pennsylvania Grape and Wine Producers will also be holding concurrent meetings at the same facility. Trade exhibits and two evening social hours will be shared by all groups, says Carlton P. Groff, Kirkwood, chairman of the vegetable group's publicity committee.

Approximately 100 exhibit spaces are being rented to interested industries.

This year's vegetable conference will be similar to the 2½ day conferences that have been held in the past at Penn State's University Park campus where topics about vegetables, small fruits and tomato processing were discussed. "However, with a 3-day conference, we will begin with a tomato processing day on Tuesday, concurrent in the afternoon with the Pennsylvania Vegetable Growers Director's meeting; plus a trickle irrigation panel and frost protection topic in the State Horticultural Association (fruit) meeting. This should be of interest to all vegetable growers," says Groff.

Wednesday's program will include discussions about new equipment; energy; use of sewage sludge; weed, disease and insect control and related topics.

There will be a joint social hour but a separate annual banquet for vegetable growers Wednesday evening.

All day Thursday will be devoted to small fruit topics which are being developed jointly by the State Horticultural Association of Pennsylvania and the Horticultural Societies of Maryland and New Jersey.

The conference program includes a Michigan nurseryman-grower and a plant pathologist from Michigan State University; a researcher for a food processing firm in Ohio; an extension vegetable specialist from Purdue; an equipment developer from Illinois and an agricultural chemist from Delaware.

Also a food processor field representative from New Jersey and a plant pathologist from Rutgers; a fruit grower, extension entomologist, agricultural engineer and horticulturist from Maryland; 14 faculty members from Penn State and 3 USDA personnel. A total of 11 Pennsylvania non-university participants will also appear on the program.

Scientists, specialists, growers and industry people will participate in the three-day Horticulture (fruit growers) Association meeting. Some of the topics to be discussed include: The Labor Situation; Eastern Apple Promotion; The National Peach Council; The Fruit Industry's Research Program–New Products and Trends; Trickle Irrigation; Using Water To Avoid Frost Losses; and Orchard Precautions.

Also, Taking A Look at Mechanical Tree Planters; What's New in Orchard Mechanization; Current Research in Mechanical Harvesting; Commercial Experience with Mechanical Harvesting; Michigan's Apple Pest Management Program; Orchard Replant Problems; Monitoring Environmental Conditions; 77 Insect Situations and Forecast for '78; 77 Disease Situations and Forecast for '78; What Research Can and Can't Do; Dwarfing Peach Rootstocks and Canadian Peach Varieties; Fertilizing Peach Orchards; Thinning Spur Delicious; and Estate Planning.

Strawberry growers will be interested in the following topics to be discussed Thursday morning, February 2: Growing Strawberries My Way; Weed Control Programs for Strawberry; Strawberry and Bramble Disease Identification; and Future Trends in Strawberry Breeding.

Thursday afternoon's session will include discussions on Blueberry Diseases; Bramble Variety Performance; and Bramble Production Practices. A panel will discuss What's Coming in Processing Apple Grades and Orchard Bearing Potential.

Show and Tell where industry representatives will present short talks and visuals about their products and services will again be a part of this year's overall program.

Soybean weed program approved

PRINCETON, N.J. - The Agricultural Division of Cyanamid announced recently that Prowl herbicide has been registered by the Environmental Protection Agency for use in combination with Sencor or Lexone for soybeans.

"This new label clearance offers outstanding broadleaf and grass control when compared to other herbicide combinations for soybeans," said Mr. Dennis McCormick, product manager. "The combination allows for complete application flexibility because Prowl plus Sencor or Lexone can be applied three ways - preplant incorporated or preemergence tank mixed, or Prowl applied preplant incorporated followed by Sencor or Lexone applied as a preemergency overlay."

When applied as directed, tank mixtures of Prowl plus Sencor or Lexone will effectively control twelve broadleaf weeds. These weeds include velvetleaf, smartweed, common ragweed, jimsonweed, carpetweed, wild mustard, Venice mallow, prickly sida, purslane, annual spurges, lambsquarters and pigweed. The mixture will also reduce competition from cocklebur.

In addition to the 12 broadleaf weeds, nine annual grasses are also controlled by the combinations. The nine grasses include barnyardgrass, crabgrass, goosegrass, signalgrass, Johnsongrass (from seed), panicums, giant foxtail, green foxtail and yellow foxtail

The preplant combination treatments should be incorporated into the soil within seven days after the application and the soybeans should then be planted no later than seven days after the application.

Cyanamid recommends mixing the herbicides with ten or more gallons of water per acre when using ground equipment, and with five or more gallons of water when aerial sprayed.

Prowl can be used with either the wettable powder or the flowable formulations of Sencor or Lexone.

WHAT'S NEW

NEW TWO—WHEEL DRIVE TRACTORS OFFERED

DES MOINES, IOWA – Five new two-wheel-drive farm tractors in the 100 to 190 horse-power range will be offered by Massey-Ferguson in 1978.

The new 100 PTO hp MF 2675, 120 hp MF 2705 and 140 hp MF 2745 feature new styling, high-visibility enclosed cabs and easier servicing. They replace the current MF 1105, MF 1135 and MF 1155 tractors.

The other two new "2000 Series" tractors, the 160 hp MF 2775 and 190 hp MF 2805, replace the MF 2770 and MF 2800. All horsepower ratings are manufacturers' estimates of PTO hp. Both row crop and Western models are available.

The MF 2675 and MF 2705 tractors are equipped with a 354 cu. in. Perkins 6-cylinder diesel engine, with turbocharger added on the MF 2705. The engine in the MF 2745 is a Perkins 540 cu. inch 8-cylinder diesel. The MF 2775 and MF 2805 are powered by a Perkins 640 cu. inch 8-cylinder engine, naturally aspirated and turbocharged, respectively.

All five new tractors are equipped with the MF comfort-controlled, high-visibility enclosed cab offering 7,336 sq. inch of tinted glass, six-way adjustable seat, tilting telescoping steering wheel, and sound-dampening construction.

The new "2000 Series" MF tractors feature a standard 8-speed or optional 24-speed, three-range, shift-on-the-go transmission. Both are constant mesh design with forward/reverse shuttle.

Other common features include 16¼ inch power-assist single disc wet brakes, hydrostatic power steering, and fully independent power takeoff with hydraulic clutch control. The MF 2675/2705 have a 14 inch single dry disc clutch; the MF 2745/2775/2805 feature a 14 inch dual dry disc clutch.

The hydraulic system pumps which supply the 3-point linkage, power steering and auxiliary services total capacity of 32 gallons per minute on the MF 2675 and MF 2705 and 40 gallons per minute on the three larger models.

Standard linkage on the MF 2675/2705/2745 tractors is a Category II three-point hitch that can be converted to Category III. On the larger MF 2805/2775 models, Category III is standard, convertible to Category II. A swinging drawbar is standard on row crop tractors equipped with three-oint linkage. Western models are equipped with a wide swinging heavy-duty roller drawbar.

The fully independent PTO operates at 1000 rpm on the MF 2775/2805 models and at either 540 or 1000 rpm on the MF 2675/2705/2745.

The MF 2805/2775 tractors offer all features and benefits of the previous MF 2800/2770 models, plus improvements to the clutch, steering system and brakes. The muffler has been relocated, and it provides the tractors with an exhuast-driven engine air cleaner aspirator.

Built-in serviceability for the new "200 Series" tractors includes an easily removable hood, removable front grille screen, and a slide-out battery tray. Hydraulic components are accessible through the side and rear of the transmission and center housing.

Chicken jokes needed

PARK RIDGE, Ill. – Howard Helmer, Eastern Representative of the American Egg Board has a program entitled "Everything You've Always Wanted To Know About Eggs But Were Too Chicken to Ask" that has been seen by thousands of homemakers, press representatives, television viewers, and egg industry people across the country. Pan in hand (and often 20 or 30 pans), he zips from place to place spreading the good work of the good egg primarily to people who will carry it still further in classrooms and in the press.

"I've given the same program so often that to me it's beginning to molt," said Helmer. "A few great new chicken jokes could be the foundation of an all-new, all-different program. "I need knee-slapping chicken jokes."

The plea for jokes from within the industry is based on Helmer's own experience. For years whenever he tells anyone that he works with the egg industry, their immediate response is always a bad chicken joke. While he says he's heard them all, he's hoping that the same thing happens to everyone in the egg industry and that somewhere out there is a chicken joke that's memorable.

Helmer requests that the best chicken jokes be sent to the American Egg Board, 155 East 55th Street, New York, N.Y. 10022. He and his committee, comprised of his secretary Evelyn, and three Food Editors from leading women's magazines, (who have asked to remain anonymous) will judge all jokes. The writer of the winning joke will receive as an award a one-of-a-kind Pullet Surprise.

Duck vaccine licensed

WASHINGTON, D.C. - The U.S. Department of Agriculture has licensed Long Island Duck Research Cooperative, Inc., of Eastport, N.Y., to produce for interstate distribution a vaccine against duck virus enteritis, a potentially disastrous disease of ducks that has caused extensive losses in both commercial and wild flocks.

Officials of USDA's Animal and Plant Helath Inspection Service said the licensee will make the vaccine available for the first time to commercial duck producers outside of New York state, where the product has been distributed for several years for intrastate use only.

APHIS officials said the license was granted under provisions of the Virus-Serum-Toxin Act of 1913, which requires vaccines, bacterins and other veterinary biologics to be safe, pure, potent and effective.

The duck virus enteritis vaccine is of the modified-live-virus type and must be used only as directed. Distribution is limited to recipients authorized by the animal health officials within each state and subject to any further restrictions they may prescribe.

APHIS officials caution prospective users that the vaccine produces no observable response in the ducks, but a reaction occurs in the blood serum that is indistinguishable in laboratory tests from the reaction found in infected birds. This could affect the study of disease spread from flock to flock and may create problems if eradication is undertaken.

Home storage space available

YORK – There's more storage space in a home than most people think, but it might not be as obvious as a closet or a bookcase, says Mrs. A. Joan Lamberson Extension home economist.

One should consider the space between the top of a doorway and the ceiling. Shelves placed in this area are called "high on the wall shelving" and can be installed near the ceiling of any room by fastening inverted shelf brackets to one of the 2 x 4 wood plates at the top of the stud wall.

Spaces below the lavatory and above the toilet tank in the bathroom can also be used for storage.

Another good place for storing items is below the bed. Most beds have space below the bed frame which can accomodate a storage box as simple as a cardboard box with a cover or a wooden platform on casters.

The back of doors that are rarely closed, as well as the insides of closet doors, can handle adjustable door shelving for small household items such as canned goods.

Built-in seating below a window, along a wall or alongside a raised hearth can be used as storage bins—but not for fireplace wood. Store wood outside to avoid insect infestation.

If fortunate enough to have a laundry area, one can use wall cabinets or shelves to hold laundry supplies as well as many other items.

Shelf assemblies are becoming a very popular means of providing more storage space and can also be used to divide spaces into rooms or deflect drafts from open doors, if placed near an entry.

In addition, space below a staircase can be used for storage. To protect against dirt, however, the stairs should have risers and be covered on the underside. This area could be a good storage space for out-of-season clothing such as heavy garments, which can be placed in garment bags hung from steel pipe storage racks.

An attic is a good storage area only if it is protected against pests, rain and snow and the floor is well supported by the area below it. Make sure items stored in the attic can withstand a variation in temperature from well below freezing to as hot as 140°F.

Finally, the joist spaces in a basement ceiling provide a good space for storing long objects. But one should avoid spaces containing electrical wiring.

WHAT'S NEW

TWO—WAY PLOWS

LA PORTE, Ind. – A new addition to the line of Allis-Chalmers two-way plows, the Model 950, on-land plow is being produced by the company's Implement Division. It is designed for high horsepower two or four-wheel tractors, and has a four bottom base unit, with one or two bottom add-ons as an option.

The Model 950 two-way plow eliminates dead furrows, reduces water runoff on hilly land and keeps irrigated fields level by turning all furrows in the same direction.

The main frame of the plow is designed to provide an 18 in. cut per bottom, with 27 in. of fore and aft clearance, yet it retains close coupling to the tractor. The load carrying member is six by six in. structural steel tubing that is gusseted for strength and rigidity, and is equipped with a Cat. III three point quick hitch. Plow beam mountings assure the proper line of draft for on-land plowing.

An automatic, hydraulic roll-over mechanism provides smooth, positive, non-stop spinning of the plow, saving time at the headlands. Depth control is provided by an adjustable depth gauge wheel that has six increments of adjustment, and adjustable winging screws for positive side to side leveling. The wheel automatically repositions as the plow is rolled over, and may be located on either the fourth, fifth or sixth bottom for the most effective control.

Eighteen in. beam spacing provides a full 6½ square feet between bottoms, which is a major feature in the prevention of plugging.

The 950 may be equipped with either shear bolt beams or spring trip beams for operation in areas where rocks are a problem.

The standard Model 376 deep-tillage bottom has a 35 degree blade angle and high moldboard for low-draft and full trash coverage up to 12 in. deep.

Moldboard extensions, and cover boards are available where required for plowing at greater depths.

Dauphin COUNTY DHIA MONTHLY REPORT

DECEMBER 1977

Harold Nissley's 5-year-old Holstein, named Winnie, came close to winning all the honors last month after having finished her lactation with 23,789 pounds of milk and 918 pounds of fat. The performance gave her the undisputed top spot for milk, but it was narrowly bested in butterfat by a cow in the John Hertzler herd. His Lynne, also a 5-year old Holstein, checked in with statistics of 20,237 pounds of milk and 920 pounds of butterfat.

Q.

What herbicide combination lets you apply early and still get season-long control?

A.

Princep plus AAtrex 4L.

When your schedule calls for early application of your corn herbicides, you need a combination that doesn't lose effectiveness midway through the season. No, you need one that keeps grasses and broadleaves under control all the way to harvest. You need a Princep® plus AAtrex® 4L combination.

It's less expensive than the combination you're probably using.

And now Princep is available in liquid form, too, to go along with Liquid AAtrex 4L.

This spring get the answer to season-long weed control, even when you apply early. Princep plus AAtrex 4L.

Pennfield employees attend workshop

Holding a certificate of completion from the management workshop, Mike Horn (center) is flanked by Clint Brandon, president Agri-Business Training and Development (left) and Gerald A. Karstens, vice president, AFMA.

LANCASTER – Michael Horn and Robert Hunt of Pennfield Corporation, Lancaster, recently completed a production and plant managers workshop sponsored by the American Feed Manufacturers Association (AFMA)

Horn, 744 Glendale Rd., York, is the plant manager at the Hempfield mill. Hunt, Spring Grove R1, is a mill management trainee at the York mill. They were among 32 feedmen from across the nation attending the one-week course held in St. Charles, Ill.

AFMA is the national trade association of the feed manufacturing industry, one of the nation's 20 largest manufacturing industries.

Bargaining means of fair return to farmers

NEW YORK, N.Y. – Strong cooperatives and collective bargaining figure importantly in getting farmers a fair return on their labor and investments, Ms. Barbara Lindemann Schlei told the 22nd Annual Bargaining Conference held recently.

While a strong agricultural industry is central to the economy of the United States – agriculture contributed $12 billion toward the national balance of trade in 1976 – the American farmer today is caught in a serious price squeeze between increasing input costs, and lower returns for agricultural products.

There is no one answer to farmers' economic plight, Ms. Schlei said, but they can improve their situation through collective bargaining.

She discussed several aspects of effective bargaining, from the Capper-Volstead restriction on unduly enhancing prices, through the strengths and weaknesses of the Agricultural Fair Practices Act.

Ms. Schlei said that the need for increased bargaining power by farmers is evidenced by the imbalance in the size, numbers, and power of participants on each side of the agricultural market.

"Typically," she said, "there are considerably fewer, and larger, buyers than sellers in these markets..." Due to these disparities, "handlers can often force low, non-competitive prices and inequitable terms on producers."

Cull cow prices rising

(Continued from Page 1)

Host Acres Farm Quality Meats, Myerstown.

Hostetter, who does the majority of the buying for his business, watched this week as the prices roar continually each day until he was paying 34 cents for beef cows at the end of the week. On a 1500 lb. animal, he computes that he's paying as much as $100 more per animal now than he did six weeks ago. For a small butcher shop, that increase is quite noticeable.

The reason for the price hike goes back to supply and demand—once more, there is greater demand than supply.

Abram Diffenbach, manager of New Holland Sales Stables, theorizes that here, as well as all over the West, farmers sold complete herds of animals last Spring, because it was just not profitable to raise calves. As a result, the supply is low.

The demand, according to Diffenbach, comes from fast food markets, which must have lean meat. "And, these Holstein cows are lean," points out Diffenbach. "At Thursdays' sale we had 500 cows and we probably sold 70 to 75 per cent of them for 30 cents and up," he added. He compared that figure to the previous week in which about 60 per cent of the cows that went over the sale sold for 30 to 34 cents per pound.

Other speculation as to why the price spiraled is that inclement weather put a greater drain on the local markets which caused the price to rise, with the modern housewife utilizing modern convenience food and lower priced beef. Hamburger remains in high demand no matter what the supply.

There is also a shortage of big Holstein trimmer bulls right now.

The upward jump in prices began last Tuesday and continued through this week. Although no one can predict the outcome of the market, Diffenbach feels that the trend must come down in the next few weeks. Hostetter, on the other hand, predicts slaughter cows will go "sky high" by next Spring since Winter is the time of year to cull the herds and Spring is the time to put them to pasture.

Women urged to create consumer awareness

HOUSTON, Tex. — Farm women were urged recently to create increased consumer awareness about agriculture's importance to the national economy.

Mrs. Chester Smith, chairman of the American Farm Bureau Federation's women's committee, explained that consumers must be made aware that agriculture plays an important part in creating the structure that enables the consumer to buy goods and services produced by other segments of the economy.

This is an important task for farm women, she told about 1,000 Farm Bureau women attending a women's conference during the American Farm Bureau Federation annual meeting.

The Oklahoma resident commended the work of the Farm Bureau women throughout the country but added that the future offers an even greater challenge.

United States Representative Virginia Smith, third district of Nebraska, told the gathering that the women of Farm Bureau must continually realize the power they hold in influencing the consumer and must speak more loudly for the farmer.

Representative Smith, a former AFBF women's committee chairman, also pointed out the importance of keeping in constant contact with elected officials, particularly on issues like the proposed Consumer Protection Agency and increased governmental regulations.

AFBF President Allan Grant also addressed the Farm Bureau women's conference, stressing the importance of maintaining an aggressive effort on farm policies from all Farm Bureau members.

Cattlemen tap Reno Thomas to serve on enviroment committee

BEAVERTOWN – Reno H. Thomas of Beavertown, Pa., a member of the state House of Representatives from the 85th District (Snyder-Union) has been appointed a member of the Environmental Management Committee of the National Cattlemen's Association.

Thomas is a charter member of NCA and owns 235 head of beef cattle along with more than 2,000 Yorkshire hogs on his Brooks End Farm. He will attend the annual convention of NCA the last week in January.

Thomas is minority chairman of the House Committee on Agriculture and Rural Affairs in Harrisburg, where he has been a member of the House of Representatives since 1968. He is a graduate of Penn State School of Agriculture, where he was a member of Alpha Tau Alpha Honor Society. He achieved honorary membership in the Pennsylvania Chapter of Alpha Zeta and Gamma Sigma Delta societies for his outstanding leadership in agriculture and rural affairs. He taught in the public schools as a vocational agriculture teacher, he is a member of the Grange, a member and past director of the Pennsylvania Farmers Association.

Thomas has served as an officer of the Livestock and Allied Industries Association, of the State Council of Farm Organizations, the State Farm Show Commission, the Pennsylvania Livestock Exposition and the All-American Dairy Show and the Eastern National Livestock Show. He received the State Master Farmer Award in 1964, served for 15 years on the Beavertown School Board, and has been a leader in various civic activities in his home community, where he is an active member of the United Church of Christ.

Reno Thomas

Thomas is founder of the Brooks End Farm at Beavertown, where his son-in-law, Mark Stehr, has recently joined him as co-owner and assistant manager.

Parks and forestry departments offering outdoor jobs for students

HARRISBURG -- Applications for the 1978 summer Youth Conservation Corps (YCC) program are now available from high school guidance counselors, Bureau of Employment Security Offices, Bureau of State Parks Offices, Bureau of Forestry Offices and YMCA's.

The Summer work program is open to any youth who will be 15 years old by June 1, 1978 but will not be 19 years old before August 31, 1978.

Youth Conservation Corps work sites are located throughout the Commonwealth on federal lands administered by the U.S. Department of Agriculture and U.S. Department of the Interior and on State lands administered by the Pennsylvania Department of Environmental Resources.

Work projects are structured to provide Corpsmembers with a better understanding of their environment while earning a minimum wage. Typical projects include stream improvements, construction of bridges and other recreational facilities, thinning of forest plantations, improving wildlife habitat and similar related tasks.

Two types of YCC opportunities are available – residential programs where corpsmembers live and work in a camp setting away from home and non-residential programs where participants live at home and commute daily to their work site. Residential participants earn $65.50 per week plus room and board while non-residential participants earn $79.50 per week.

Because more applications are received than there are jobs available, participants are chosen by a random selection process. Selected applicants will be notified by May 1.

Completed applications must be received at the YCC Selection Office, P.O. Box 800, Falls Church, Va. 22046 by March 15, 1978. Incomplete applications cannot be considered.

Questions relative to the YCC should be referred to Naylor at the Bureau of State Parks, Department of Environmental Resources, Box 1467, Harrisburg, Pa. 17120.

Auctioneers to meet

HARRISBURG – The 30th annual convention of the Pennsylvania Auctioneers Association is expected to be an event featuring educational topics, good speakers, and fresh ideas from all over the state. It'll all get underway at 9 a.m. on Jan 27 and continue through all of the following day

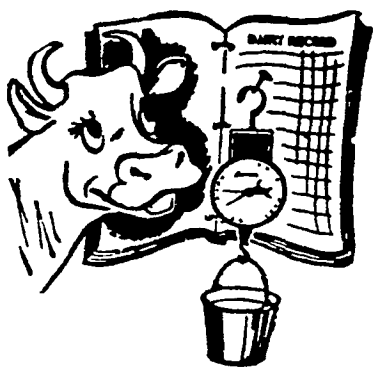
Licensed auctioneers and their wives are invited to attend the two-day programs, to be held at the Host Inn, here.

Some of the highlights of the meeting include a fun auction, and the selection of the auctioneer of the year.

Speakers include auctioneer John Freeman from Philadelphia, Michael Pakenham, associate editor of the **Philadelphia Inquirer**, and Robert Butera, Republican candidate for governor.

xxx

Early and regular prenatal care seems to be one important factor in preventing low birthweight, infant disease and infant death, reports The National Foundation-March of Dimes.



Berks COUNTY DHIA MONTHLY REPORT

DECEMBER 1977

"Gail," a 5-year old Holstein in the Ray Bicksler herd, is the top producer for lactations completed last month. She took high place for both milk and butterfat production with her credits of 32,182 pounds of milk and 1099 pounds of butterfat. Following is the summary for the month.

NOW YOU CAN HAVE:

★ Better Utilization Of Feed
★ Improved Herd Performance
★ Increased Production

A Dutchman Forage Analysis and Feeding Program can help you do it!

We can set up a program for YOUR NEEDS and supply the major and trace elements which your program may call for. We can also mix these with various sources of protein to make a complete concentrate designed for your Herd.

Would you like to

S-T-R-E-T-C-H your H-A-Y?

YOU CAN BY FEEDING

DUTCHLITE TEXTURE FEED

- Light Textured
- Very Palatable
- Tasty with Molasses
- Fortified with vitamins and minerals to make it a high quality substitute for hay

USE To stretch your hay supply.
Top Dress to get those high producing cows to eat more
A real compliment to your dry cow and heifer feeding program
Can replace 5 lbs of hay per day

PA. STATE FARM SHOW ENTRY - "PUMPKIN"

BRETT EBERLY, 15, an FFA student at ELCO High School, and son of Mr. & Mrs. Raeu Eberly, RD #1, Newmanstown, Pa., with his Registered Hereford Steer "Pumpkin" that was entered in the Light Heavy Weight competition at the Pa. State Farm Show 1978. Standing with Brett is Richard L. Weaver, Pres. of WEAVER STAR SILO, INC., Myerstown, Pa., the new owner of "Pumpkin".

STAR SILO, is glad to support the FFA who are doing such a fine job of keeping young people interested in farming. In our opinion Brett's steer was a champion even though it wasn't in first place.

Seattle Slew, undefeated winner of racing's Triple Crown, had Agway horse feed as his training ration during the critical yearling period.

"We found that Agway feed supplied the right nutrition for the job we wanted him to do," said Dr. Jim Hill, co-owner of Slew along with Mickey and Karen Taylor. "In fact, we've got all of our two-year olds on Agway feed."

Doesn't your Horse Deserve Triple Crown Treatment?

AGWAY

Agway Horse Feeds are available throughout the Northeast.

Russell Darkes, sales representative for Penn-Jersey Harvestore in Lebanon County, recently purchased this Duroc hog from 4-H'er Gary Mase during the Lebanon County 4-H Roundup.

Fertilizer better than salt for ice

UNIVERSITY PARK - When ice and snow cover the sidewalk or driveway this winter, one's first inclination will be to reach for the salt bag. This does a thorough job of turning the ice to water and solves the problem for the moment. However during late spring and early summer, one shouldn't be surprised to find dead grass and shrubs along the walkway, say experts.

There's a good chance that it won't be a fungus disease or an insect that caused the damage, but the rock salt used during the winter months. Instead of using salt this year, people should use small amounts of garden fertilizer. When the snow and ice melts, the water and fertilizer will feed the roots of the grass and shrubs instead of burning them.

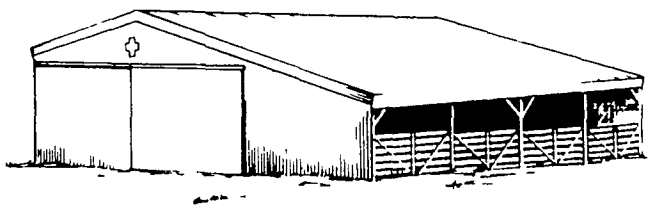
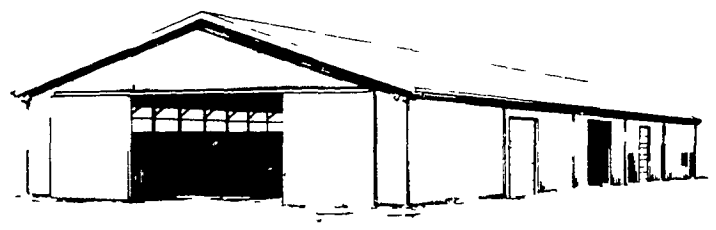
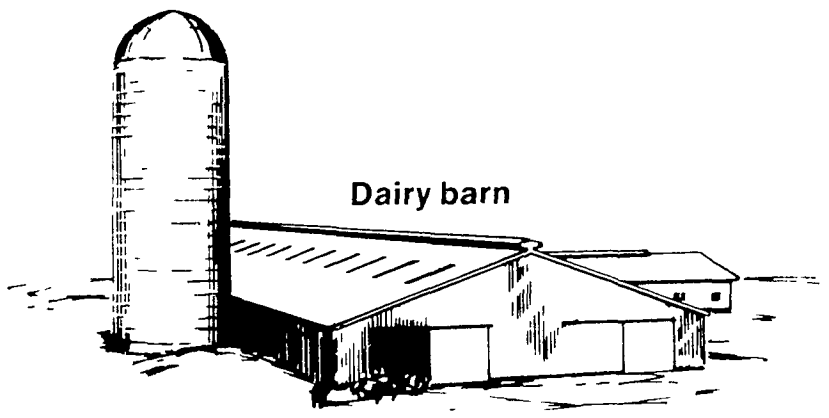
Save on building, remodeling and maintenance with quality Reynolds Aluminum



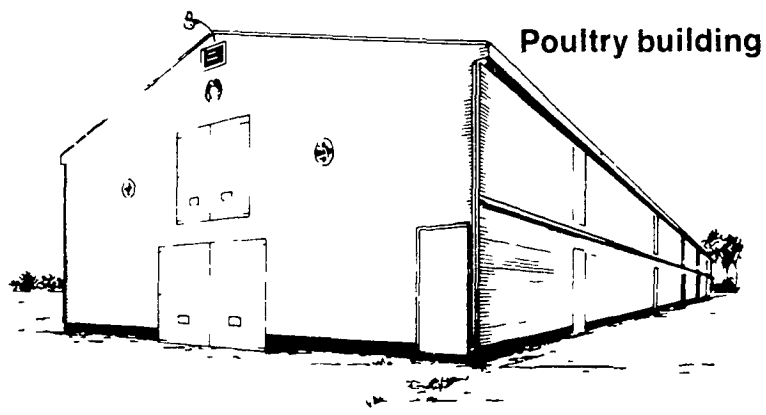
General utility building

Farm machinery storage and repair



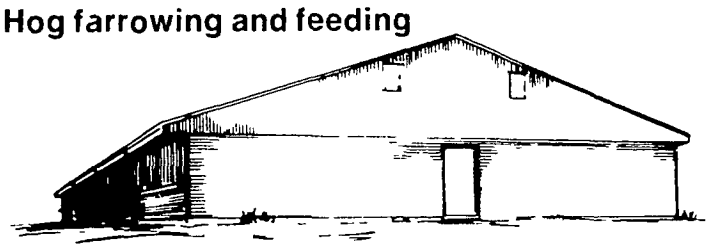


Dairy barn

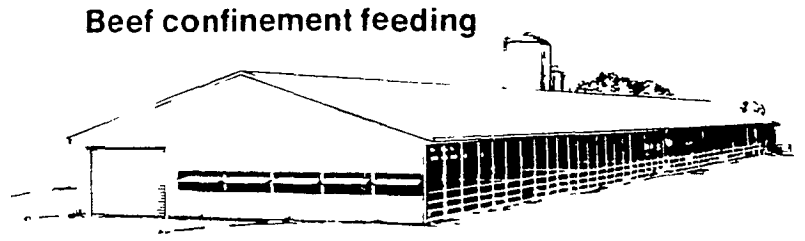


Poultry building

Hog farrowing and feeding



Beef confinement feeding



Priced to compete with steel, Reynolds corrosion-resistant alloy, developed especially for farm use, helps you save on better farm buildings. You save on construction because you use large sheets that cover more and reduce overlaps.

And since there's no red rust...ever...you save on paint maintenance down the road.

Go with unpainted Reynolds Aluminum on the roof where its heat reflectivity helps keep stock cooler in summer and warmer in winter. Then make sidewalls sparkle with any of four, farm-right Reynolds Aluminum Colorweld® finish colors: stable red, meadow gold, valley green, birch white.

REYNOLDS ALUMINUM

THINKING OF EXPANDING OR REMODELING YOUR FARM OPERATION?
Agri-Inc., located in the Village of Farmersville, Lancaster County, can design and build your system from the foundation to the roof peak.

ADA explains dairy sales

ROSEMONT, Ill. -- "Foodservice industry sales of dairy products how account for just under $1 of every $5 in the dairyman's milk check," said Robert A. Morris, foodservices director for American Dairy Association, at a recent dairy meeting. He went on to describe the industry and dairy products' future in it, as follows:

The away-from-home market is currently realizing $86.2 billion in retail sales, excluding alcoholic beverages; 45 billion meals are being served annually in 554,228 foodservice units thoughout the country; and 36 per cent of the consumer's food dollar is spent away from home.

Regarding the industry's future, its 1970 retail sales of $42.7 billion is projected by the U.S. Department of Commerce's Survey of Retailing to grow to $120.6 billion by the end of the decade. This represents an annual real growth rate from 1970 to 1977 of 3.4 per cent, as opposed to a 1 per cent growth rate for retail food.

Morris said dairies seeking to merchandise in the foodservice industry should recognize that product manufacturers don't usually reach the foodservice operator directly, but rather through specialized foodservice distributors.

He added that market research will form the base for United Dairy Industry Association's initial dairy foodservice programs and give direction to future activities in that area. The programs and activities will be backed by strong communications and publicity programs aimed at the foodservice trade, dairy industry or consumer presses.

Robert A. Morris

Paul Q. Smith

Smith named NEBA director

TURKHANNOCK – Paul Q. Smith was named the new Northeastern Breeders Association (NEBA) sales and service director, according to information from NEBA and Sire Power general manager W. Lewis Campbell.

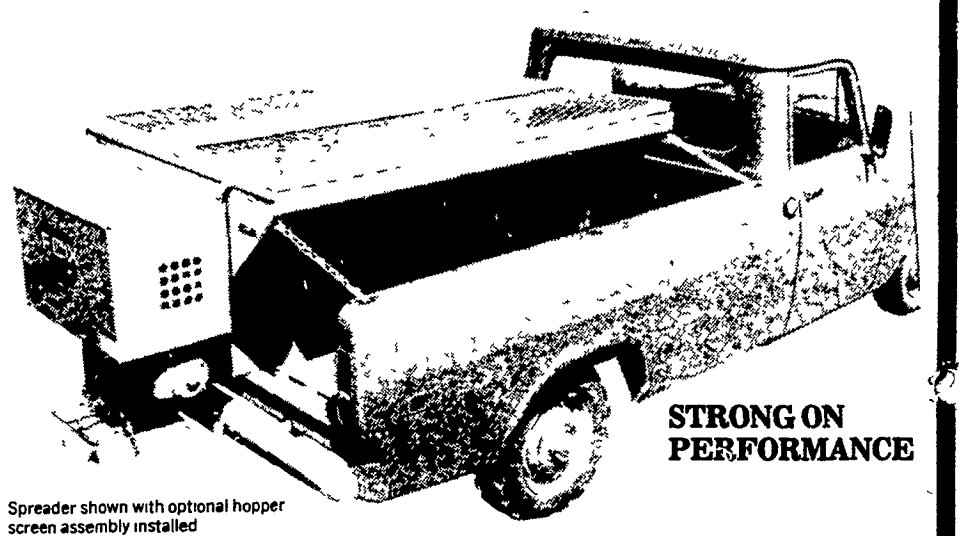
Smith replaces Nelvin Empet who left NEBA November 1 to become manager of the New York Dairy Herd Improvement Association. As NEBA's sales and service director, Smith will work with NEBA members, unit and district managers, and technicians to maintain and improve high quality technician service and sales throughout the NEBA area of eastern Pennsylvania and New Jersey.

KOEHRING Farm Division

FOX 0539-07

Material Spreader For Pick-up Trucks

NEW FOX COMPACT MODEL SPREADER
FOR MOUNTING ON SMALL TRUCKS



STRONG ON PERFORMANCE

Spreader shown with optional hopper screen assembly installed

The Fox Model 0539-07 is especially designed for mounting on pick-up, flat bed or dump trucks. Mounting, using the hold-downs at all four corners, is quick and easy. The spreader is a self-contained unit powered by a 7 H.P. air-cooled 4-cycle gasoline engine with heavy duty centrifugal clutch, electric starter alternator.

THIS COMPACT MODEL IS A MULTI-PURPOSE SPREADER PARTICULARLY SUITED FOR:

• ICE CONTROL • FERTILIZER • DUST CONTROL
• BROADCAST SEEDING • ETC.

It will spread material (sand, salt, cinders, lime, etc.) in widths from 4 to 40 feet depending on weight and kind of material.

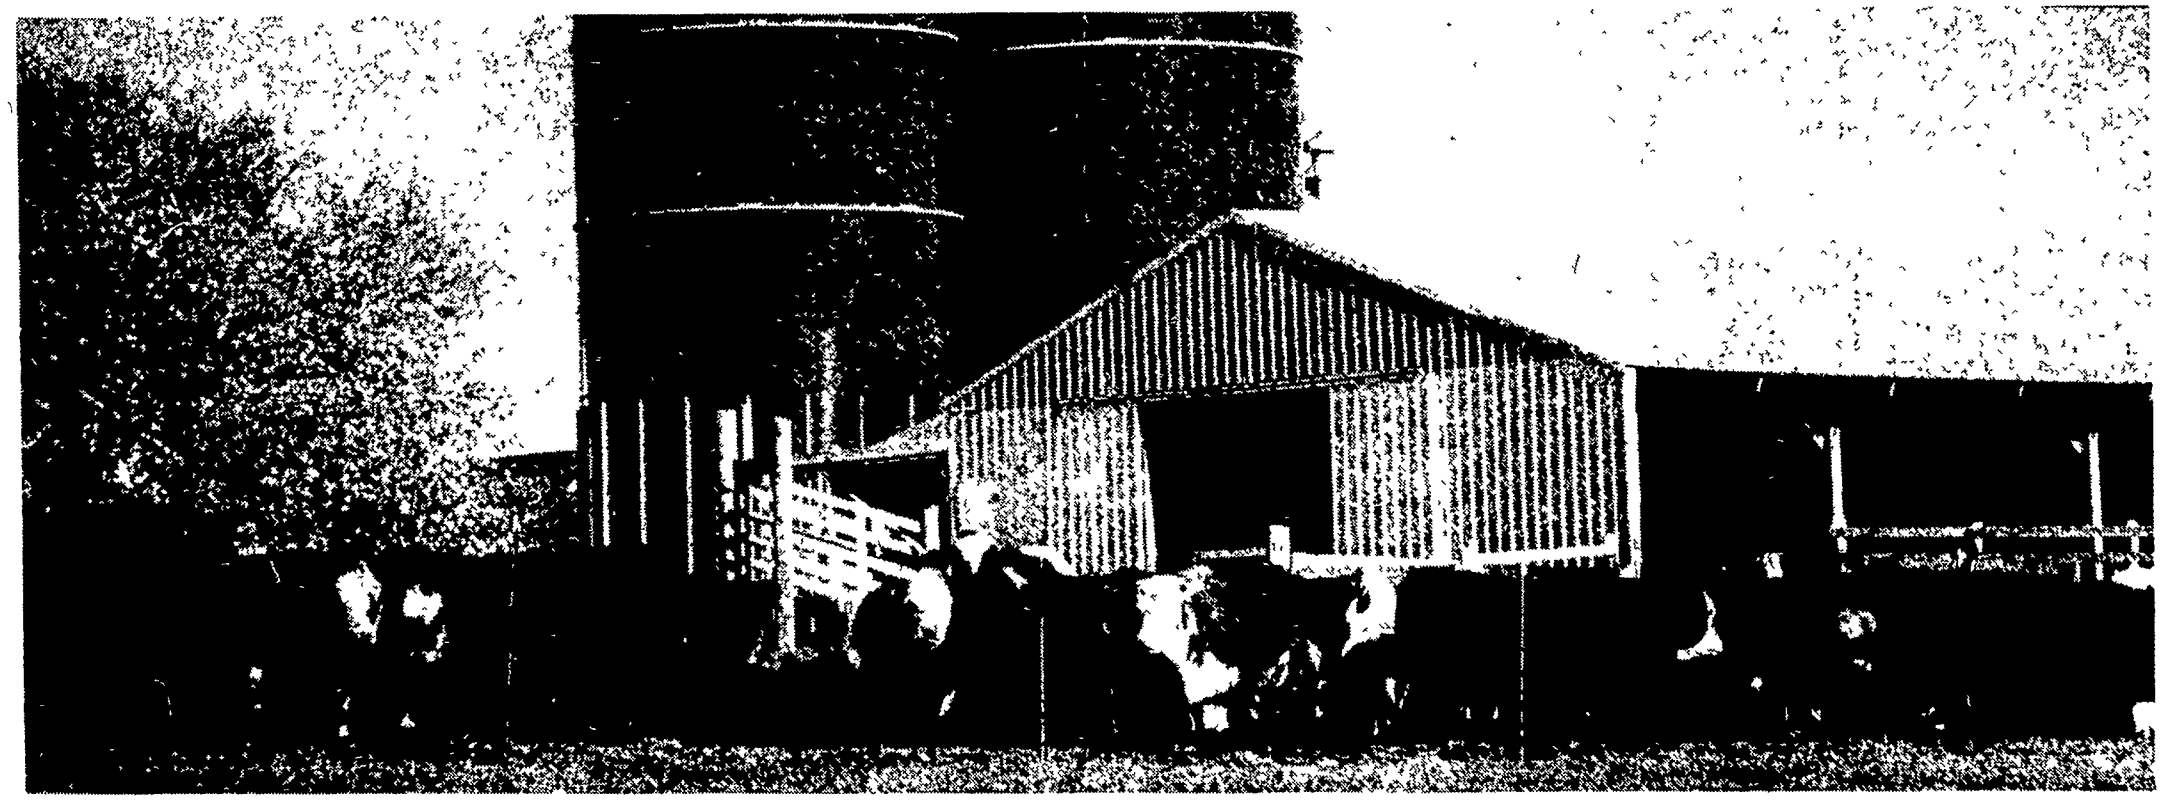
When you're up against the wall...

You're ready



Fight back

It hurts. You borrow a big wad of money to buy feeder cattle. Work like a private in boot camp. Feed up a crop that cost you a bundle to produce...and end up the year looking at red ink. If it happened, no one would blame you for washing your hands of the whole mess.

Yet, you won't. You like feeding cattle and backing down doesn't sit right with you. So although no one is completely satisfied with the return on their investment in the cattle business today, you should know that there are some cattlemen still making money. Harvestore® forage system owners feed more of what they grow, buy less store-bought protein and reduce the cost of a balanced ration.

And with a Harvestore grain structure, you go directly from the field to storage and avoid the high cost of drying, shrink and extra handling.

Want to read their stories?

See how they're making a Harvestore system pay for itself and earn them a profit in the cattle business? Write for a new, free book...You're Ready.

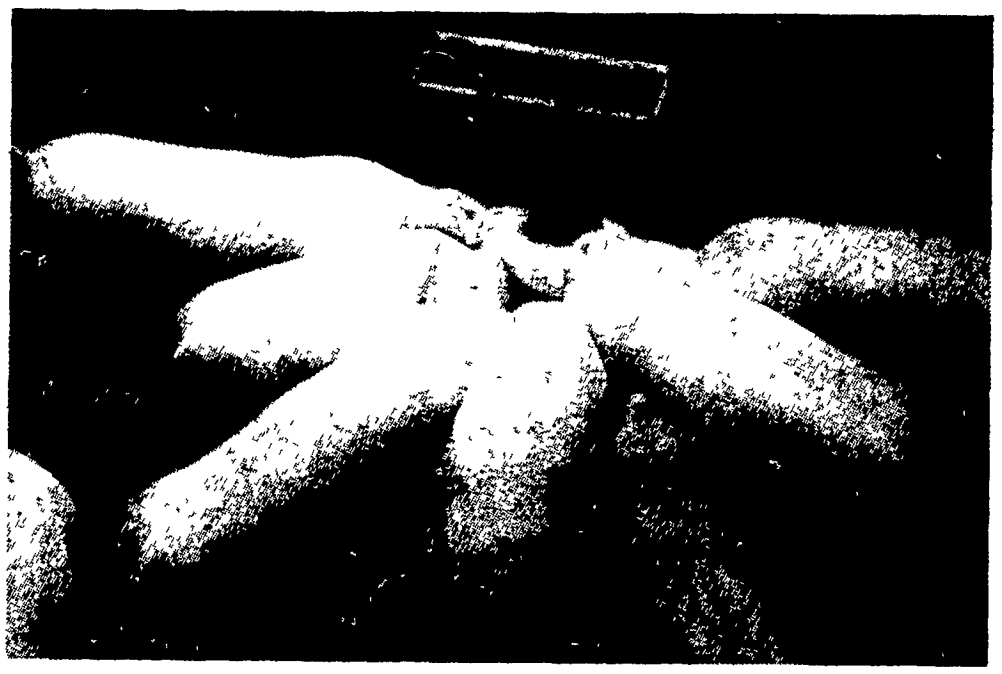
Penn-Jersey Harvestore, PO BOX 91, NEW HOLLAND, PA 17557 - Phone 717-354-4051

New Wayne Tail Curler Rockets.™

Turns bashful baby pigs into hearty eaters.

New Wayne Tail Curler Rockets is a totally new formula... a pre-starter that attracts baby pigs like bees to honey. They smell, they taste... they eat like hogs, preferring this new feed 4-to-1 over the previous Wayne formula. New flavor and aroma ingredients help make the difference.

New Tail Curler Rockets is great in nutrition, too. You get 18% crude protein with additional lysine to give top performance without the looseness problem. The extra fiber helps, too. And increased fat provides extra energy... while vitamins, anti biotics and minerals, including Boost 'N Iron™, help keep



young pigs growing right from the start.

New Tail Curler Rockets even comes in a new bag with a special liner to keep it mill fresh until the moment it's fed.

See your Wayne Feed dealer today. Turn bashful baby pigs into hearty eaters.

Amish and Mennonite artistry on display at cultural center

By SUSAN KAUFFMAN
Staff Correspondent

The Winter doldrum months of January and February in this part of our country often try the homemaker's highest spirits. After the holidays are past and Spring looks to be quite a distance away, those 60-some days seem to wilt spirits trapped by uninspiring, endless, daily routine.

An afternoon or evening excursion to a nearby museum may prove to be a remedy for sagging enthusiasm and dwindling hope. This feature writer took the suggestion from the distinctive black and yellow billboards placed along the highway and from a pamphlet to visit the recently opened complex called the People's Place. The People's Place opened in June 1976, in Intercourse to serve as the Lancaster County center for Amish and Mennonite arts and crafts.

Directors of the project, Merle and Phyllis Good, known in the area as producers of the Summer Dutch Family Festival held at the Guernsey pavillion, Route 30 East of Lancaster, stated in a news release their purpose for developing this unique center:

"We wanted to develop a year-round center for Amish and Mennonite arts and crafts. Enough of our people are beginning to express themselves creatively that such a dream is now possible. And, of course, we've had a long tradition of good crafts. We want to provide a spot where our people, our neighbors, and visitors to the area can look at what some of our craftsmen and artists are saying–and see what we can learn about ourselves."

The center offers a variety of displays to catch the eye, ear, and mind. Perfectly hand-crafted, pieced, and appliqued quilts, unique three-dimensional carved paintings and films depicting the life style of these conservative people comprise the bulk of the year-round exhibits.

The Amish Story Museum is located on the second floor of the cultural center, situated in a restored turn-of-the-century home on Main Street, Intercourse.

In the Amich Story Museum hang 30 three-dimensional carved paintings, which together tell the story of being Amish. The paintings are the creations of a local Beachy Amish artist, Aaron Zook.

After hearing an audio introduction while viewing the first painting depicting the clearing of the land, the visitor walks up the polished oak stairs to find himself in the Four Seasons Room. Therein are displayed four large paintings capturing the changing countryside and the Amish at work in all but the Winter scene which shows young people skating on a frozen stream.

The Four Seasons Room sets the atmosphere for what is to come in the tour. The next section of the display answers the viewer's question as to how these unique paintings are created. Four separate hangings explain the basic steps Zook follows to create these three-dimensional paintings. Many of the paintings are three feet high, five feet wide, and several inches deep. They are constructed from cut or carved pine, nails, glue and acrylic paints.

The 30 paintings picture many events of the Amish community life and history such as barn-raisings, weddings, funerals, and disembarking on the American shore.

Most afternoons Zook is at work in his studio where he is just a railing away from inquisitive visitors.

The final room of the Amish Story Museum, through its five paintings, special lighting and recorded narration, asks the visitor to consider whether these people are really "backward." Are faith, service, and a sense of belonging found in the strong community life, backward ideals?

The People's Place complex also includes a screening room, or small auditorium, newly built onto the stately, one-time doctor's residence and office which now houses the museum. Showing continuously in the screening room is a film, "The Amish: A People of Preservation." Featured on CBS-TV's "Sixty Minutes", the documentary portrays the Old Order philosophy and way of life. Twenty-seven minutes long, the film depicts the roles of the children, the family, the community and the church in this lifestyle.

Beginning March 26 a second film, "Hazel's People", will be available at two evening showings each day. Known to many by the title, "Where the Grass Was Green", "Hazel's People" was produced in Lancaster County by the same people who operate the People's Place. The movie starred Geraldine Page, Pat Hingle, and Graham Beckel. It is the story of a young man's first encounter in Mennonite country. He comes to attend his friend's funeral and is caught up in the confrontation of modern man and a simpler way of life.

The Book and Craft Shoppe at the People's Place contains historical books about the Mennonite, Amish and Hutterite people as well as cookbooks, quilting books, song books and many crafts by these people for sale.

During the warm months, the center also opens a Courtyard Gallery featuring special exhibits by Mennonites, Amish, and Hutterite artists and photographers. The Hutterites, according to Joanne Ranck, manager of the People's Place, are a communal group who developed during the 1500's in Germany and Switzerland and now live on large tracts of land owned by the group. Presently they are primarily centered in North and South Dakota and several Canadian provinces. They maintain a conservative dress but use modern agricultural technology.

People's Place manager, Joanne Ranck, explained that the center is developing a year-round educational program which includes a number of cultural and instructional events.

The Winter Cultural Series includes four guest speakers. Speech, music, oil painting and history are topics for this series which continues through March.

In addition to the Winter Cultural Series, the center is sponsoring the First Annual Writer's Conference this weekend. Featured are workshops and lectures by accomplished authors and educators on fictional, inspirational, and dramatic writing. Topics to be discussed by the guest speakers range from "How My Faith Relates to My Writing," to "How I View My Work As a Writer," to "How to Sell What You Write."

Manager Joanne Ranck noted that the People's Place has an associate program whereby one may become eligible for free or reduced admission for various events held there. Associates also receive newsletters listing upcoming events, new titles in the book shop and invitations to special features scheduled exclusively for associate members.

One final note which points to the excellent programs continuing at this center in its first two years' existence is the fact that college credit for Summer work experience at the People's Place is available from both Eastern

(Turn to Page 43)

Quilts in various patterns adorn the People's Place.

Beachy Amish artist Aaron Zook works on a unique three-dimensional painting in his studio at the People's Place. The piece he is working on is done with carved wood painted with acrylic paints and depicts a horse sale.

The People's Place from the outside shows a log cabin pattern quilt hanging across the two windows of the near wall. A former doctor's residence, the brick top floor is the Amish Story museum.

Homestead Notes

People's Place

(Continued from Page 42)

Mennonite and Goshen and Messiah College. Credit may be received in art, English, communications, sociology, business, Bible or Home economics.

The People's Place provides guided tours and meeting room facilities for groups by reservation. The manager advises local people to come before and after the Summer tourist influx. The center is open daily from 9:30 a.m. to 4:30 p.m. except Sunday. The phone number for this unique art center located along Route 340 in the village of Intercourse is 717-768-7171.

The People's Place, Lancaster County's center for Amish and Mennonite Arts and Crafts, offers neighbors, and tourists, as well, visual and auditory stimuli all year long—the "doldrum" months included.

Ida's Notebook

Ida Risser

One day our meadow is covered with muddy water from the Conestoga flowing rapidly over it. Then the next day it is back in its banks and chunks of ice are moving slowly downstream. What a difference a day makes in many things.

Ever since I broke my foot at Thanksgiving time, it has made a difference for me as I've really been slowed down considerably. It makes me feel as though I belong to another generation. The youngsters make trips to the basement and to the attic for me and I try to think before I take unnecessary trips. Before I go shopping, I telephone and then only go where I can park near to a store.

The Farm Show, with the large area it covers, was out for me this year. I must be satisfied to sit at home and struggle to mend overalls on the sewing machine. It takes a certain skill to get a patch positioned below the knee.

It will be a real improvement in medical science when they do away with heavy plaster casts — maybe they could use aluminum.

xxxxxxx

Recently I heard a proverb which went something like this, "Flowers leave a fragrance on the hands of him who bestows them."

This got me to thinking of the ways in which we can spread joy. Sometimes we have an old letter which no longer means much to us but given to a certain person would allow them to relive memories.

A snapshot, of years gone-by, mailed to a particular family just might brighten their day. Sharing baked goods and abundance from our gardens will also leave us with a warm sense of appreciation.

Often a phone call to someone who sits in a lonely house or even a lonely room will brighten their day. And as the proverb says, some of the joy might rub off on us.

Kendy's Kollumn

by Kendace Borry

Why is it that those nasty horses can always tell the difference from when I'm calling them to come and eat to when I'm calling them to ride?

If I just walk out to the barn with the intention of feeding them, they can be at the furthest point of the 20 acre pasture, but before I'm safely inside the feedroom, they're well on their way to thundering into the barn And if I'm the least bit slow, they let me know that in no uncertain terms they want their feed and they want it now!

But, if I walk out to the barn with the intention of going riding, those same crazy beasts ignore me. I can call them until I'm blue in the face, bang on the feed chest, and rattle the bucket, but they're blind and deaf to my endeavors. If they move at all, it's further out in the pasture

As a result, I usually end up going for a little hike before I have my ride With halter and leadrope firmly in hand, I trudge out through the creek and up the hills to where the horses are watching and waiting

Finally, when I'm about 10 feet away from them they make their move Suddenly, it's stampede time, as they gallop past me and head in towards the barn If you chase them they just run the faster. The smartest move is to wait until they're showing off, and just stand there watching them.

Usually, if they're not chased, the game loses interest for them and they allow themselves to be caught in the barnyard. However, there are occasions when I have traipsed back and fourth over the pasture from end to end no less than five times before the horses decide enough running is enough.

Those are some of the times I wonder why I like horses.

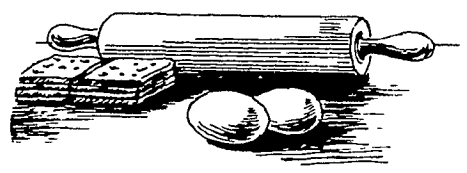
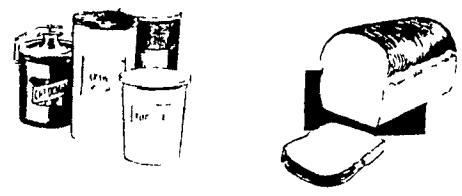
Home on The Range





Until our new recipe themes come up in February, we are clearing out our 1977 files and preparing to house the recipes for 1978. So, this week "Home on the Range" is featuring hearty, filling dishes such as hamburger pie, upside-down ham loaf, tomato stars, and hearty bologna spread.

If you would like to contribute to February's themes, check the recipe calendar printed in this section of **Lancaster Farming** and send any recipes you have to "Home on the Range," **Lancaster Farming** newspaper, Box 266, Lititz, Pa. 17543. We are really going to need help for the February recipes, since only one contributor has written us thus far.

For each group of recipes you send in, **Lancaster Farming** sends you a small gift in return. Because of this, don't forget to include your name, address, and phone number on each page of recipes you send.

HEARTY BOLOGNA SPREAD

1½ pounds regular bologna, ground (about 4½ cups)
¾ cup pickle relish
3 tablespoons minced onion
1 tablespoon Worchestershire sauce
1½ cups salad dressing
12 slices processed American cheese
Lettuce leaves

Combine first five ingredients. Mix well. Spread mixture on bun using about ⅓ cup each. Top with cheese slices and then lettuce leaf. Makes 4½ cups sandwich spread or fills 12 buns.

Mrs. Wilmer Z. Martin
East Earl, Pa.

xxx

TOMALE PIE

1 large chopped onion
1½ pounds ground beef
1 can tomato soup
1 teaspoon salt
1 teaspoon pepper
3 teaspoons chili powder
⅔ cup chopped green pepper
1 (12-ounce) can whole kernel corn

Brown onion and meat. Add remaining ingredients. Pour into greased casserole, cover, and cook 30 minutes at 350 degrees F. Spread with corn bread batter and continue to bake 25 to 30 minutes **uncovered.** Makes six servings.

Corn Bread Batter

½ cup flour
1 teaspoon salt
1 teaspoon baking powder
½ teaspoon baking soda
¾ cup corn meal
1 cup milk
1 egg, beaten
2 tablespoons salad oil

Sift together flour, salt, baking powder and baking soda. Add corn meal and mix well. Add milk and egg. Blend, and add salad oil. Mix thoroughly and spread on tomale pie mixture in casserole.

xxx

HAMBURGER PIE

1 pound hamburger
1½ teaspoon salt
¼ teaspoon pepper
1 teaspoon Worcestershire sauce
1 teaspoon mustard
1 (No. 2) can tomatoes, drained
1 (eight ounce) can tomato sauce
2 tablespoons onions, minced
1 cup Mozzarella cheese, grated
2 tablespoons parsley, chopped
¼ teaspoon oregano

Combine meat, salt, pepper, Worcestershire sauce and mustard. Press against bottom and sides of nine-inch pie plate. Spread tomatoes and sauce over meat; sprinkle with remaining ingredients. Bake at 375 degrees F. for 20 minutes. Yields four to six servings.

xxx

UPSIDE—DOWN HAM LOAF HOME STYLE (A Popular Old-Fashioned Plantation Dish)

2 cups ground ham
1½ pounds fresh pork
2 eggs, slightly beaten
2 tablespoons onion
2 tablespoons parsley
2 tablespoons green pepper
2 tablespoons chives
1 cup milk
salt, pepper, thyme, mace and nutmeg to taste
¾ cup brown sugar
1 teaspoon dry mustard
¼ cup cider vinegar
6 slices fresh or canned pineapple
Red currant jelly
6 to 8 slices bacon
pickles, olives and radish roses

Combine two cups of ground ham, 1½ pounds of ground fresh pork and two slightly beaten eggs, also two tablespoons each of onion, parsley, green pepper and chives, thyme, mace and nutmeg and mix well. Grease a large bread pan generously and pour in ¾ cup of brown sugar, which has been mixed with one

HONEY BROOK MOLASSES

• BAKING MOLASSES • TABLE SYRUP
• BLACKSTRAP MOLASSES
• CLIP & SAVE FOR YOUR RECIPE FILES:

PUMPKIN PIE

1¾ c. pumpkin (Mashed)
1¾ c. milk
3 eggs
⅔ c. brown sugar
2 tbsp. Honey Brook Baking Molasses
1¼ tsp. cinnamon
¼ tsp. ginger
¼ tsp. nutmeg
¼ tsp. cloves
¼ tsp. allspice
½ tsp. salt
1 tbsp. cornstarch

Blend sugar, spices, cornstarch, salt, beat eggs with milk and add molasses. Combine with dry ingredients and pumpkin. Mix until smooth. Pour into 1-9" pie shell and bake 15 min. at 425°. Reduce heat to 350° and bake 40 min. or until pie is set.

(Continued from Page 45)

teaspoon of dry mustard and ¼ cup of cider vinegar. Over this sugar mixture, press six slices of fresh or canned pineapple and fill center of each pineapple slice with a spoonful of red currant jelly. Pack down the meat mixture over this, place six to eight slices of bacon over the top, and bake in a moderate oven (350 to 375 degrees F.) for one to 1½ hours, covering the bacon with a greased paper if browning too fast. Lift off the bacon, invert the pan over a long, hot platter; drain off all the bacon before lifting the pan. Garnish with the bacon, some pickles, olives and radish roses, and serve with a green salad. The loaf is so moist that it needs no gravy.

Above two recipes by:
Mrs. James L. Coombs
Gardners, Pa.

xxx

HAM CHEESE STRATA

8 slices day old white bread crusts, trimmed
1 (8 oz.) pack sharp cheese slices
1 cup chopped cooked ham
4 eggs, beaten
2 cups milk
½ teaspoon salt
¼ teaspoon dry mustard
Dash pepper

Arrange four slices bread in bottom of greased eight-inch square pan. Cover with four cheese slices, ham, and remaining slices of cheese and bread. Combine eggs, milk, and seasonings. Pour over mixture. Let stand one hour. Bake at 325 degrees F. for one hour until lightly browned and puffy. Let stand a few minutes, and cut into squares. Makes four to six servings.

Harriet Greenawalt
Lancaster, Pa.

xxx

TOMATO STARS

6 large tomatoes
2 cups diced chicken
1½ cups cooked rice
⅓ cup chopped celery
1 tablespoon chopped fresh parsley
¼ cup salad oil
2 tablespoons vinegar
Garlic to taste
¼ teaspoon dry mustard
¼ teaspoon paprika
½ teaspoon salt

With stem ends down, cut tomatoes into 6 wedges – cutting to, but not through – bases. Spread wedges apart slightly. Carefully scoop out pulp. Dice and drain pulp. Chill tomato shells. Combine diced tomato, chicken, rice, celery and parsley.

Blend together remaining ingredients. Toss with chicken mixture. Chill. Spoon chicken salad into the tomato shells immediately before serving. Place on lettuce bed. Makes six servings.

xxx

HAM LOAF

1½ pounds fresh pork
1½ pounds smoked ham
1 cup pineapple juice
6 soda crackers
no seasoning

Bake in loaf in slow oven for 1½ hours.

Mrs. James Coombs
Gardners, Pa.

xxx

MUSTARD DRESSING

2 eggs
¼ cup sugar
½ cup vinegar
½ tablespoon mustard
½ tablespoon butter

Cook like boiled salad dressing. Serve with baked or boiled ham.

Mrs. James Coombs
Garnders, Pa.

xxx

MACARONI AND TUNA SALAD

2 cups marcaroni
½ cup French dressing
½ cup diced celery
1 tablespoon lemon juice
1 cup flaked cooked, or canned tuna fish
1 cup mayonnaise

Cook the macaroni first. Rinse with cold water. Drain well. Add the rest of the ingredients Mix thoroughly. Serve garnished with salad greens. Serves four to six.

xxx

VEGETABLE SALAD

3 cups macaroni
½ cup French dressing
1 pimiento, cut in strips
½ cup diced pickle
1 cup diced celery
10 finely minced olives
4 hardcooked chopped eggs
1 cup mayonnaise
2 raw tomatoes, sliced

Cook macaroni first. Rinse with cold water. Drain well. Add all the other ingredients except the tomatoes. Mix thoroughly. Serve garnished with tomatoes and salad greens. Serves four to six.

Mertztown, Pa.

Cattle meeting slated

LANCASTER — Beef producers in Lancaster County and neighboring areas will have the opportunity to hear and see some of the latest developments in their industry when the Penn State Extension Service puts on its annual Cattle Feeders' Day. The day-long event will be held at the Lancaster Farm and Home Center this coming Tuesday, beginning at 9 a.m.

The program will feature presentations on research findings in cattle feeding, outlook situations, and panel discussions. Agribusinesses will have displays on hand for inspection.

An estimated 300 cattle feeders are expected to attend.

Junior Cooking Edition

With the weather acting up like it did this week, one of the best things to do when you're stranded at home with no school is to go sledding. But, after an afternoon o so, that activity does ge. old and tiring, so why not .ome into the warm kitchen and try out some new recipes? Both you and your family will be glad you did!

This week "Junior Cooking Edition" is featuring five new ideas to try out for fun. If you like a nice, hearty breakfast, try the oatmeal pancakes; if it's hot, delicious cookies you like with cold milk, try the ginger snaps; and if you're a little bit lazy, try the lazy woman's cake and see what you come up with.

The other two recipes we are featuring this week are stuffed dates and sandwich spread.

Happy cooking!

SANDWICH SPREAD

18 peppers
4 large onions
1 cup granulated sugar
1 cup prepared mustard
4 teaspoons salt
1 cup butter
1 cup vinegar
4 tablespoons flour

Mix ingredients, boil for 20 minutes. Then place in container and seal.

Naomi Stoltzfus
Age 14
Madisonburg, Pa.

xxx

STUFFED DATES

2 cups seeded dates
½ cup almonds, pecans, or walnuts
10-x sugar

Chop nuts until fine. Stuff each date with nuts. Roll in sugar, then eat.

Joyce Weaver
Age 9
Ephrata, Pa.

xxx

LAZY WOMAN'S CAKE

2 cups granulated sugar
3 cups flour
1 teaspoon salt
5 tablespoons cocoa
2 heaping teaspoons baking soda
1 cup cooking oil
1 tablespoon vanilla
2 tablespoons vinegar
2 cups cold water

Sift dry ingredients into a large loaf pan. Make three holes in the dry ingredients. Put oil in one, vanilla in second, and vinegar in third. Then pour water over everything and stir with fork until well mixed. Bake at 350 degrees F. for 30 minutes or until done. Do not grease pan. Test cake for doneness with toothpick.

Becky Stoltzfus
Age 10
Dundee, N.Y.

xxx

OATMEAL PANCAKES

1½ cups rolled oats
2 cups buttermilk
½ cup flour
1 tablespoon baking soda
1 tablespoon granulated sugar
1 teaspoon salt
2 beaten eggs
1 tablespoon salad oil

Mix rolled oats and buttermilk. Beat in flour. Add other ingredients, mix well, and fry.

Arlene Z. Burkholder
Age 7
Ephrata, Pa.

xxx

GINGER SNAPS

¾ cup shortening
1 cup granulated sugar
¼ cup molasses
1 egg
2 teaspoons baking soda
2 cups sifted flour
½ teaspoon cloves
½ teaspoon ginger
1 teaspoon cinnamon
½ teaspoon salt

Melt shortening over low heat. Let cool, add sugar, salt, and egg. Beat well - sift in dry ingredients. Chill, roll in balls. Bake at 375 degrees F. until done.

On being a farm wife

—*And other hazards*

By JOYCE BUPP

Is there a doubt in anyone's mind that winter's icy thrust is here to stay for a while? The telltale evidence is in: frozen water pipes, unconscious tractor and truck batteries, lines of soggy mittens crisscrossing the basement, and puddles of dirty melting slush polka-dotting every floor in the house.

But Winter can be fun! It hands us a smorgasboard of recreational opportunities, free for bundling up and stepping out the door. One of our favorites is sledding.

As youngsters, my brothers and I spent hours zooming down the steep hill of a neighbor's pasture. Locally dubbed "Ironstone Hill," the area's most famous fixtures were huge round boulders jutting up through the sod. What a challenge to pilot a flying sled down the slippery course, zipping around those grey rocks and jumping the one that jutted out slightly in the path. Approaching the bottom of the hill, you leaned your weight and steered sharply to the right; and if lucky, a kid could maneuver across the dry bed of a storm gully and navigate a scenic stretch along the small, never-frozen creek. Mothers frowned upon a final ending in the creek, however; and if you went home wet, your excuse had better be a good one.

Since I never outgrew my love for sledding, mothering two outdoors-lovers has given me the perfect chance to hang on to my coaster. Last week, Grandpa's long dirt road hill was solidly packed and icy slick, untouched by a failing PennDot budget. So we gathered, family members and cousins appearing from assorted directions for a white-world roller coaster ride. Even as you belly-flopped onto the old wooden sled, it was already picking up speed. Between the house and barn we flew, cold winds turning cheeks apple-red and toes numb-cold.

"Get outta' the way!" yelled our five-year-old, riding second story atop his Grandpa's back, and racing past me as I ground to a halt in the loose snow to escape the impending collision. I'm losing my touch when I get out-raced by my own flesh and blood.

If you have a hankering to really make a fool out of yourself, no sled is better to try than those curled up sheets of hard plastic. Steering is impossible, and going down backward or sideways is expected as part of the challenge. Let me warn you: it's not uncommon to land at the bottom of the hill, upside down in a drift, or maybe a fence, with refreshing cool snow sifting down your thermal underwear.

Enjoy it! Remember those days last Summer when it was 95° in the shade????

Farm Women Societies

Berks Co. Society 4

Berks County Farm Women Society 4 met on January 3 at the home of Mrs. Verna Taylor, New Berlinville. The 11 members and two guests present reviewed the consitution and bylaws of the organization. Delegates were assigned to attend the State Farm Women's convention held January 9 and 10.

A short Christmas play entitled, "The Spirit of Giving at Christmas" was presented by a member's children.

The next meeting of the group will be held on February 7 at the home of Mrs. Barbara Campbell.

Berks Co. Society 9

The metric system was the topic of the January meeting of Berks County Farm Women Society 9. That meeting was held in the home of Mrs. Grace Spohn, Amityville, with nine members in attendance.

The group's December meeting, a Christmas party, was held on December 16 at the Gilbertsville Fire Company. The entertainment was a family style meal, a gift exchange, and musical entertainment.

Plans are now being made for the bake sale to be held in February. During that same month, the meeting will be held in the home of Mrs. Jean Frye of Gilbertsville with a speaker from the Council on Chemical Abuse.

Dauphin Co. Society 1

The Dauphin County Farm Women Society 1 held its monthly meeting on January 10 at the home of Ruth Espenshade. Co-hostess for the evening was Della Parmer. Thirteen members attended.

The business meeting was conducted by Kathy Moffatt, president. It was noted that the 1978 Dauphin County convention will be held at the Host Inn on October 14. Group I will compile the group reports.

There has been a change of date on the February 14 meeting. It will now be held on February 7.

The January meeting centered on safety with Linda Rooney, 1972 Miss Hope, as guest speaker. Miss Rooney was sponsored by the American Cancer Society. Miss Rooney's presentation was Breast Self Examination. Each member was taught the proper way to examine the breasts. A film was shown followed by a question and answer period.

The next meeting of the Dauphin County Society of Farm Women Group I will be held on February 7 at 7:30 p.m. at the home of Mary Kopp.

Lancaster Co. Society 21

Lancaster County Society 21 held its first meeting for the new year at the home of Mrs. Lois Aument, Quarryville R1, on January 12. The co-hostesses for the evening were Mrs. Kitty Ambler and Mrs. Alice Ressel.

President Joan Rohrer led the business meeting with four guests and 19 members present.

Five members represented the Society at the state convention. Those members were Joan Rohrer, Virginia Rineer, Ann Brown, Joanne Roth, and Labertha Tindall.

Miss Solanco Pam Saner entertained the group with a vocal selection. She was accompanied on the piano by Lori Wagner.

The evening's program centered on quilts with Carol Huber as speaker.

The next meeting of the group will be on February 9 at the one of Esther Graybeal.

Lancaster Co. Society 29

On January 16 Farm Women Society 29 held its monthly meeting at Stauffer's of Kissel Hill. Twelve members plus four guests attended a class on flower arranging taught by two Stauffer employees. Two types of dry flower arrangements were deomonstrated after which time everyone worked by himself with some private instruction.

A business meeting was conducted by president Marty Bixler following the completion of the craft.

Program chairperson Doris Shenk stated that next month's meeting would be held February 20 at the home of Judy Erb with the program to be announced.

Under new business, the cost of the yearbooks was granted and a sheet was passed around to sign-up for Wyeth Lab luncheon which the group will serve February 1.

Lancaster Co. Society 30

Mrs. Sharon Cook instructed the members of Lancaster County Farm Women Society 30 in the art of toll painting at the groups January meeting, which was held in the home of Mrs. Larry Martin, East Earl R1. Mrs. Cook owns her own shop in Strasburg.

The next meeting will be held on February 20 at 7:30 p.m. at the home of Janet Zeiset, New Holland R1. Each member should bring an item to be sold at the annual auction.

Farm Women Societies

(Continued from Page 51)

Lebanon Co. Society 5

Officers were chosen at the January meeting of Lebanon County Farm Women Society 5 held at the home of Esther Hutter, 1122 Jay Street, Lebanon.

The officers for 1978 are: Minerva Lentz, president; Marion Maulfair, vice president; Esther Hutter, secretary; Anna Mae Bollinger, treasurer; and Alverta Boeshore, recording secretary.

Highlights of the meeting included convention reports and a film of Vera Fahnestock's South American trip.

Eighteen members and three guests were present.

The next meeting will entail entertaining husbands at the Ono Fire Hall with a dinner. Special Music will be by the Seventh Heaven Barbershop Quartet.

York Co. Society 1

York County Society 1 met at the home of Carolyn Rishel on January 4 with 12 members and three visitors present.

A poem "Resume of Activities on the Past Year" was written and read by Evelyn Dallmeyer.

Eleanor Grover, from the Red Lion Garden Club, entertained by reading poems. She also showed a painted scene and made a floral arrangement to portray each poem.

The next meeting will be on February 1 and will be held at the home of Alverta O'Neal.

York Co. Society 22

Mrs Edward Brothers, Manchester R2, was hostess of the most recent meeting of York County Farm Women Society 7. Ten members were present.

Reports were given by the delegates who attended the state convention in Harrisburg, Pa.

Refreshments were served after the meeting. Games were played as part of the program.

The next meeting will be February 14 at the home of Mrs. Charles Brothers, York R22.

York Co. Society 26

The January meeting of York County Farm Women Society 26 was held at the home of Mrs. Richard Beard, York Haven R1. The theme was "The New Year" and the meeting began with a luncheon served to 16 members and two guests who attended.

Guests included the York County president Mrs. Harold Sechrist.

The business meeting was chaired by the new president Mrs. William Hake.

Members attending the state Farm Women Convention held in Harrisburg were Mrs. William Hake, Mrs. Richard Beard, Mrs. Richard Kibler, Mrs. Athena Beshore, and Mrs. Doris Beshore.

The delegates gave reports of the meeting.

The February meeting will be held at the home of Mrs. Calvin Wilt, York Haven R1 at 12:30 p.m. The Winter and Spring activities will be planned at that time.

White's new 180 hp 2-180 turns fact into performance.

The new 2-180 Field Boss® puts our worthy competitor's words into a somewhat different light when you analyze what is being said. You'll find catch phrases like "Biggest, toughest, most powerful, more horses, more iron and more pulling power" scattered about in our competitor's literature. But just what do these words mean when compared to the facts on the new 2-180 from White®?

The new 2-180 outweighs all 180 to 190 hp tractors in the industry by 1,000 to 3,800 pounds The White 2-180 comes off the truck at a very comfortable 16,000 pounds... base shipping weight.

The 2-180's power is provided by a big 636 cubic inch Cat* V-8 diesel engine.. a non-turbocharged engine that reaches its maximum torque with ease. The Cat V-8 is teamed with our 3x6 Over/Under Transmission that allows you to utilize three powershift speeds in each of six gears to maintain the desired torque and ground speed combinations.

The 2-180's rugged 1300-pound cast front frame maintains rigid alignment of engine and transmission... shielding the entire drivetrain from shock and stress. And for a big 180 hp tractor it's comforting to know there was no design compromise in this important area.

The 2-180 also features a fully charged hydraulic system. A powerful 31 gpm pump insures positive lubrication of transmission, PTO and final drives... in addition to providing a full head of oil to the closed center system.

Huge inboard planetary final drives deliver power safely and surely to the drive wheels. Gears are induction hardened to exact tolerances... a tooth at a time.. making them incredibly tough and durable.

Now add helical transmission gears, double 13-inch plate clutch, power self-adjusting 19¾-inch brakes, induction hardened 3 7/8-inch rear axles, hydraulically engaged PTO, and White's exclusive 3-channel Accra-Tach tachometer... and you'll begin to see the picture coming together. We don't need to use words like "bigger" or "better" to describe the new 2-180. The facts speak for themselves.

Lancaster Home Economist

ABOUT WINDOWS AND ENERGY

As we seek to save costly energy in our homes we should manage our windows o save energy. During sunny days windows admit solar heat. But during nights valuable heat may be lost because glass does not hold heat as well as insulated walls. Therefore, windows need to be treated to make the most of the sun's heat with as little loss of the house's heat as possible.

Of first importance is a tight-fitting window. Maintenance to make the window fit may mean new caulking and weather-stripping. One estimate is as high as a 50 per cent reduction in heat loss from the window by making windows tight. Caulking and weather stripping are not difficult processes and instructions are available.

Storm windows are also important in cutting down heat loss. If it is not possible to install permanent storm windows, clear plastic attached tightly to the frames provides a very good air layer to insulate the window When plastic cannot be put outside the house, it can be put on the inside of the window with very effective results.

The most important energy-saving element of window decoration is the lined drapery. When closed, the drapery fabric and the lining trap a layer of air which acts as insulation. Research found linings improve the insulating value of unlined draperies by 30 per cent.

However, you need not replace your present unlined draperies to save energy. Separate linings are available through the major catalog houses. These linings are hooked over the drapery pins to hang inside the existing draperies. These separate linings provide a way to convert unlined draperies to energy savers rather than replacing the draperies.

From the research available now, it can be concluded that drapery linings are important energy savers because they trap a layer of air at the window. However, no evidence indicates one lining saves more energy than another. You have the option of adding lining to existing unlined draperies or using lined draperies of your choice of face fabric, style and type of lining. They need not be limited to those linings advertised as energy-saving or thermal.

BEEF STEW A DELICIOUS MEAL-IN-A-POT

Beef stew is one of the best meals for serving convenience, and it is also economical. It contains meat and vegetables, all in one serving.

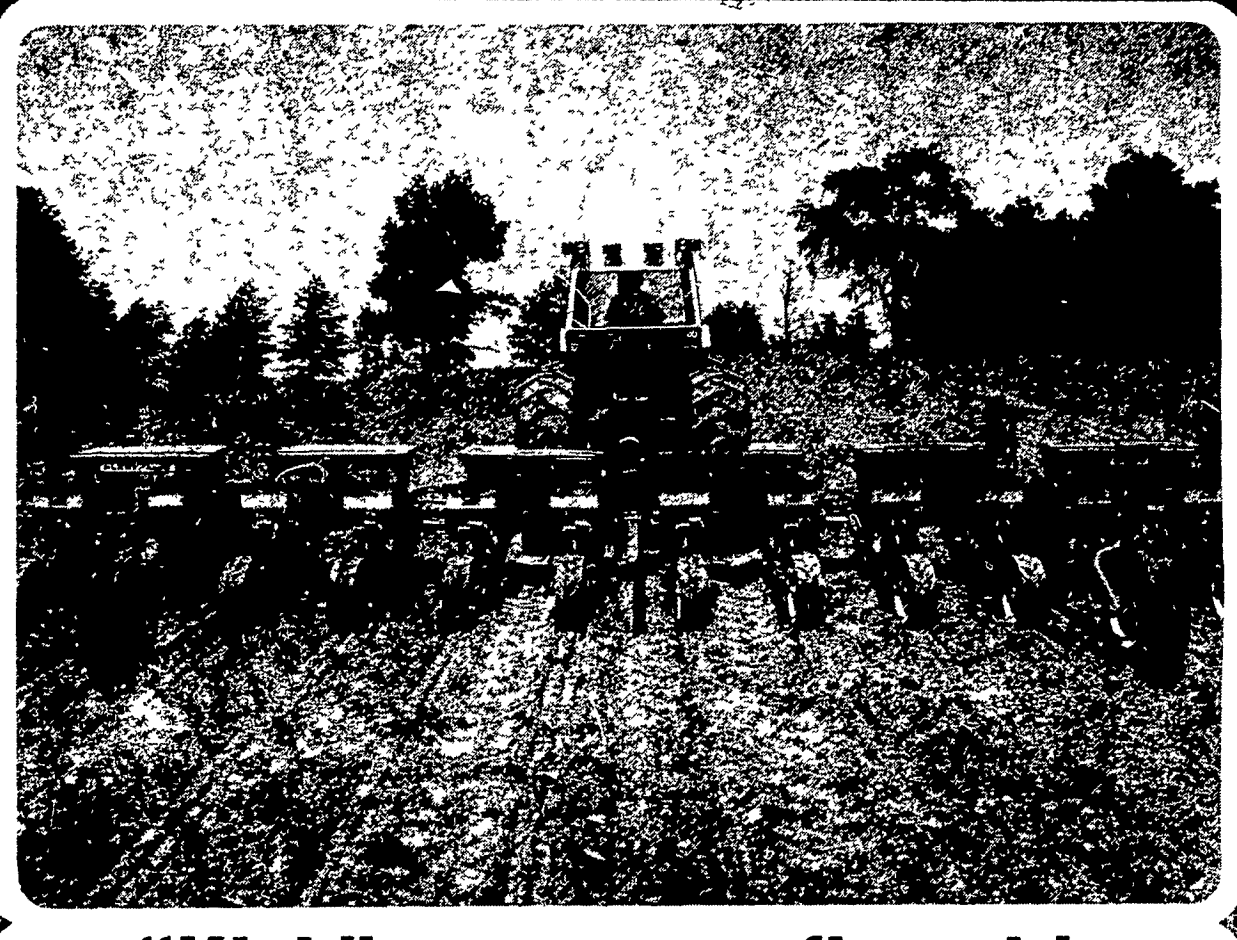
To make beef stew for six, you'll need:

⅓ cup unsifted flour
1½ teaspoons salt
1/8 teaspoon pepper
1½ lbs. boneless stew beef, cut into 1" cubes
2 tablespoons fat or oil
3¼ cups water
3 medium onions, sliced
4 medium potatoes, cut into 1" cubes
5 medium carrots, quartered
1½ cups fresh or frozen peas

Combine flour, salt, and pepper and coat meat with mixture. Brown meat thoroughly in moderately hot fat in large fry pan or deep pot. Sprinkle remaining flour mixture over browned meat; stir. Add water and cover tightly. Simmer 2 to 3 hours, or until meat is tender. Add onions, potatoes and carrots. Simmer, covered, 15 minutes. Add peas and simmer again until vegetables are tender. Stir occasionally.

Here are some additional tips; When browning meat cubes, don't crowd the pan. If the pan is small, brown only a part at a time. Also, don't let the mixture boil, as this can cause undesirable changes in the meat texture. You can omit browning the meat if desired. Thicken with a flour past made with cold water after vegetables are tender.

This is a basic recipe for beef stew, but it can be varied according to your tastes. You might want to try other vegetables like lima beans, celery, and green peppers in the mix. Another variation is to include two bay leaves and six cloves while cooking. Just remember to remove them before serving.



"Kick" up corn profits with Unipel® Starter Special 13-34-10.

This is the "corn-popper" special...the most imitated pop-up fertilizer on the market As part of a Unipel corn fertility program, it suits perfectly the young corn plant's immediate craving for nutrients to develop a good root system, the starting point for top yields.

Yet, it's also a complete fertilizer with these key nutrients available in each Unipel pellet:

* quick-acting, non-volatile nitrate Nitrogen that starts working immediately, even in cool, wet, early-season soils;
* slow-acting ammonic Nitrogen that provides continued feeding through the growing season;
* both quick and slow acting Phosphorus to resist fixation, team with Nitrogen to become more efficient and feed plants for solid growth, help develop strong root systems,
* vital Potash to furnish young plants with building blocks for strong roots, tough and hardy stalks to resist weather and stress of pests and disease

We can recommend to you the program details for a sound Unipel fertility program —which, on Starter alone, has returned over $30 an acre above fertilizer investment more than blend "bargain" programs

No-till farmers share their field experiences

COCKEYSVILLE, Md. – No one can tell the corn planting story like the man who puts the seed into the ground. Program planners for the Fourth Annual No-Tillage Convention put together a panel of two top corn growers and a custom chemical operator to share their no-till knowledge with the more than 800 mid-Atlantic area growers and agri-business representatives meeting at the Hunt Valley Inn, here.

John Smith, York County Extension agent, moderated the panel which featured Ralph H. McGregor, David L. Sparks and Kenneth M. Mathias.

Ralph McGregor is an East Berlin dairyman who's been going the no-till route for several years. Most of his York County acreage consists of shallow, red, Penn-type soils, which tend to lay wet and heavy. Although McGregor admits to having questioned no-till for his type soil when the method was still relatively new, he now feels that its benefits count even more in his heavy soils than in the sandy types where no-tillage originated.

A cover crop of sod or rye helps the York Countian retain moisture on soils which often dry up fast, an advantage he feels may double yields in really dry years. In order to plant as much acreage in rye in the fall as possible, McGregor is now considering seeding by air. He does some no-tilling of rye with a drill, but will work up the ground when he feels it has been compacted too greatly during harvests or has a rough surface with noticeable ruts. McGregor works at getting a level planting bed, an assurance of more uniform seed placement depths.

The number one item on McGregor's corn planting checklist is liming. He advocates frequent smaller applications of lime, rather than one massive application every three or four years for best no-tillage results. Deeply committed to the practice of 30-inch row spacing, the dairyman feels that there is no other width to plant no-till to obtain the best shade against potential weed problems, and to harness the best results from chemical usage. Spraying is done either before or after the seed is in the ground, with planting beginning at about the first week of May. He strongly feels that watching the weather at corn planting time is even more important than during haymaking season.

David Sparks, Upperco, Md., farms as a partner in Sparks and Hare Farms, Inc., an operation farming 1400 acres in central Baltimore County, with 900 cropped in corn. Sparks began optimum tilling in 1965 and switched to no-till two years later. He figures that no-tillage not only gets his crops in the ground much faster, but conserves valuable moisture through the rye cover crop and reduces soil erosion.

Sparks has changed from 20-inch to 30-inch rows for easier follow-up spraying. With a philosophy that a poor stand of corn leads to a good stand of weeds, Sparks also favors the 30-inch spacing for shading out undesirable plants. Because the practice of continuous corn tends to harden up the ground and encourage insect buildup, a chisel plow loosens that ground in the fall, followed immediately by a spinner truck seeding the rye cover.

Seed placement depth averages in the one inch to one and one-half inch range, with the Maryland grain farmer aiming at mid-April for the first plantings. Fields get sprayed about a week after planting date. Lime is applied to most fields every third year.

Planting corn behind soybeans gives Sparks his most highly productive no-till crop. Yields are excellent and the fields generally remain cleaner of weeds. One weed pest that has been causing Sparks some difficulties is red root, for which he feels researchers may need to develop a new chemical to obtain adequate control. Army worm infestations have been checked by applying toxaphine; and furadan is applied for stalk borer problems.

Completing the panel was Kenneth Mathias, vice-president and general manager of Willard Chemical Co., Inc., Frederick, Md. Mathias' firm is one of the largest custom applicators of liquid fertilizers and pesticides in the East.

Mathias emphasized that the most important component of a liquid fertilizer and spray program is the man running the equipment. Second key factor, he believes, is proper equipment for the job and maintaining it at top operational levels.

Soil tests are another favorite tool for matching Mathias' customers' nutrient needs to high yields. He recommends applying a pop-up fertilizer to help young corn plants off to a fast start ahead of weed competitors.

Mixing new combinations of spray materials experimentally in a glass jar is one simple management step that may save every grower considerable problems later on, Mathias insists. Some chemicals may curdle or lump together if added to other materials in an improper mixing sequence, plugging up nozzles. Agitation in the sprayer is also crucial in assuring an even blend of materials over the field.

As a custom spray operator, Mathias feels that sprays are best added after the corn seed is in the ground. Pre-planting spray applications may quickly become ineffective in pest control if bad weather delays the planting, resulting in poor control. Fall panicum is the one weed he sees as currently causing the most problems.

"In order to no-till properly, you've got to be a little smarter than the average grower," summed up moderator John Smith. There's no chemical substitute for good management."

U.S. negotiating for world wheat pact

WASHINGTON, D.C. – The International Wheat Council at a two-day meeting which ended Wednesday in London decided to proceed with negotiations for an agreement to replace the 1971 International Wheat Agreement which expires June 30.

Assistant Secretary of Agriculture Dale Hathaway was informed of the decision by the U.S. delegation to the London meeting, which reported that the negotiating conference will be held Feb. 13 to March 23 in Geneva.

The 1971 agreement includes two conventions--one on wheat trade and the other on food aid. The Wheat Trade Convention has no economic provisions but provides a framework for consultations and market information. At a regular meeting of the International Wheat Council last June, the United States called for renewed efforts leading to possible negotiation of a new agreement. At a subsequent meeting of the Council's Preparatory Group on Sept. 29, the United States offered a proposal for the framework of a new agreement on wheat trade and food aid.

In its proposals, the United States has stressed the following objectives: (1) to contribute to the security of world food supplies, (2) to moderate extreme price fluctuations, (3) to promote the expansion of international trade, (4) to assure adequate food aid to developing countries and (5) to encourage more international cooperation on all aspects of wheat trade.

Dr. Hathaway said the basic working document for the upcoming negotiations contains two versions of a possible new Trade Convention, as well as a draft for a new Food Aid Convention This week's Council decision recognized that the version which incorporates fully the elements proposed by the United States last September, is viewed by most delegations as the version which should be the basis for negotiations on wheat.

Regarding coarse grains, which some countries feel also should be the subject of a new international arrangement, the Council decided that this aspect had not been discussed in sufficient detail in the Preparatory Group Since different participants are involved, the Council recommended that, for those parties interested, coarse grains should be negotiated in a separate subgroup. On this aspect, Assistant Secretary Hathaway emphasized that the proceedings on wheat and food aid are to be separate from those dealing with coarse grains. He said in his view, it is essential that the discussions on grains other than wheat must not interfere with the conclusion of otherwise workable arrangements concerning wheat and food aid, nor with the objective of having a new agreement on those aspects ready in time to replace the 1971 International Wheat Agreement.

Dr. Hathaway said that the United States had agreed to enter discussions on coarse grains only after taking into account the views of certain importing counties and in order to avoid a delay in progress toward a new agreement on wheat. Dr. Hathaway further emphasized that any conclusion that might be reached on coarse grains would have to provide for greater access to supplies and markets through reduction of trade barriers.

Government can't guarantee profits

HOUSTON, Tex. – Farmers have a constitutional right to strike and to focus public attention on their problems but it should not be the role of the federal government to guarantee farmers a profit, Secretary of Agriculture Bob Bergland told delegates to the American Farm Bureau Federation convention meeting here last week.

"While the nation, in its own self-interest has a responsibility to keep agriculture productive and strong," the secretary said, "the nation does not have the responsibility of assuming all the risks of farming and to guarantee full parity of income.

"However much we wish full parity prices, most farmers and farm organizations realize that full parity by government fiat would be a mistake," Secretary Bergland declared. "It would mean a government-established marketing system that would be an administrative and bureaucratic monstrosity.

"Farmers would lose all semblance of independence and be deprived of all decision-making," he added.

He also pointed out that such a government farm program guaranteeing full parity would drive already high farmland prices to "astronomical heights."

The secretary stated that his Administration has placed unprecedented emphasis on developing and expanding farm export markets and he unequivocally declared that there would be no more embargoes or sales moritoriums on farm commodities unless we face a genuine national emergency.

Secretary Bergland said that he opposes a highly-protectionist trade policy because it would be severely damaging to out overall economy – especially to American agriculture.

Robert Bergland

The Secretary pointed to the emphasis being placed on expanding the USDA-cooperator program of foreign market development and the current negotiations to reach multi-lateral trade agreements that "will facilitiate the flow of international trade at a decent price."

"They are not price-rigging or market-sharing agreements," he said.

The secretary also pointed out that "this Administration has more than doubled the amount of CCC export sales financing for the current fiscal year, to $1.7 billion."

Regarding USDA consumer policies and regulations, the secretary said.

"One of the facts of life we have to contend with is that regulations are now a permanent and unavoidable part of our life. We don't have to like them–and few of us do."

He said "It is our right and our responsibility to protest over-regulation and unnecessary regulations but I do not believe we need to poison the well to make the water pure.

"The fact remains that people demand that our environment and our lives must be protected," he said. "At the same time, the regulatory agencies and the public must realize that we must have food and fiber. A liveable balance must be found in our pluralistic society, that should be possible," he said.

Upcoming meeting will give latest on corn and soybeans

JEFFERSONVILLE -- The latest in corn and soybean management will be unveiled here Feb. 7-8 during the Southeastern Pennsylvania Corn-Soybean Growers Clinic and Trade Show. It will be held at the Westover Inn and Golf Club, West Main Street, Norristown. Signs will be posted to direct motorists to the two-day programs.

Sponsored by the Cooperative Extension Services of seven southeastern Pennsylvania counties, the clinic and trade show will bring together experts from both the Extension and agribusiness sectors. Forty-four commercial exhibitors will have displays. Visitors will also have the opportunity to have their moisture meters tested by a representative of the Bureau of Weights and Measures, Pa. Dept. of Agriculture.

In order to pre-register for the programs, which includes a buffet lunch on both days, interested persons are asked to contact the Bucks County Extension Service prior to Jan. 31. Their address is Neshaminy Manor Center, Doylestown, Pa. 18901. A check of $7 should be sent for one day's activities, and $14 if both day's activities will be attended. Registration at the door will be slightly more costly.

The full program will include panel discussions on marketing, aflatoxin, U.S. government programs, corn storage and drying, grain grading, commerical applications of chemicals, weed identification, and double cropping.

Pennsylvania Farmers Union to hold annual convention Monday

HARRISBURG – Farmers from across the state will gather in Harrisburg Jan. 23-24 for the 6th Annual Convention of the Pennsylvania Farmers Union. The two-day meeting will open Monday morning at the Penn Harris Motor Inn.

Kent Shelhamer, Pennsylvania Secretary of Agriculture, will be the opening speaker on Monday morning. Afternoon speakers include Victor Ray of the National Farmers Union Field Office and Orville Carver, state director, Pennsylvania Green Thumb

Tony T. Dechant, national president of the Farmers Union, will address the delegates at the Monday evening banquet. Dechant is also president of the International Federation of Agricultural Producers, a global farm organization representing producers from over 40 countries around the world

The Tuesday breakfast meeting will host State Senator Patrick Stapleton and State Representative Paul Yahner, Chairmen of the Senate and House Agriculture Committees, respectively.

Karl L. Kaufman, state executive director, Agricultural Stabilization and Conservation Service (ASCS) of the U.S. Department of Agriculture, will address the meeting for Tuesday noon.

"As we gather to consider policy and actions which will be our priority list for the coming year, our members will be making some difficult decisions about the current economic situation facing agriculture and particularly the family farmer's chances for a prosperous future," said Albert Mellinger, Farmers Union board chairman "We want to welcome all members from Pennsylvania to join their delegates at the convention"

McGovern predicts Congress will attempt to quiet farm revolt

SAN FRANCISCO, Calif., - - Senator George McGovern (D-SD) last week assessed the 1977 Farm Bill as still a "very questionable quantity" by farmers, and said that ample evidence of farmer skepticism could be seen in the growing strength of the American Agriculture movement.

"Though its leadership is fragmented and its goals are not clearly defined, it is evident to me that we are not far from the Farm Holidays of 1932," said McGovern. "My own assessment is that there will be a serious exercise in the Congress in this election year in an attempt to quiet the revolt."

Speaking at the 49th annual meeting of the National Council of Farmer Cooperatives, McGovern also told cooperative leaders that Agriculture Secretary Bob Bergland should have their gratitude for permitting cooperatives to become eligible for loans on grain commodities held by their members.

"Though you must still win in the courts," said McGovern, " this decision will have substantial impact eventually on the ability you seek to enter the international grain markets."

Outlining legislation anticipated for 1978, McGovern said he expected Congress to adopt reform and expanded legislation in agricultural credit, extend the Commodity Futures Trading Commission authorization, make a serious effort to adopt an expanded Federal Crop Insurance program, and pass legislation to expand CCC credit authority so that it can compete effectively with international competitors in expanding international commodity markets.

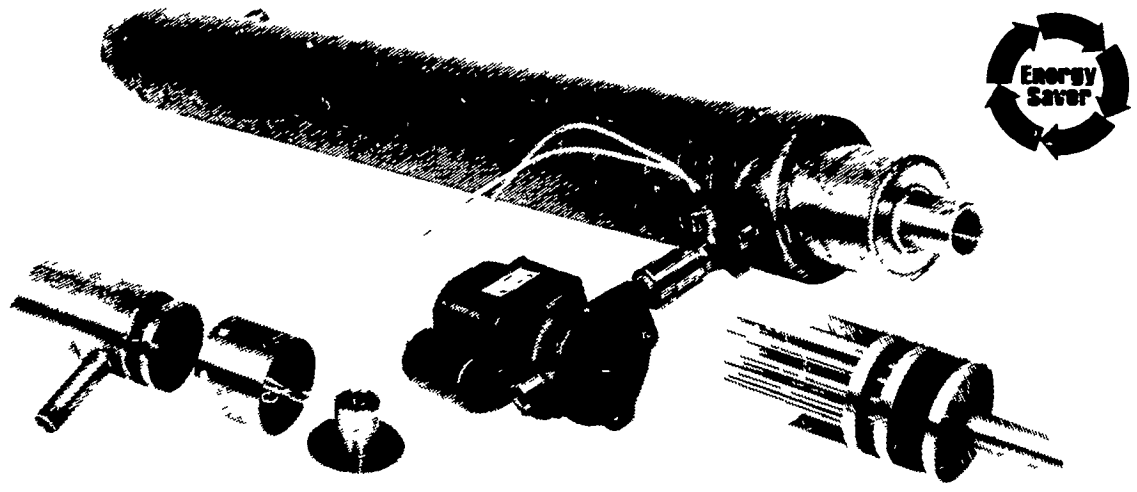
Turning to trade matters, McGovern said the U.S. must continue to be aggressive and develop new markets to absorb our expanding agricultural production. However, he cautioned his listeners about the growing feeling of protectionism in Congress and throughout the land, and noted that we shouldn't jeopardize growing export markets for agricultural products through injudicious judgements in other areas of our economy.

Senator McGovern assured the cooperative leaders of his interest in an amendment to the Internal Revenue Code which would permit cooperatives to use the 10 per cent investment tax credit. He noted the amendment could be part of a tax reform message from the President this year, and pledged his support for it.

AGWAY

NOW use wasted energy to cut water heating bills as much as 30%

Top Line Heat Reclaimer uses otherwise wasted heat from your compressor to pre-heat wash water at no cost and saves you money every day in the year!



When gas is compressed for use in your bulk tank cooler, it gives off heat. Until now, this valuable by-product has been wasted. But not any more.

Water from your regular source is run through a stainless steel jacket. The jacket is heated by hot gases generated by your compressor. So your milkhouse wash water is pre-heated... at no cost. It then goes to a holding tank and from there to your heater. The result: up to 30% reduction in the costs of heating milkhouse wash water.

Works with any bulk tank... any compressor.

The heat reclaimer is fast and easy to install. It fits into any cooling system... including yours. A single inlet unit sells for **$399.50** (installation and storage tank extra). Double inlet units are also available.

For details, check with Agway. Then get yourself a Top Line Heat Reclaimer and start saving energy... and money.

AFBF honors former ag secretary

HOUSTON, Tex. – The American Farm Bureau Federation on Tuesday presented its Distinguished Service Award to Ezra Taft Benson, Secretary of Agriculture in the Eisenhower Administration and president of the Council of Twelve of the Church of Jesus Christ of Latter Day Saints.

The Distinguished Service Award is the highest award presented by the AFBF for outstanding contributions to American agriculture.

Benson has remained a vigorous advocate of free-market agriculture throughout his long career. During his eight years as secretary of agriculture, he was a leader in developing new foreign markets for U.S. agricultural products. During that time, he worked closely with the American Farm Bureau Federation to establish the highly successful Food for Peace program.

During World War II, Benson was one of four agricultural advisors to the president, and at the end of the war he was appointed by his church to direct massive relief programs in Europe for war victims.

As the American representative at numerous international meetings, Benson has continued to be an outspoken advocate of the competitive enterprise system as the only way to supply the world's population with essential food and fiber.

Benson maintains an active interest in farm and ranch operations today as chairman of the board of the church-owned Deseret Farms and Ranches, Inc.

Benson was born in Whitney, Idaho, in 1899 His great-grandfather wa one of the early pioneers who crossed the plains with Brigham Young to settle in the Great Salt Lake Valley.

An honor graduate of Brigham Young University, Benson served as an extension agent in Idaho, then was appointed head of the University of Idaho Agricultural Economics, Marketing, and Extension Service. He helped to organize the Idaho Cooperative Council in 1939 and was appointed Executive Secretary of the National Council of Farmer Cooperatives.

He holds 11 honorary degrees and numerous awards from business, civil and governmental groups. Benson is a member of the National Advisory Board of the Boy Scouts of America and recipient of the highest awards in scouting.

Dairy specialist named

NEWARK, Del. – Dr. George F. W. Haenlein, a dairy scientist now serving as acting chairperson of the University of Delaware's department of animal science and agricultural biochemistry, has been appointed to serve as the new state Extension dairy specialist, effective January 1, 1978. According to Dr. Samuel M. Gwinn, director of the Delaware Cooperative Extension Service, Haenlein replaces Dr. Wilbur Hesseltine, who has retired.

George Haenlein

Haenlein is no stranger to Delaware dairymen, having worked with many of them while pursuing his various dairy research projects at the University over the past 20 years He also belongs to many of the same professional associations, including the Holstein-Friesian Association of America, the National Mastitis Council, the American Forage and Grasslands Council, the Council of Agricultural Science and Technology, The American Dairy Science Association, the American Society of Animal Science and the American Guernsey Cattle Club.

4-H TV show planned

UNIVERSITY PARK – An appealing show which is both entertaining and educational will soon go on several area TV stations to help young Americans and others appreciate and understand why what they eat is important to their health and well being

Called "Mulligan Stew", the show is in six parts and aimed at the nine to 12 year old group However, the information is presented in such an entertaining fashion that it can have value and appeal to all age groups

It will appear on WHYY, Channel 12, January 31, February 7, 14, 21, 28 and March 7 at 10 30 a m.

This 4-H TV production is part of a special nutrition program in cooperation with the United States Department of Agriculture and the Cooperative Extension Service of Penn State

Mulligan Stew learning materials are available from county Extension offices or by writing to 4-H TV, 119 Agricultural Administration Building University Park, Pa 16802

David McElhaney, left, and Eric Peoples had the grand and reserve grand champion Shorthorn bull, respectively, at the 62nd annual Pennsylvania Farm Show.

Shorthorn champions named

HARRISBURG – Western Pennsylvania is where all the Shorthorn beef cattle are, if a perusal of the Farm Show exhibitors list is any indication of the breed's distribution. Specifically, only Greene, Beaver, and Lawrence counties were represented at the Farm Show's Shorthorn contests. Breaking it down even further, seven families competed for the ribbons.

Woodside Farm, of Waynesburg, showing "Woodside Carol Rose 2nd", captured the grand and junior championships in Shorthorn female classes at the 62nd Farm Show. In addition, three other Woodside Farm entries won championships: "Woodside Miss Statesman" was the show's reserve grand champion; "Woodside Carol Rose" was the reserve junior champion; and "Woodside Carol Rose 2nd" was the calf champion.

Joan Peoples, volant, exhibited the reserve calf champion, "Mapleview Star 1C."

The grand champion in Shorthorn bull classes was "Packard Thomas West" exhibited by David McElhaney, of Hookstown. The animal also was the junior champion. McElhaney also showed the calf champion, "Waukaru Foresight."

Reserve grand champion and senior champion was "Olers Model King" owned by Mapleview Ranch.

Mapleview Ranch showed the reserve junior champion, "Mapleview Silver Apache" and reserve senior champion, "Mapleview Pennsylvania."

Beverly Short, of New Brighton, exhibited the reserve junior champion, "Waterbatems Lil Sid."

Tax cut likely this year

SAN FRANCISCO, Calif. – Speaking to members of the National Council of Farmer Cooperatives meeting here last week, Congressman Joe D. Waggonner (D-La), member of the House Ways and Means Committee, said that Congress will likely pass a tax reduction bill this year. He noted that a large tax cut is needed to offset the sizable tax increases in the social security and energy bills.

The Louisianan added that the bulk of the tax cut should go to middle-income people who bear the brunt of the tax burden. "Also", he declared, "it is essential that the tax cut contain sizable incentives for business investment."

Waggonner discussed farmers' concern with the 1976 tax provision requiring a carryover of basis on inherited property. This provision requires an heir to calculate his capital gain using the original cost of the property to the decedent.

"This carryover of basis provision is proving to be very complex," he said, "and several of us are working to postpone its effective date." Waggonner said he hoped Congress could pass some much-needed changes to make the provision more workable. One of the changes now supported by the Treasury, he noted, would exempt the first $175,000 of property from the carryover provision.

Waggonner brought a rousing response from the cooperative leaders with his closing statement that Congress will not adopt any changes which will adversely affect the tax treatment of farmer cooperatives.

DEKALB Hybrids

Challenged The Year And Won

XL-64a

XL-64a...It's a hybrid that has it all. Big yields. Strong stalks Short, strong shanks Heavy, quality grain. Handles high populations DEKALB XL-64a is a standard of comparison Plant it or running-mate XL-64

XL-72b

XL-72b...It's the short giant This extremely healthy single cross produces beautiful, quality ears loaded with heavy grain. Built-in resistances help it ripen mature ears on healthy, green stalks. Strong plants

XL-78

DEKALB XL-78...It stands and yields. This rugged hybrid offers strong stalks with excellent standability and long ears that kick out top yields Excellent foliar disease resistance. Big ears with exceptional grain finish

Meat import restraints agreed upon

WASHINGTON, D.C. – Secretary of Agriculture Bob Bergland says that the U.S. Government has reached basic agreement with the governments of major meat exporting countries on arrangements to govern U S import trade in meat, mainly beef, during 1978

He said all that remains is for the agreements, in which suppliers agree to hold exports to the United States below designated levels, to be formalizef by the participating countries.

Canada is expected to participate in a separate arrangement covering U.S.-Canadian two-way trade in beef similar to that of 1977.

The system of arrangements with supplying countries will assure that total imports into the United States in 1978 of meat subject to the Meat Import Law will not exceed the trigger level for quota imposition under the law.

Public Law 88-482 enacted in August 1964 provides that if yearly imports of certain meats – primarily beef – are estimated to equal or exceed 110 per cent of an adjusted base quantity, quotas are to be imposed on their import. The adjusted base quantity for 1978 is 1,183.9 million pounds, and the quota triggering level is 1,302.3 million pounds. The base for 1977 was 1,165.4 million pounds and the trigger level was 1,281.9 million pounds. The Secretary said 1978 imports would exceed the trigger level were it not for the expected arrangements with the supplying countries.

The Secretary said that import prospects will be reviewed quarterly. The next estimate of 1978 imports of meat subject to the Meat Import Law will be made in March and announced on or before April 1.

DER elects PFU's Fairbanks to work on advisory committee

HARRISBURG -- Ted Fairbanks of the Pennsylvania Farmers Union was elected chairman of the Agriculture Advisory Committee to the Department of Environmental Resources at the group's January meeting.

Fairbanks succeeded Chester Heim, Pennsylvania Farmers Association, in the officer rotation established when the Committee was formed.

The Agriculture Advisory Committee expects to receive in early Spring the draft of a publication on farmland application of septage being developed by its Sewage Sludge Work Group.

The publication would restate and expand on DER regulations on application of sewage sludge and would be available for farmers as well as DER permittees.

The Committee's Erosion and Sedimentation Control Work Group recommended that the Department develop and publish an erosion and sedimentation control manual for agriculture which would contain a directory of conservation practices which could be used for erosion control and would explain the State's requirements.

Rep. Frank O'Connell and Sen. Franklin Kury will be asked to send representatives to an Agriculture Advisory Committee meeting to explain legislation on stormwater runoff they are supporting.

In other business, the Committee:

–heard a presentation by Donald A. Lazarchik, Director of the DER Bureau of Land Protection, on the agency's regulations on farmland application of sewage sludge;

--discussed the Committee's participation in a statewide committee on COWAMP, the Comprehensive Water Quality Management Planning program being conducted by DER;

–was given a final report on a Pennsylvania State University doctoral thesis written by Jerry White on whether conservation practices pay on commercial dairy farms; and

--appointed a subcommittee to consider possible pollution effects of milking center effluents.

Insects endangering stored soybeans

NEWARK, Del. – Insect control in stored soybeans could be a problem this year because it's no longer legal to use the grain fumigants previously relied on. With more soybeans than usual in storage right now, this could spell trouble for farmers who don't take proper preventive steps, warns University of Delaware Extension entomologist Frank Boys.

According to Boys, it's very important that stored soybeans be inspected frequently to determine their condition and the extent of pest damage. Once an infestation has developed, growers are very limited in the controls they can use. In fact, only one material is presently cleared for use on insects in stored soybeans. This is aluminum phosphide (Phostoxin), a fumigant which should be applied only by a certified professional operator qualified to handle fumigants.

This is why it's extremely important to take steps to prevent the establishment of an insect problem. The best way to do this is to keep insects out in the first place. This means using a weather-tight, rodent-proof steel structure separated from areas where hay, straw, feed and animals are housed – one which can be easily cleaned out and inspected.

Clean bins thoroughly at least two weeks before putting beans in them. Clean wooden bins very carefully because grain and dust tend to collect on walls and floors, thus encouraging infestation. Remove all left-over grain from bins and sweep down the walls, ceilings, sills, ledges and doors.

Once you've cleaned it, apply an insecticidal spray to all surfaces inside and (if possible) outside the bin. Surface sprays leave a thin layer of insecticide that kills insects that crawl over it.

Only two materials are presently registered for use on empty bins before soybean storage, says Boys - - methoxychlor or malathionpremium grade. Wait at least two weeks after applying either of these materials before filling bins.

Even if you did not take the precaution of spraying empty bins before storing this year's soybean harvest, it is still possible to take steps to make an insect infestation less likely.

Do this by removing any accumulations of spilled grain from under and around bins. Also clear all trash and litter from the storage area. Wagons, trucks, combines and other farm equipment in which waste grain accumulates can also be sources of infestation, so keep these away from bins.

Even after taking all the above precautions it is still important to inspect soybeans at 30-day intervals, especially during warm weather. Check for insects by taking the grain temperature and by looking for insects themselves. To take the temperature, fasten a thermometer to a stick. Then, in the center of the bin, sink the thermometer two feet below the surface of soybeans. If insects are active, the temperature will be above 65 degrees F. and may range as high as 100 degrees F.

To inspect for insects, insert a grain probe in the center of the bin, two feet below the bean surface. Sift bean samples through a screen to separate out insects.

If you do find an infestation, you have two alternatives, says Boys. Call in a professional fumigator to apply Phostoxin. Or move the beans out of the bin as soon as possible.

WHAT'S NEW

The new Model S Rodent Control System is an extension of the principles found in the proven Sonitron Model C which has been in successful use for a number of years. Where each Model C has a nominal coverage of 3000 square feet, the Model S basic system (a control module and four satellite units) has nominal coverage of 10,000 square feet (each satellite is 2500 square feet). The addition of up to a total of eight satellites increases coverage, in increments of 2500, to 20,000 square feet. The Model S System makes Sonitron rodent control possible in large areas at a significantly lower cost than the Model C.

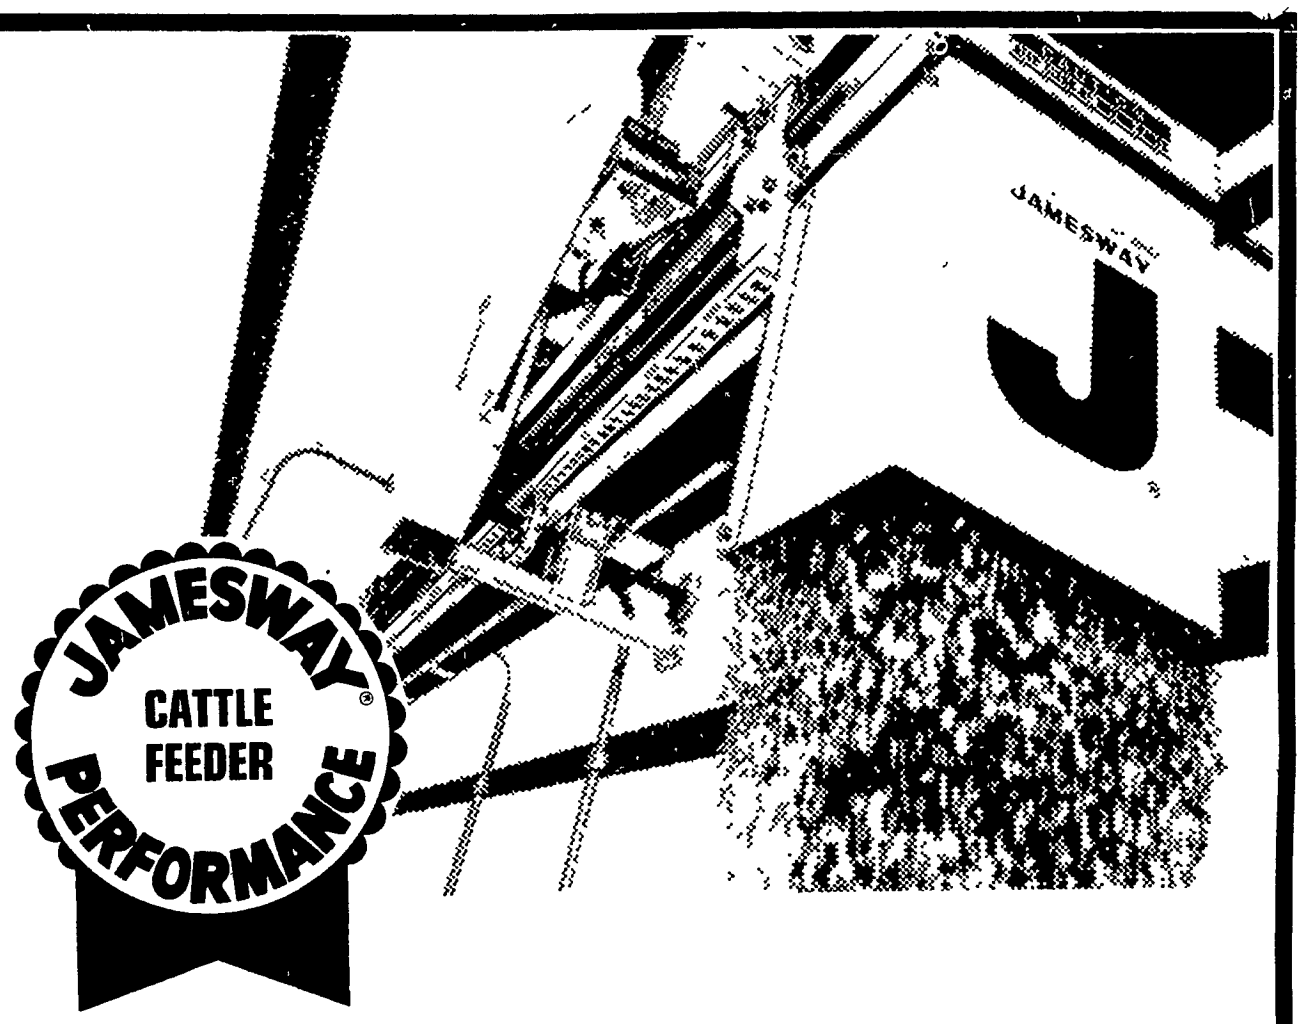
Each satellite transmits high frequency sound waves inaudible to most humans yet within the hearing range of most rodents who usually find it so intolerable that they leave the area.

Sonitron units have been proven in commercial applications such as food stores, restaurants, food packing plants, food processing, grain and feed production and storage, as well as in homes, apartments, and on farms.

Housed in attractive wood grained veneer cabinets, the control unit plugs in to standard 110 - 220 volt 50 - 60 cycle AC outlet. Twenty-five foot extension cords are supplied to connect each satellite to the control unit. Detailed instructions for use are included.

Like other Sonitron products, the Model S is sold with an unconditional 90-day moneyback guarantee and generous materials and workmanship warranty.

For further information write the manufacturer, Impex Industries Inc., 535 Boylston Street, Boston Mass. 02116.



BELTS OUT THE FEED

Jamesway Volume-Belt® cattle feeder—the Quiet One—belts feed out fast without feed separation, for in-barn or outdoor feeding. Downspouts direct feed to stanchioned cows facing in or facing out.

Wheat farmers receive $773 million in payment

WASHINGTON – Farmers who in one year saw wheat prices drop $1.39 a bushel are beginning the new year with more than $773 million in government checks to help offset their losses, Secretary of Agriculture Bob Bergland announced this week.

"The checks are part of an estimated $1.2 billion dollars which wheat farmers will get this Winter in deficiency payments from the Department," Secretary Bergland said. "These payments will help relieve the tight credit cruch facing farmers and rural lending institutions."

As of Jan. 5, over one million checks worth $773,539,593 had been mailed to the farmers, Gergland said.

Wheat prices fell from $3.42 a bushel in June 1976 to $2.03 in June 1977 marketing year and averaged only $2.10 a bushel during the first five months of the 1977-78 year.

Deficiency payments are to make up the difference between the government established target price and the higher of either the national average market price during the first five months of the marketing year or the national loan rate.

The deficiency payment rate for 1977 wheat harvested from allotted acres is 65 cents a bushel – the difference between the $2.90 target price and the $2.25 loan rate. Farmers who did not plant all of their allotment will get a deficiency payment of 22 cents a bushel for those alloted acres not planted.

The deficiency payment checks were mailed to farmers by local offices of USDA's Agricultural Stabilization and Conservation Service (ASCS). ASCS officials said over two-thirds of the nation's eligible wheat farmers have had deficiency payments mailed to them.

This is the first year wheat deficiency payments have been made since the concept was written into law in 1973.

Growers clinic scheduled

HARRISBURG – The third annual Growers Clinic and Trade Show is scheduled for February 7 and 8 at the Westover Inn and Golf Club, Jeffersonville, West Main Street, Norristown.

This two-day clinic sponsored by the agricultural Extension of the eight southeastern Pennsylvania counties features special activities such as corn tests with black lights for aflatoxin molds and checks of portable moisture meters brought by growers.

A con-current two meeting program deals with corn markets (hedging), weed control failures, record breaking producers, profit or loss in corn drying and storage, good drying systems, double cropping soybeans, and grain grading.

Speakers, in addition to a corn and bean growers panel, come from Delaware, Virginia, Maryland, Indiana, and Penn State

Over 40 exhibitors of products used in corn and soybean production, handling, and marketing have contracted for space

It will take two days for a grower to get the full program, says Glenn Ellenberger, Lehigh County agent and chairman of the Corn and Soybean Committee

Reservations can be made in advance Programs are available at each county Extension office in the area.

WANTED:

tractor dealers to make and sell profit!

Case Franchises Available In The Reading & Everett, Pa Areas

When you're selling farm machinery, your customers rightfully demand products that will turn them a profit And being a businessman, you in turn expect a profit from your services

You both profit with a Case tractor franchise As a Tractor Specialist, you will sell 14 sizes of farm tractors and a line of heavy-duty tillage tools Period You needn't scatter your selling power over the full range of farm machinery Your service shop is expert on one commodity farm power Your parts inventory is cleaner and more financially manageable Your used equipment lot consists largely of faster moving used tractors

Light construction power too if the Case utility tractor franchise is available in your territory Call or write us We'll be glad to outline the full potential of a Case franchise in your area

Mr. Dairyman:

Have You Heard the News??? Milk Prices Are Down And Soybean Prices Are Up. You, In The Dairy Business, Are More Fortunate Than The Consumer Buying Coffee.....You Do Not Have To Wait For A Substitute.

Check The Two (2) Tags On Beacon "38" Crumbles.....They Are Both Manufactured By Beacon Feeds. One Is Made With Natural Protein - The Other Has A Substitute For Natural Protein.....The Beacon "38" Crumbles With NPN Sells For Approximately $4.45 Per 100 lbs. Less Or A Grand Total Of $89.00 Per Ton Less Than The Beacon "38" With Natural Protein.

Both These Rations Are Nutritionally Sound. Check With Your Beacon Distributor Or Your Beacon Representative Listed Below To See How You Can Take Advantage Of This Money Saving Value.

Farmix appealed to a supreme court, and won.

More than 10 000 hogs served on the court And the trial lasted over four years The verdict Farmix swine feed concentrate was proved far superior on all counts swine performance carcass leanness cost of gain

What clinched the case for Farmix? In brief, research probed far beyond the measure of crude protein levels used by most swine feed manufacturers Rather, Master Mix Research redefined the requirements of swine for essential amino acids The objective was to proportion amino acid intake according to the hog s needs for fast efficient daily gains

Next, Master Mix evaluated the various feedstuffs to identify amino acid availability and the lowest cost combination that would deliver the required amino acid pattern

The country's highest court – market hogs themselves – bore witness to faster rates of gain Improved feed conversions Lower feed cost

Then all last year, leading swine producers weighed the evidence, and came to a unanimous decision Farmix really works It s inexpensive and versatile. And helps build healthier bottom-line profits

Why not be the final judge Give Farmix a fair trial on any grounds you choose See your Master Mix representative Or write Central Soya Domestic Feed Division, Fort Wayne Indiana 46802

DECEMBER 1977

A registered Holstein cow owned by Jay C. Garber, Lancaster R6, produced 26,259 lbs. of milk, 1,023 lbs. of butterfat with a 3.9 per cent test. Second high lactation was completed by a Holstein cow owned by John M. Weaver & Son, New Holland R1. She produced 22,856 lbs. of milk, 985 lbs. of butterfat with a 4.3 per cent test in 305 days.

The herd of Mervin Sauder, Lititz, R2, had the highest daily butterfat average. This herd of 37.9 registered and grade Holstein cows averaged 61.8 lbs. of milk, 2.36 lbs. of butterfat with a 3.8 per cent test. The herd of Earl N. Landis, Manheim R7, placed second. This herd of 50.8 registered and grade Holstein cows averaged 60.1 lbs. of milk, 2.24 lbs. of butterfat with a 3.7 per cent test.

EASY TO HANDLE, FUN TO USE

5 QUESTIONS YOU SHOULD ASK WHEN BUYING A CHAIN SAW

1. Is service available when needed?
2. Are parts in stock for repair?
3. Does quality equal the price?
4. Is it manufactured in U.S.A.?
5. Is the warranty two years?

All 5 questions can be answered Yes at

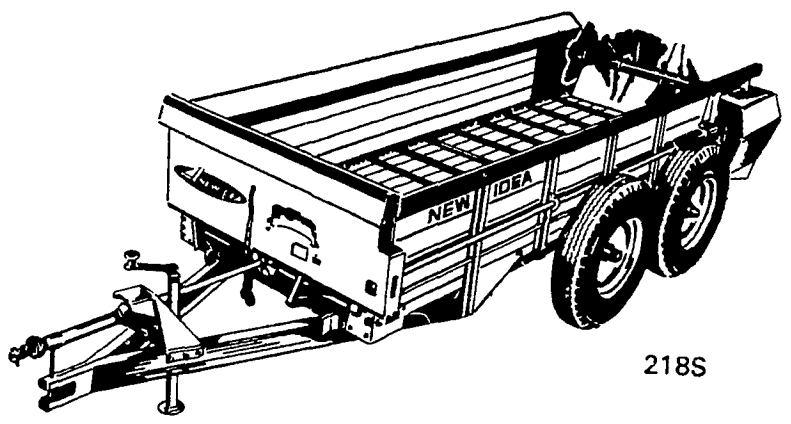
OUR BIGGEST SPREADERS ARE BIG TIME SAVERS

NEW IDEA 8½-TON SPREADER

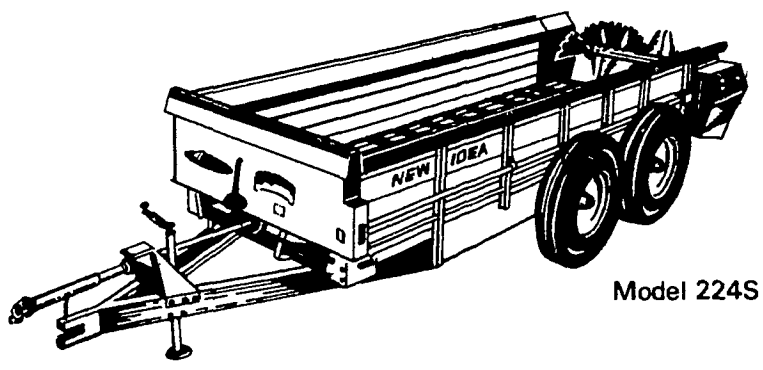
This is a "big" spreader built to take the tremendous punishment of hauling huge loads It's a real heavyweight . built to handle 8½ tons per trip. Pull it on rugged bogie axles or mount it on a truck chassis. It has all the quality features you need for spreading time-saving big loads.



218S

NEW IDEA 10-TON SPREADER

This giant has it all It has all the heavyweight features it takes to handle 10 tons of manure. The conveyor chain has an exclusive "overload protection system" that automatically disconnects, then instantly resets itself so you don't have to leave the tractor seat. Options include a hydraulic endgate or pan attachment for sloppy loads, also an upper beater to level out those heaped loads.

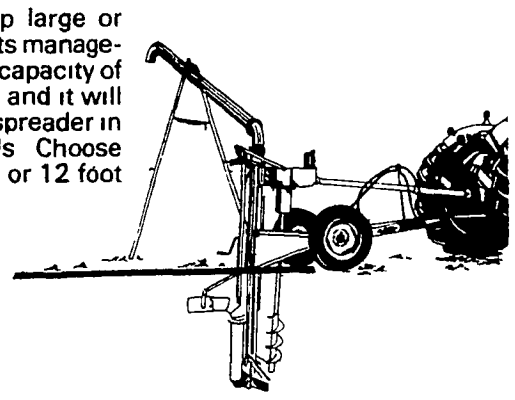


Model 224S

UNMATCHED AGITATION, NON-CLOG PERFORMANCE.

NEW IDEA AGITATOR-LOADER

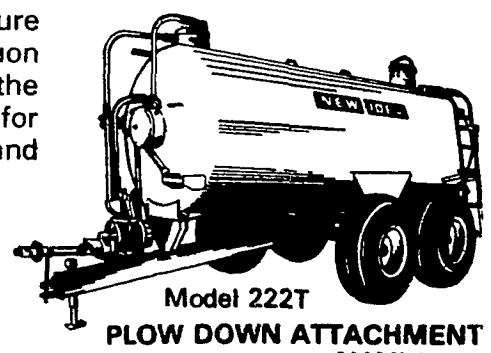
It's a better way to keep large or heavily slurried manure pits manageable It's got an agitation capacity of 3,000 gallons per minute and it will load a 1,500 gallon tank spreader in less than ninety seconds Choose one of three sizes, 8, 10, or 12 foot to match your pit depth



DEPENDABLE, REDUCES LABOR.

NEW IDEA MODEL 222T LIQUID SPREADER

Handle livestock manure the labor and pollution reducing way. This is the tank built like a tank for dependable service and long life



Model 222T
PLOW DOWN ATTACHMENT AVAILABLE

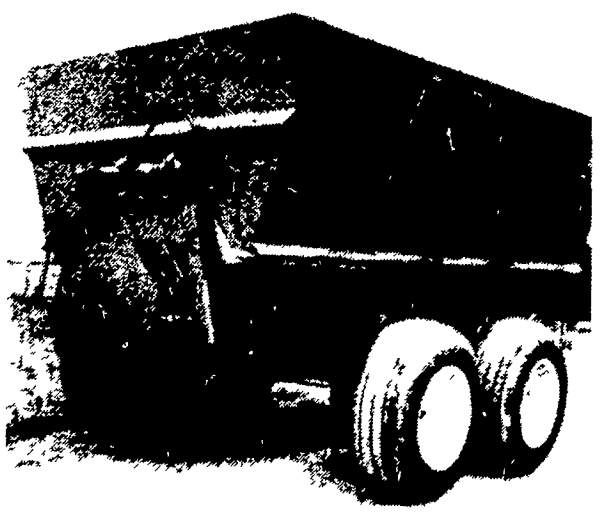
NEW OPEN TOP NEW
SEMI-LIQUID SPREADER



MR. DAIRYMAN:

The Martin works great with Liquid or Semi-Liquid manure!
Open top for scrape-off ramps or front end loaders.

THE FOLLOWING FEATURES ARE STANDARD EQUIPMENT ON MARTIN'S V1500 gal., V2100 gal., V2250 gal., V3300 gal TANK SPREADERS

- ★ Heavy duty internal chopper type auger
- ★ Includes Hydraulic cylinder and all hoses
- ★ Includes PTO shaft, jack and ladder
- ★ Spreaders built and designed to handle manure from free stall barn without adding any liquid
- ★ Rear fan built to handle spread of 45 to 60 feet liquid or thick manure
- ★ Manure tank can be filled with barn cleaner—Scrape off Ramp—Front End Loader or Pump
- ★ Large 12' opening from tank to discharge fan
- ★ Special V Shape design facilitates smoother flow of manure removal
- ★ Braking System Optional 4 wheel Hydraulic Brakes controlled from tractor

BOU-MATIC PRINCIPLES OF GOOD MILKING
TO BALANCE YOUR MILKING PROFITS, FIRST BALANCE YOUR MILKING SYSTEM.

Balance. All of the Bou-Matic Principles of good milking are keyed to this concept. That is, precise balance of three very important points: proper Vacuum, proper Inflations and proper Pulsation.

All three areas, together, involve every aspect of the milking system. So, they all should be considered in relation to each other. Not one at at time. That way, one area can't limit the capability of any other.

A capsule view

Reduced to basics, the Bou-Matic VIP balance concept requires the proper combination of: (1) A smooth, rapid air flow, governed by system-sized pumps and large diameter milking lines: (2) safe, moderate vacuum levels, with vacuum stability (minimum fluctuation at the teat end) and adequate reserve capacity; (3) low-level pipelines or weigh jars, which permit the moderate vacuum level needed and minimize fluctuations which can be created by lifting milk to overhead lines, (4) inflations matched to the vacuum level for proper massage without pinching or damaging the teat end, and, (5) dampened pulsation, alternating front to rear, using split ratios to balance the milk-out rate and minimize overmilking of the front quarters; and to balance the milk load of the system

How can this balance be achieved? And, what are some specific benefits that dairymen can expect by attaining it in their milking operations? Call us to find out and learn of the Bou-Matic way to help increase milk production . . . from healthier herds . . . with fewer cow replacements . . . all leading to more profitable milking. Good reasons to take a closer look, and to make the Bou-Matic Principles your own.

TELEPHONE US TODAY FOR DETAILS ON ROUTINE MILKING SYSTEM ANALYSIS AND MAINTENANCE. A SEMI-ANNUAL CHECK-UP WILL MORE THAN PAY FOR ITSELF IN IMPROVED MILKING MACHINE PERFORMANCE.

Eastern takes 22 placings

WRIGHTSVILLE – The Eastern Future Farmers of America Chapter of Eastern High School, Wrightsville entered 56 projects in the 1978 Pennsylvania Farm Show. Out of the 56 entries, the FFA had 22 placings which earned them $84.

The following is the breakdown of winners; Robert Buser won $36 with nine ribbons; Ray Smeltzer earned $26 with seven ribbons; Steve Daugherty garnered three ribbons and $11; Chris Klinedinst took in $5 with one ribbon; and Michael Krug and Thomas Urey both earned $2 with one ribbon each.

Buser and Smeltzer also participated in the 1977 P.C.I.A. Once Acre Corn Contest with Buser taking a blue ribbon and Smeltzer a red.

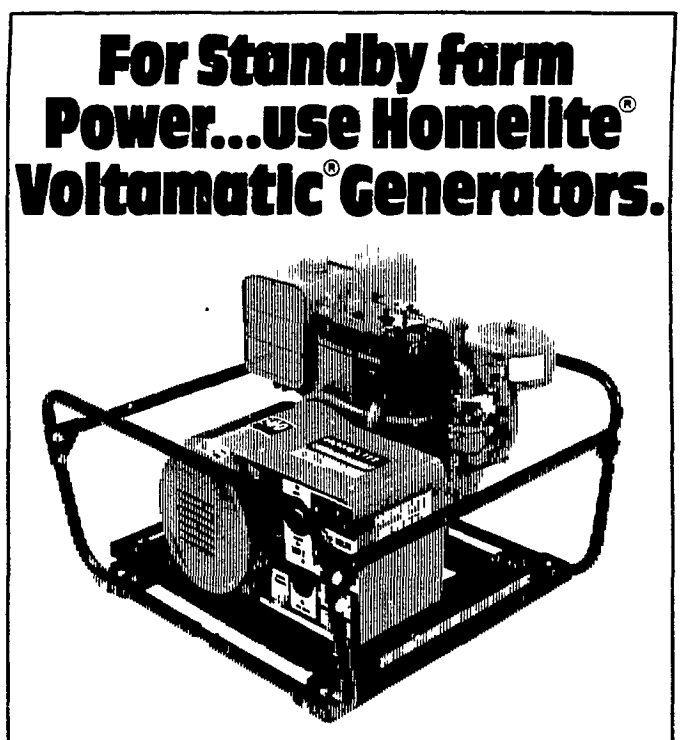
NEW HOLLAND SUPPLY CO.



For Standby farm Power...use Homelite® Voltamatic® Generators.
High Performance When and Where You Need It.
All models use Voltamatic® voltage control to maintain output power to within 4% from no load to full load (8% with model 170A15-1) Give extended tool life, easier motor starting, and fewer tool burnouts
• Seven models available with output capacities from 1,500 to 7,500 watts, and most have 120/240 dual voltage
• Many equipped with Loadamatic® Idle Control which saves gas, prolongs engine life
• Control box side-mounted for easy access to receptacles
• Choice of 2-cycle or 4-cycle engine driven models with splash lubrication system
• Units mounted on vibration isolated skids to prevent "walking"

Facts for dairymen

By Alan Bair
Assoc. County Agent
Lancaster, Pa.

FACTS FOR DAIRYMEN
By County Agent-Dairy
N. ALAN BAIR

While I was in the southern end of the county last week, I stopped in to see Dale Herr's new drive-through free-stall barn. This new barn is built on the basic Penn State plan which uses four rows of free stalls and a 14 foot drive-feed alley.

I think Dale is already pleased with this time-tested barn design, but an even happier person is his veterinarian. In today's dairy farming business, your veterinarian is one of the more important members of your total management team.

Two areas that Dale's veterinarian remarked about were the excellent ventilation system and the built-in animal handling facilities such as locking head gates and a chute with head gate.

Having a safe place to restrain animals for medical and other reasons is often overlooked in new construction. This kind of equipment not only keeps your veterinarian happy, but also means a great deal to the safety of the animal and to you.

When we work with animals everyday, it is easy to forget just how dangerous they can be when they are frightened. With larger herds and some of our modern housing methods, we are going to have injured and sick animals that must receive medical attention. For the animals well being and yours, consider building a permanent, well desgined restraining area.

We are also now recommending that all new free-stall barns include locking head gates along the feed trough or alley. This feature gives you more versatility in management in the areas of health, reproduction, and milk quality.

Catching cows to breed and other routine practices can and should be done with the least amount of disturbance to the entire head. With locking head gates, it is easy to catch a whole string of cows and then release the ones you don't want.

How do locking head gates along the feed alley help the milk quality? It allows you to keep the cows away from the feed. It is well known that strong smelling feeds like silage should not be fed just prior to milking. On the other hand, it is often most convenient to feed just prior to milking. The locking head gates allow you to place the feed in the bunk prior to milking without giving the cows access to it. This has the added advantage that the cows know they will have feed available as they exit from the parlor. This acts as an incentive for them to move into and through the parlor.

Locking head gates should be constructed so a whole row can be locked and released at one time, while holding the one cow or cows that you need to restrain. Strength and ease of release should also be considered when you are shopping for this equipment.

Proper equipment is so essential to any dairy operation. Do not overlook equipment to handle your cattle in the safest and most easily managed way.

Kent County to host Holstein convention

CHESTERTOWN -- Maryland's registered Holstein breeders will gather in the "Land of Pleasant Living" for the 1978 Maryland Holsetin Convention. Kent County's Great Oak Resort will be the convention headquarters and the site of the annual business meeting on February 7.

Highlighting the business meeting will be two top speakers. Richard Chichester, general manager, Select Sires, Ohio, will speak on "Establishing a Breeding Breeding Program for Dairy Cattle." Dr. Kenneth Bedirian, director and technical manager, Via Pax Corp. Ltd, Ontario, Canada, will discuss "Embryo Transfer– A New Tool for the Modern Breeder."

Robert McKown, associate manager of the "Holstein World," will present the junior members' program on "Advertising and Promotion."

Women attending mav particiapte in a tour of 18th century homes in historic Chestertown, and a trip to Remington Farms, Wildlife Management Demonstration area.

Evening activities will begin at 6:45 p.m. with a dinner-dance featuring an Eastern Shore-style raw oyster bar at St. Dennis Church, Galena.

On February 8, the state sale will be held at Great Oak, Chestertown, beginning at 11 a.m. with cattle selected from the entire state.

Dairymen and agri-businessmen are invited to attend the convention and visit Kent County farms. Room reservations at Great Oak Resort can be made by calling 301-778-2100.

Tool up here for a great future in the hog business

Producers planning to stay in the hog business are tooling up to squeeze more pork from their feed and their labor

If you're one of them, chances are you ll appreciate the built-in feed and labor efficiency of AGSTAR equipment

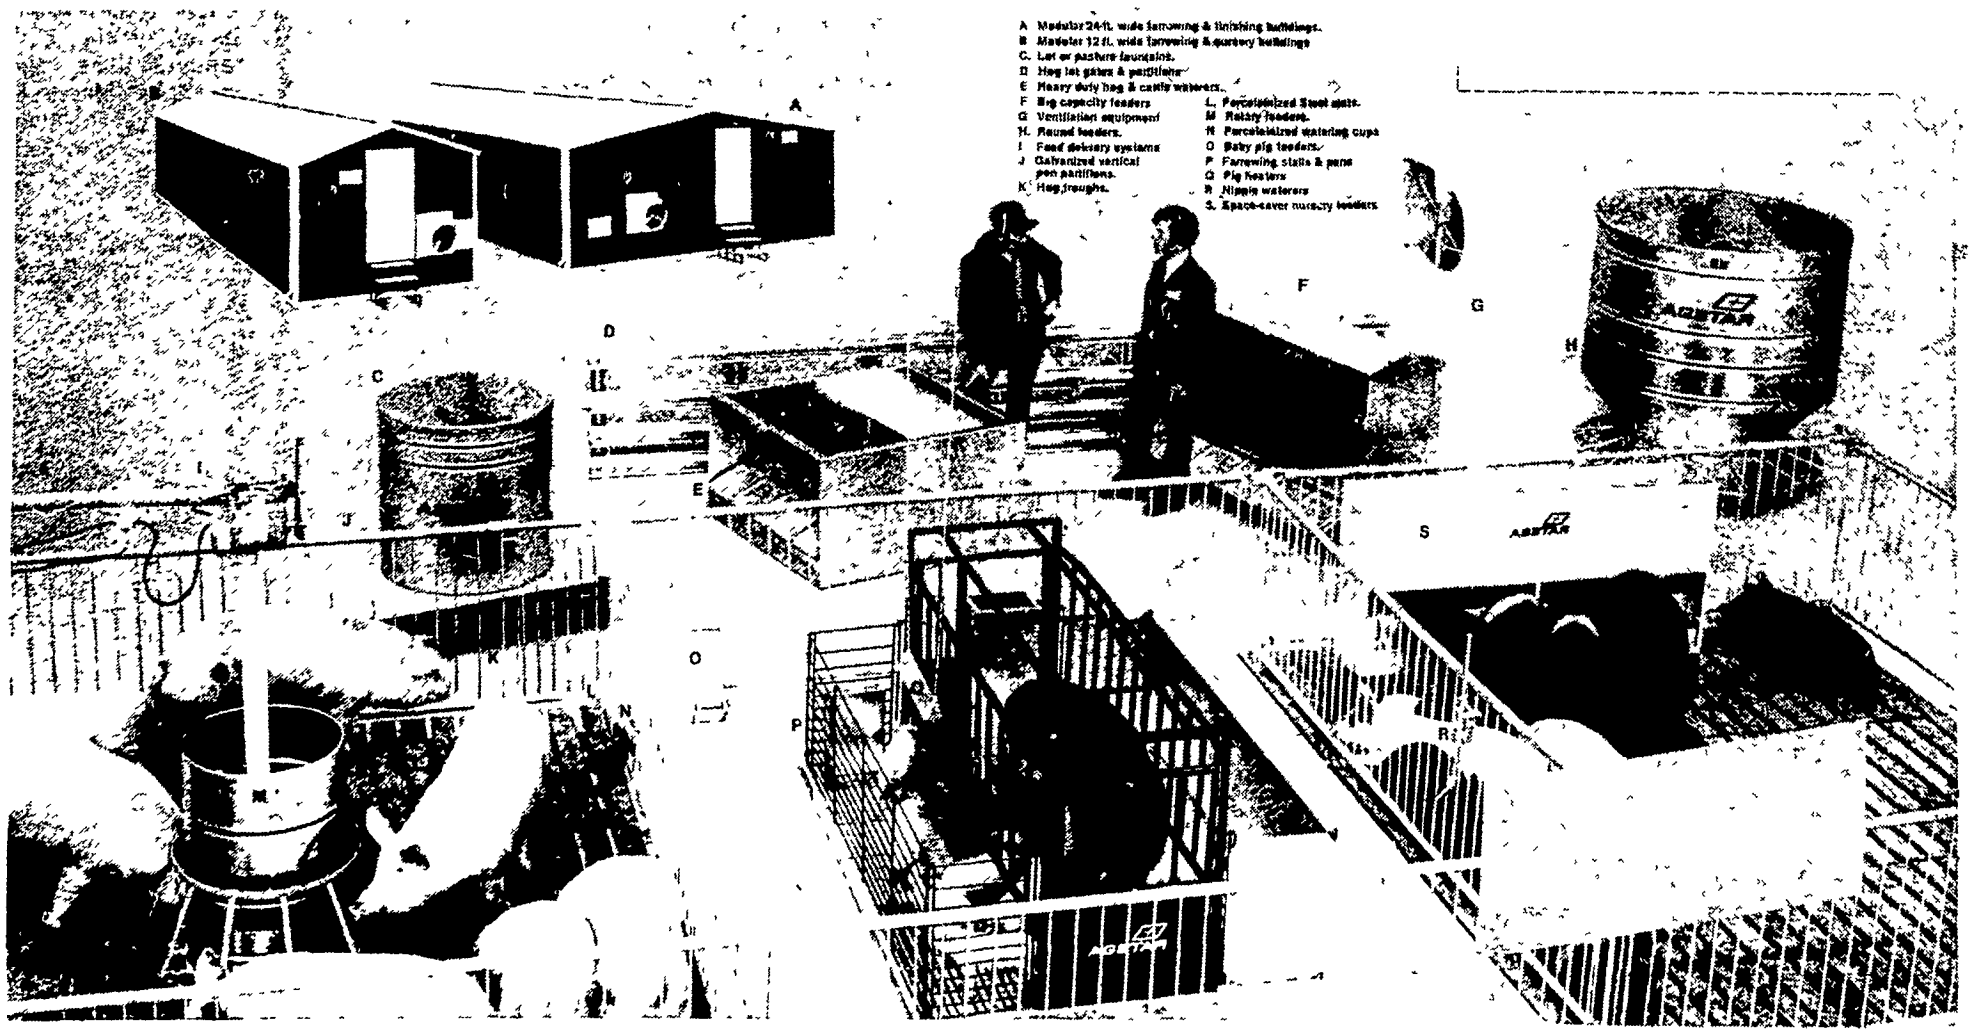
Sensible feed saving design features — like preci sion TIP TOP feed flow adjustment on AGSTAR feeders

Great labor saving ideas — like self cleaning watering cups with smooth Porcelainized Steel surface, and fully automatic feeding and ventilation equipment

We think you'll also appreciate the ruggedness and durability of every piece of AGSTAR equipment

You can buy AGSTAR equipment and install it in your own buildings Or, you can get it already installed and ready to use in one of our new factory built modular hog production buildings for sows, pigs or finishing hogs

The equipment samples in the photo are arranged to demonstrate as many of our 40 types of hog equip ment as possible For full details on this and our other equipment for confinement, open lot, or pasture — as well as cattle, sheep, or horse equipment — contact your AGSTAR dealer Or, if you prefer, just use the coupon



A Modular 24-ft. wide farrowing & finishing buildings.

Order 4 milk prices $10.59 for December

ALEXANDRIA, Va. – Market Administrator Joseph D. Shine recently, announced a December 1977 base milk price of $10.59 per hundredweight for the Middle Atlantic Marketing Order and an excess milk price of $8.88. The weighted average December price is $10.41 and the butterfat differential for the month is 11.7 cents. The December base milk price is unchanged from November and is 32 cents above the December 1976 base price. Order No. 4 prices are announced for 3.5 per cent milk f.o.b. plant location within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, D. C. or Baltimore, Md. There is a six-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine reported that December producer milk receipts totaled 476.6 million pounds, a decrease of 0.1 per cent from November on a daily basis, and 3.2 per cent above a year ago. Class I producer milk accounted for 58.90 per cent of total December producer deliveries, compared to 60.40 per cent in November and 62.78 per cent a year ago. Base milk represented 89.84 per cent of total December production. A total of 7,959 dairyment supplied Middle Atlantic Order handlers during the month and the average daily delivery per producer was 1932 pounds, 3.7 per cent above last December

Middle Atlantic Order pool handlers reported Class I in-area milk sales of 7.70 million pounds per day during December. When adjustment for variation in calendar composition is made, December fluid milk sales were down 2.4 per cent from November and were 4.9 per cent below last December.

During the 12 months of 1977 a total of 5.7 billion pounds of producer milk was pooled under Order No. 4, a 5.4 per cent increase from the previous year. The gross value of all pooled milk was 575 million dollars in 1977, a $20 million increase from 1976. Class I producer milk totaled 3.3 billion pounds and accounted for 57 66 per cent of totaled pooled milk. The average daily delivery per producer was 1.933 pounds in 1977, 116 pounds or 6.4 per cent above the average daily rate the year before.

The Order No. 4 base milk price averaged $10.29 per hundredweight during 1977, 19 cents below the previous year, while the average excess milk price of $8.53 was up eight cents from 1976. The Class I milk price averaged $11.26 in 1977, down 12 cents from the 1976 average, while the Class II milk price average of $8.60 was 10 cents higher than the previous year.

Dairymen receive $9.83 for Dec. milk

NEW YORK, N.Y. – Dairy farmers supplying milk plants regulated under the New York-New Jersey marketing orders during December will be paid on the basis of a uniform price $9.83 per hundred pounds of 21.1 cents per quart. Market Administrator Thomas A. Wilson, who announced December's price, also stated that the uniform farm price was $10.12 per hundredweight in November 1977 and $9.54 per hundredweight in December 1976. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The total amount of milk received from the 18,328 dairy farmers supplying the New York-New Jersey Marketing Area was 785,017,497 pounds during December 1977. This was more than 38.4 million pounds above last year. The gross value to dairy farmers for milk deliveries was $78.980,486.17. Wilson explained that this included differentials required to be paid to dairy farmers but no voluntary permiums or deductions authorized by the farmer.

Regulated milk dealers (handlers) utilized 396,124,725 pounds of 50.5 per cent of the total amount of milk for Class I. The Class I milk is used for fluid milk products such as homogenized, flavored, low-test, and skim milks. For December 1977, handlers paid $10.99 per hundredweight, or 23.6 cents per quart, for the milk used in Class I products compared with $10.66 a year ago.

The balance of the milk, 49.5 per cent was used to manufacture Class II products including butter, cheese, ice cream, and yogurt. For this milk the handlers paid $8.93 per hundredweight.

The uniform price is based on milk containing 3.5 per cent butterfat. For December 1977, a differential of 11.7 cents was applied to the price for each one-tenth of one per cent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for bulk tank milk received within the 201 to 210 mile zone from New York City.

Brown Swiss made known by children

By DIETER KRIEG

HARRISBURG – Brown Swiss breeders throughout Pennsylvania have undoubtedly heard of William Daubert, the Schuylkill County dairyman who captured the premier breeder and premier exhibitor banners at the Farm Show last week. Daubert has been interested in Brown Swiss cattle for nearly 30 years, and his herd represents some of the better bloodlines to be found in the Keystone State.

What followers of the Brown Swiss breed may not be aware of, however, is that were it not for the six Daubert children, the Daubert name probably wouldn't be seen in the show ring. It was the kids who started it all, explained Mrs. Daubert recently while babysitting the family's showstring of 10.

Making their home at Wind Mill Farm, Pine Grove, the family of seven (eight before the eldest daughter, Rhonda, got married) works with 350 acres of ground and 150 head of Brown Swiss cattle, 70 of which are milking.

Out of the 10 head they brought to the Farm Show, nine are homebred. Aside from the prestigious banners they now have in their collection, they also had the grand and reserve grand champion, and a first place in all group classes they showed in. Being able to come up with winners which have been bred and raised right on their home farm gives the family an extra bit of satisfaction. They all enjoy working with the animals.

Dean, at 21, is the oldest active member of the younger Daubert generation. His sister, Rhonda, has graduated on to married life. A sophomore at Delaware Valley College, where he's majoring in dairy science, Dean has his sights on a dairying career. He's presently president of the Southeastern Pennsylvania Brown Swiss Canton. His father is vice president of the state organization.

Dennis, 19, works full time

(Turn to Page 115)

The Daubert family includes, left to right, Dennis, Dean, Ronald, Mr. William Daubert, Mrs. Daubert, and daughter Anne.

Farmers working for market control and less government encroachment

HOUSTON, Tex. -- Strengthening farmers' power in "every marketplace" is a 1978 objective of the American Farm Bureau Federation.

Richard W. Owens, AFBF secretary and chief administrator, explained Tuesday how Farm Bureau plans to attack the depressed agricutlrual economy and improve farm income. Owens discussed the plans during his address at the 59th AFBF annual meeting in Houston.

Expanded world markets coupled with more effective marketing methods are needed, Owens said. In addition, Farm Bureau will continue its fight against federal governmental regulatory encroachment while demanding greater accountability from government officials.

"It is nothing less than tragic that farmers and ranchers of this country, with our clear-cut competitive advantage, have not been allowed to move fully into international farm markets," he complained.

Owens criticized the administration for failing to aggressively pursue international farm markets at a time of tremendous supply and falling farm income.

"U.S. farm export promotion represents something like one-tenth of one per cent of our farm export sales dollar," he noted. "This is a fraction of the percentage spent by many of our competing trade partners."

Owens reported that Farm Bureau is "engaging in direct-action foreign trade development for all farm commodites." He listed 1977 trade expansion trips and others planned for 1978, including one to India-Malaysia in March.

"Our trade expansion efforts will be continued with renewed enthusiasm in the year ahead," he stated.

Turning to another part of the organization's strategy, the Farm Bureau spokesman said: "We recognize that improved farm income lies in the farmers' and ranchers' ability to build and control their own effective marketing and bargaining programs."

Owens also described Farm Bureau's continuing struggle to protect members from those who would control agriculture through various federal efforts. Farm Bureau has met headon challenges from EPA, OSHA, federal planners of water, environmental extremists and the FDA.

"Accountability is an old word which of late has been given new political emphasis," he said. "Farm and ranch people along with industries are held accountable for air, water and soil quality.

"How about applying the same high standards of accountability to the affairs of government?" Owens asked.

The Farm Bureau official suggested that impact statements might be made to inform the public about, and protect the public from, unwise laws, inflationary deficit spending, regulatory excesses and restrictive executive actions.

Owens said, "Many of the root causes of regulatory problems lie within the business community itself and must be handled there. Corporate America must be persuaded and helped to abandon certain attitudes of dependency which in the long-run are self destructive.

Jr. hog sale sets record

HARRISBURG – Two records were established in the Junior Market Swine Sale at the 62nd Annual Pennsylvania Farm Show last Friday when the grand champion brought $19.50 per pound and the reserve champion command $4.50 per pound. Showing the grand champion, a 210 pound barrow, was 10-year-old Seth Gruber of New Tripoli, who was also last year's winner. At that time young Gruber got $15 per pound for his champion–a record for that year. This year's price broke that old record by $4.50 with the help of Pennsylvania Secretary of Agriculture Kent D. Shelhamer. Shelhamer was on hand to spur the bidding which became sluggish at $10 per pound. The barrow was sold to Hatfield Packing Company, Hatfield, Pa.

The $4.50 per pound received for the reserve champion market swine set another record, surpassing the $4 per pound of 1977's Farm Show. The reserve grandchampion, a 239-pounder exhibited by Greg Strickler of Bernville R1, was sold to Hatfield as well. The animal was bred by Schick Farms, Kutztown R2.

A total of 94 hogs were sold in Friday's auction.

Top speakers, pertinent topics slated for Pa. wine conference

UNIVERSITY PARK – Dr. Helmut Becker of Geisenheim, West Germany, founder of the German Wine Academy, will be among the featured speakers at the Tenth Pennsylvania Wine Conference to be held January 31 and February 1 at the Hershey Convention Center, Hershey.

Dr. Becker is also leader of the Grape Breeding and Grape Propagation Institute at the Geisenheim Agricultural, Horticultural, Grape, and Wine Institute. He will speak on "Rootstocks for Vinifera Grapes" and "Sparkling Wine Production for Small Wineries."

A champagne breakfast will be featured Feb. 1 as well as an informal tasting of Pennsylvania wines and cheeses that evening prior to the annual banquet.

The Wine Conference will take place simultaneously with annual meetings of the State Horticultural Association of Pennsylvania and the Pennsylvania Vegetable Growers Association. Over 100 exhibitors will feature equipment for grape growing, wine making, and food processing.

An assessment of grape plant injury from the Winter of 1977 will be made by Dr. Thomas Zabadal of Finger Lakes, New York, grape specialist, and Dr. Carl Haeseler, pomologist at Penn State's Erie County Field Research Laboratory. In addition, Dr. Haeseler will compare the growing of vinifera of European-type grapes with non-vinifera grapes in Pennsylvania.

The conference will deal with loss of grapes due to the downy mildew disease, a serious problem in 1977. Speaking on the nature of downy mildew of grapes will be Dr. Donald H. Peterson of Penn State.

Federal quality standards for producing grapes for the processing industry will be presented by Clyde Miller, chief of the fruit and vegetable division of the Pennsylvania Department of Agriculture. This topic will be complemented by a discussion of one processor's aproach to determining field maturity and acceptance of grapes. Speaking will be Gordon DeGolier, chief of the field division for National Grape Cooperative, Westfield, N.Y.

J. Richard Nissley of Landisville, president of the Pennsylvania Wine Association, will discuss the role of this newly-formed organization.

Sponsoring the Wine Conference at Hershey are the Cooperative Extension Service and the Agricultural Experiment Station of the College of Agriculture at Penn State, the Pennsylvania Grape Council, the Pennsylvania Wine Association, and the Pennsylvania Department of Agriculture.

Topics of interest to commercial wine makers will include one entitled "Inducing Malo-Lactic Fermentation by Inoculation," by Dr. Robert Beelman, researcher in food science at Penn State. "The Effect of Skin-Contact Time on White Wine Quality" will be presented by Susan Freas, graduate student in food science at Penn State.

Equipment sources for small wineries will be discussed by Douglas F. Moorhead of Presque Isle Wine Cellars, North East, Pa. Mrs. H. Lee Stauffer and Hudson Cattell, editors of "Pennsylvania Grape and Wine News," will access the marketing practices of Pennsylvania's limited wineries.

Md. tobacco auction set for April - June

CHELTENHAM – The 1978 Maryland tobacco auction season will begin April 11 and run for eight weeks until June 1, according to the Maryland State Tobacco Authority.

Auction sales at the eight warehouses in Southern Maryland will be held four days per week, Monday through Thursday. The weekly quota of tobacco to be sold will be four million pounds.

Advance indications are that the 1977 Maryland tobacco crop is about 30 million pounds and the quality of the leaf is regarded as "very good" with much highly-prized thin crop grades on hand.

Tobacco growers from Anne Arundel, Prince Georges, Calvert, St. Marys and Charles, also are well along in their "stripping", something they have not been able to report for the past several seasons due to extremely dry conditions.

On another note, Maryland Secretary of Agriculture Young D. Hance reported that slightly over $17 million worth of Maryland Type-32 tobacco was exported in the past marketing year, up substantially from $11.5 million exported the year before.

"Tobacco has been a vital export dollar earner for Maryland since colonial times," Hance said, "and today it is encouraging to see tobacco playing a strong role in earning foreign exchange credits for a nation which needs agricultural exports to help pay for imported petroleum."

It's The Cape

Did you know that bulls can't actually see red? It's the movement of the toreador's cape that attracts the bull The color red is for the benefit of the spectator In fact, most animals can't distinguish colors

Best Polled Hereford breeding bull shown by Frank Darcey and John D. Hausner

HARRISBURG – Western Pennsylvania Polled Hereford breeders came up with winners in nearly every class at last week's Farm Show, but the grand champion bull banner eluded them. It was won by JDH Polled Herefords of Dover and Spring Bottom Farms of Fairfield.

"Royal Siege" was the name of the bull, and the John D. Hausner and Frank Darcey families are his proud owners. Hausner is a York Countian and owns a quarter interest in the champion. Adams Countian Frank Darcey owns the major share.

Both Polled Hereford breeders are very active with their breed, and have amassed commendable records with their show strings while promoting their cattle and the breed in general.

The winning bull was bought from Falkland Farms of Shellsburg. Both Darcey and Hausner have cow-calf operations.

The reserve grand champion and calf champion in bull classes was "DS Vindicator 710," shown by Stockdale Herefored Farm of Dayton. Frank Darcey showed the reserve calf champion, "WHF New King."

C. J. Furlong and Twin Valley Farm of Breezewood showed the reserve junior champion, "CJF Taurus," and Twin Valley Farms exhibited the senior champion, "CMF Taurus."

Stockdale Hereford Farm showed the reserve senior champion, "SHF Vindicator 529."

The grand champion Polled Herefored in female classes was "WSF Miss Banner 38H," exhibited by Stockdale Herefored Farm. The animal was also the show's senior champion. Stockdale Herefored Farm showed the reserve grand champion as well, "D.S. Miss G69 D642." Miss G69 was also the junior champion.

Two other Stockdale entries won honors: "DS-MS Dominator" was the calf champion and "FPP Vindi Kate 7J," was the reserve champion calf.

Twin Valley Farms showed the reserve junior champion, "CJF Stylistic," and Y Not Farm of Osterburg, Bedford County, showed the reserve senior champion. "Y Not MS Vindica."

Randy Becker oftentimes works the show string for the JDH Polled Hereford herd, Dover. He was on duty at the Farm Show and is at the halter of the champion Polled Hereford bull, owned by John D. Hausner of Dover and Frank Darcy of Fairfield.

Farmer co-ops salute Humphrey

SAN FRANCISCO, Calif. – Senator Hubert H. Humphrey (D-Minn) was saluted here last week, just a day before he died, by the board of directors and members of the National Council of Farmer Cooperatives.

At the NCFC's 49th annual meeting, attended by 1400 cooperative leaders, the Minnesota senator was recognized for his steadfast support of agriculture and cooperatives. Humphrey was thanked for his inspiration, good humor, leadership in government, and good example of practical democracy he has provided for all America.

Humphrey's life and career were cited as abundant proof that grace, courage, and principle transcend victory and defeat. Humphrey was recognized for his awareness of the singular importance of agriculture in the U.S. throughout his lifetime of public service, and the repeated demonstrations of his deep understanding and appreciation of cooperatives.

As a result, said the NCFC resolution, he "contributed greatly to the formation and growth of U.S. cooperatives in the interest of improved farm income and a higher quality of living for all Americans."

AFBF sees dangers in labor legislation

EDITOR'S NOTE: The following is reprinted from the Jan. 2, 1978 edition of Farm Bureau News, the American Farm Bureau Federation's official newsletter. AFBF granted permission for the use of this article in Lancaster Farming.

By Allan Grant, AFBF President

WASHINGTON, D.C. – Hot on the heals of the re-election of George Meany as president of the AFL-CIO has come a renewed, all-out effort to get a drastically revised National Labor Relations Act (NLRA).

The NLRA is the federal law that gives labor unions the right to bargain collectively with employers. It spells out unfair practices on the part of unions and employers and sets up administrative procedures for the conduct of employee elections to determine union representation as well as the questions of changing or ending union representation.

Organized labor's main goal during 1978 is passage by the United States Senate of S. 1883. It is clear that the Carter Administration will be in Labor's corner, fighting with them all the way. In a speech at the recent AFL-CIO convention in Los Angeles, Vice President Walter Mondale said, "I want you to know that this Administration has no higher priority this year than passage of labor law reform in the Senate." With that statement, the Vice President elevated the so-called "reform" legislation passed by the House to a status it did not appear to have up to now

Among other things, S. 1883 would "pack" the National Labor Relations Board by increasing it from five to seven members. The Board is the semi-judicial agency that sets policy and oversees the administration of the NLRA. It is not difficult to predict who would have the principal influence on these appointments or what orientation the new board members would assume.

Why are the unions going all out for this bill? The unions are in real trouble. They have been losing membership. They are a smaller portion of the total work force than in many years, 20 percent or less. They rank very low in public esteem. They are losing more representation elections than they are winning.

Allen Grant

Decertifications have increased 350 per cent over the past 13 years.

The unions have made it clear than one of the main purposes in changing the nation's labor act is to make it easier for them to force unions on employees and employers in the South. The ultimate aim of Big Labor is to repeal Section 14b of the Taft-Hartley Act, which permits states to enact right-to-work laws. It is these laws that forbid closed shops or compulsory unionism.

For the 2.8 million member families of Farm Bureau and for the millions of other Americans concerned about organized labor's already existing monopoly power, the battle lines are drawn, and the United States Senate will be put to the test.

Veteran Washington observers believe that the forces against S. 1883 can now count on about 32 votes. Another 30 votes or so are almost certain to favor the bill. It will be the 30 to 35 uncommitted Senators that will mean the difference between victory or defeat for organized labor.

The issue is likely to be decided on which side executes the most effective Senate letter writing campaign. Mountains of mail can be expected from Big Labor and its allies. Whether opposing forces can generate a matching effort remains to be seen, but that is what it will take to defeat S. 1883.

Animals account for 15.9 per cent of all farm accidents with a large portion of these accidents occuring on dairy farms, according to a Maryland farm accident study done recently. The study indicated that animals were the second leading factor in farm accidents, preceded only by farm machinery. Inadequate handling facilities contributed greatly to the problem.

Pigeon Hill Farm shows Hereford champions

HARRISBURG – Pigeon Hill Farm of Abbottstown came away with champions in both male and female Hereford beef breeding classes last week at the Pennsylvania Farm Show.

Their champion bull, "BHL 1 Real 126 was owned in partnership with Blakely Farms, also of Abbottstown. The same animal was judged junior champion.

In Hereford beef breeding female classes, the grand champion was "PH Miss Northern 166. The reserve female champion was another Pigeon Hill animal, exhibited by Harris B. Wright of Abbottstown. That animal's name was "PH Miss Northern 26."

William Renner, of Waynesburg, showed the reserve grand champion and reserve junior champion bull, "R F ADV Dominion."

The senior champion bull was shown by Leroy M. Shearer, of Glen Rock, York County, "PH MR Northern 95." Shearer is the father of Pigeon Hill Farms' manager, Terry Shearer.

Reserve senior champion was "DVC Penn Domino 4H5," exhibited by Delaware Valley College of Doylestown.

Pigeon Hill Farm, owned by Dr. and Mrs Malcolm Wright of Hanover, brought eight head to the Farm Show, seven of which were homebred The dams of three members of the show string were also bred at the farm. In commenting about their ribbon harvest, manager Shearer said "a lot of things were done two or three years ago when we mated the right bull and cow."

Pigeon Hill is the home of 45 purebred Herefords. A cow and calf operation, most of the calves are sold as 4-H projects at prices averaging five to seven cents above the market price. "Calves are delivered dehorned, castrated and ready to go," explained the manager.

The Pigeon Hill show string has a noteworthy record in breed contests, having won the grand champion bull banner at both the New York State and West Virginia State Fairs last year. In addition, Shearer and company had the grand and reserve grand champion bull at the Eastern National Livestock Exposition in Timonium last Fall.

Shearer is modest about his victories and the procedures he puts to use towards bringing champion animals into the ring. He says a lot of it is just a simple matter of taking your time. And he noted that it takes years to build up a good herd.

Describing himself as just "a general farm boy" with 4-H and FFA activities as his background, Shearer looks to a good future in the beef business. Times aren't the best now, he acknowleges, but a solid future is there for those who take their work seriously.

One of the major satisfactions Shearer and many others, like him, get out of the show ring is knowing that a breeding program is paying off in dollars and recognition. "In the purebred business, if you do a lot of your own breeding and raise your own replacements, that means a lot. Anybody can buy them (the champions) if they have the money," he explained.

Most of the foundation stock at Pigeon Hill Farm was purchased out of the Arthur Godfrey herd in Virginia. Shearer's job for the past five years has been to improve upon the quality of the cattle from generation to generation. His assistant during the Farm Show was Don Sunday.

Terry Shearer, manager of Pigeon Hill Farm for the past five years, has come up with a number of champions during his career, including this grand champion Hereford bull at last week's Farm Show.

NCEN moves

ARLINGTON, Va. – The National Commission on Egg Nutrition (NCEN) will move from Park Ridge, Ill., to Arlington, Va., effective January 25, it was announced by Hendrik Wentink, NCEN's chairman.

NCEN's new address will be: National Commission on Egg Nutrition, 1815 N. Lynn Street, Suite 801, Arlington, Va. 22209. Phone: 703-522-1366.

COST

CUTTER

The cost of diesel fuel has jumped nearly 80 percent since October, 1973 and it's still about three cents a gallon cheaper than gasoline. Higher fuel costs call for a closer look at total operating costs when you buy engines. Deutz air-cooled engines use 20 to 40 percent less fuel than most water-cooled diesel engines - far less than gasoline engines. And they are competitively priced. So hadn't you better buy or specify the cost cutter - Deutz? 10 to 500 bhp.

Pa. Angus Queen is determined cattlewoman

HARRISBURG – Sarah Fretz, the newly chosen Pennsylvania Angus Queen for 1978, is no ordinary young woman of 15. Dressed in her stockman's clothes with her long, fine brown hair tumbling out from under her cattleman's hat, she seemed to gain a decade of years in maturity and insight as she explained her goals for the future during Farm Show festivities last week.

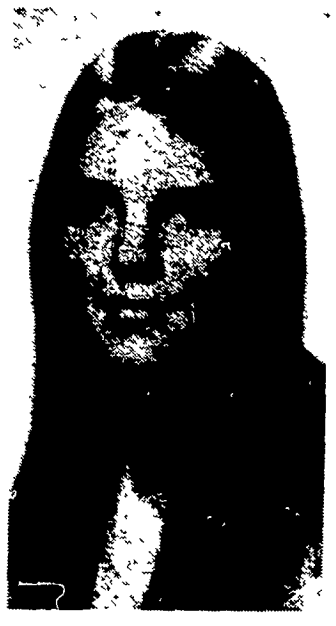
"I plan to attend Penn State University for pre-veterinary science," stated the teenage daughter of Mr. and Mrs. John Fretz, Pocket Valley Farm, Zionsville R1, with conviction.

When asked if this goal precludes owning her own farm, the slight, but determined young woman declared, "Oh, no. I definitely plan to own my own farm, as well. I hope to raise Angus cattle, Hampshire sheep, and crossbred hogs."

Already started on her agriculture career, Miss Fretz owns 11 head of Angus cattle and one acre of land on her father's 200 acre Lehigh County farm. She also raises sheep and swine.

A nearly self-sufficient cattlewoman, Miss Fretz helps her father and maintains her own herd at the same time. Her hay and bedding supplies are reimbursement for work on the farm in the Summer.

Always involved in the outdoor activities rather than the household chores of the farm, Miss Fretz has been active in 4-H for six years, starting at the age of nine. She is now a member of the Lehigh County 4-H Baby Beef Club, the Lehigh County 4-H Swine Club, and the Lehigh County 4-H Sheep and Lamb Club. According to information from the Pennsylvania Angus Association, she "has never shown anything but black steers," having raised eight registered Angus heifers over the past five years. She has also shown many of these at national shows and expositions, and has sold cows and heifers at the annual Pennsylvania Angus Association's sale.



Sarah Fretz

A leader rather than a follower, Miss Fretz was named the outstanding member of the Lehigh County 4-H Beef Club last year, and in 1976 was given an award by the Ladies Auxiliary of the American Angus Association for outstanding work with Angus cattle. A member of the Pennsylvania Eastern Junior Angus Association, she is currently the secretary-treasurer.

As part of her cattle program, Miss Fretz has sent an Angus bull calf to the Penn State bull test station where in 1975 the animal tested out as the highest bull of Angus that year.

In keeping with her interests, Miss Fretz says she is saving all the money she earns from her stock to buy a truck as well as finance her college education, which she will begin in her senior year of high school.

Simmental imports okayed

NEW YORK, N.Y. – The U.S. Department of Agriculture has officially recognized purebred Simmental cattle registered in Ireland as qualifying for duty-free importation into the United States.

Officials of USDA's Animal and Plant Health Inspection Service said USDA recognition of the breed permits pedigreed animals to be granted free entry if accompanied by certificates of pure breeding. The action was taken after examining the books of record and the rules for entry for the Irish Simmental Cattle Society, Ltd., Springhill Carrigtwohill, County Cork, Ireland.

Under the federal law authorizing duty-free importation of purebred livestock, USDA has recognized about 15 breeds of cattle registered in Canada and nearly 30 cattle breeds registered in other nations.

Local group gearing up

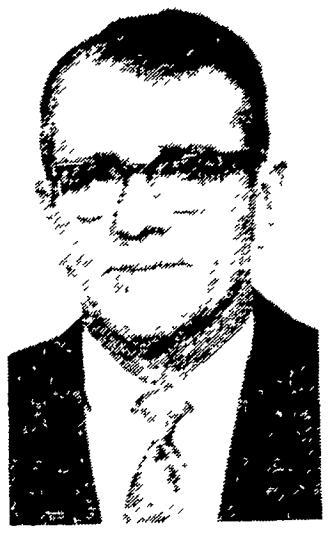
Kreider attending HPI meeting in Arkansas

MANHEIM -- Leon Kreider of Quarryville is representing Southeastern Pennsylvania's Heifer Project committee at the annual meeting of Heifer Project International (HPI) this week in Little Rock, Ark., to help plan HPI's livestock placement program for 1978.

Krieder was selected to participate in the national get-together at a recent meeting of the local Heifer Project Committee at the home of Clarence L. Keener, Manheim. At that time a goal of 150 heifers was set for the group to "round up" in 1978.

The following are the names of "contact workers" who will be inviting gifts of animals and dollars to reach the new goal: Lebanon County (goal of 20) – Victor Ziegler (717-866-4088), Myerstown; and Alvin Weaver (717-865-4549), Jonestown; Lancaster County (goal of 100) – Leon Krieder (717-284-4515), Quarryville; John Metzler (215-593-5202), Christiana, Earl Umble (717-393-3208), Lancaster, Cassel Mummau (717-653-4435), Mr. Joy, and Arthur Wenger (717-665-3862), Richard Keller (717-665-4808), Daniel L. Martin (717-626-5597), Clifford Gibble (717-665-4252) and Clarence Keener (717-665-2361), all in the Manheim area; and Adin Frey, Chambersburg (717-264-3515) with a goal of 30. Other persons who participate in the local committee are Mrs. Nancy Brown of Lancaster, the Rev. Mrs. Ruth Mary Summy of Penryn, John Cassel of Manheim, and the Rev. Norman Harsh of Manheim.

The local committee has selected the following officers for 1978: Clarence L. Keener, chairman; Clifford N. Gibble, treasurer; and Norman Harsh, secretary.



Leon Kreider

1978 marks the tenth year of organized effort in the southeastern part of Pennsylvania to send local heifers to needy areas of the world through Heifer Project International. Last year, 145 heifers were sent to Tanzania via the HPI ranch in Arkansas; in 1968, 10 heifers made up the area's gift. A total of 439 animals have been sent to six countries in the nine-year period. Most recently, the local committee has participated in a major effort by HPI to establish a 1000-cow foundation herd in Tanzania, until recently a dairyless nation.

Last year's effort saw the expenditure by Keener of $11,825 to purchase heifers, as well as the disbursement of $197 to pay the expense of the local represenatative to the annual conclave in Little Rock. The 145 heifers that were shipped had an average market value of $300 each, for a total value of $43,500. While other "contact workers" received small amounts of cash gifts, the major part of the overall contributions came from farmers who donated one or more heifers while other dairymen "sold" animals for token prices to stretch the contributed dollars of non-farm supporters. Local administrative costs (telephone calls and necessary paper work) are completely volunteered by the committee members. Shipping, veterinary, and other costs are cared for by the "parent,' HPI in Little Rock, Ark.

Gifts to help attain the 1978 goal may be given by individuals, church, and civic groups to any of the persons named above, but especially to the new treasurer, Clifford N. Gibble, 325 N. Gramby St., Manheim, Pa. 17545.

A 1978 collection and shipping schedule will be announced in the Spring, determined in part by the outcomes of the HPI meetings attended by Kreider this week. In the meantime, church and civic groups will be organizing fund-raising affairs to generate funds desired for one of the finest self-help programs by which the hungry people of the world are being fed.

GROWN FOR EASTERN FARMS

Doebler's Hybrids, Inc. is a family operated seed business started 40 years ago. The main farm and production area is located in Pennsylvania's Clinton County near Lock Haven. In 1977 Doeblers planted 1300 acres of seed corn at their Pennsylvania location and 900 additional acres in the mid-west. Hybrid seed corn sales have steadily increased thru the years to a point now where between 400,000 and 500,000 acres of eastern corn fields are planted with Doeblers. Farmer users particularly like the adaptability, the high quality seed, the 56 lbs. bags, the comparative test results, and the realistic prices of Doeblers. If these things interest you, contact one of Doebler's 302 dealers for details and prices.

'77 RESEARCH REPORT

Doeblers planted 7600 rows of new research pedigrees in 8 eastern locations. In addition 774 hybrid numbers were planted in 104 farm strip tests!! It was a good year for research and many new superior pedigrees were sorted out for possible future release.

— MEDIUM AND FULL SEASON HYBRIDS —

89X SINGLE CROSS - 123 DAYS

New in '74, 89X has gained many users each year. Ideal long-ear type on a good stalk. Fits the full season areas of southeast Pennsylvania, Maryland and Delaware for maturity. Very upright leaves and good blight tolerance. Had highest yield in Maryland's 1977 M.C.I. test of 105 hybrids–162.9 bu. dry shelled corn per acre!!

80X SINGLE CROSS - 115 DAYS

A super hybrid, 80X is the straight single of the modified 800-3 way. It is very uniform, has an ideal ear type and is protected with multi-gene blight resistance. An excellent stander. This is a difficult hybrid for us to produce, but is something very special when farmer planted. Check comparative tests on this one!!

78X SINGLE CROSS - 112 DAYS

An all new upright leaf hybrid with fantastic yield potential, 78X in plots in 1975 broke the 200 bu. dry shelled barrier with yields of 253.8 bu. and 248.4 bu. in various Pennsylvania locations. Look for a good sized plant, a vigorous grower, a good stander and a larger than usual ear.

70X SINGLE CROSS - 110 DAYS

New in 1973, 70X is already Doebler's most popular 700 maturity hybrid. Expect high yields, fast dry down and a hard cob for picker shelling. Fits especially well as an early corn in full season areas. Had dark green, rank appearance. In the '76 Pa. Commercial Corn Trials, 70X was a top hybrid, 11.4 bu. beter than the report average!!

800-3 WAY - 115 DAYS

800-3 way is outstanding in yield, standup and tolerance to thick planting and drought. Look for a close attached ear of substantial length and girth. Has highest 5 year average in Dorchester Co., Maryland extension test–136.2 bu. dry shelled corn per acre.

788-3 WAY - 112 DAYS

This is another Doebler modified single cross being offered as a 3-way cross. This time it is a modified 78X, the new super hydrid. 788-3 has the same characteristics but will appear a little less uniform and sell better at the lower 3-way price. Will also make excellent silage!!

Cooperatives proven effective

Farm strike has history of failure

EDITOR'S NOTE: If farm strikes and witholding actions of previous decades are any indication, the current national farm strike will die a failure. Farmers cooperatives, on the other hand, have brought some benefits to American agriculture. The following historical perspective was prepared by the United States Department of Agriculture.

The idea of withholding farm products from the market until a higher price can be obtained has a great deal of appeal. Many business enterprises have demonstrated the effectiveness of orderly or controlled marketing. Various farm groups have worked toward this goal at several periods in American histroy, yet none has succeeded in obtainilng better market prices for farm products except for very short periods or for limited commodities.

The Southern Cotton Association, active from 1904 to 1908, is an early example. Members talked of voluntary acreage reduction, but also proposed strong measures to keep the price-depressing surpluses from market. In 1904, Texas farmers talked of burning a bale of cotton each, every Saturday for 15 weeks, to eliminate 2,000,000 bales that otherwise would be sold. Four years later, "night riders" attempted to keep some farmers from picking their cotton, and burned a number of gins. There was no measurable effect on the price of cotton.

At about the same time, farmers organized a number of cooperatives devoted to marketing specialized crops grown in limited areas particularly on the Pacific Coast. Many of these groups could effectively control marketing because their respective crops could be grown economically only in a limited area. Thay were successful, and most of them are still active.

Large-Scale Commodity Marketing

The success of cooperatives devoted to specialized crops led in 1920 to a new movement with the slogan "orderly commodity marketing and prosperity." Ideas developed by a California lawyer, Aaron Sapiro, contemplated state or regional single-commodity cooperatives, each controlling enough of its respective crop to be a decisive factor in determining prices. Regional and – after the American Farm Bureau Federation became active in the work – national marketing organizations were formed for cotton, tobacco, wheat, peanuts, rice, livestock, and may other products. Farmers signed "ironclad" contracts to market only through these groups.

These organizations of the early 1920's did not control enough of their crops to influence prices over any large area for long. For example, pools were formed to carry out orderly wheat marketing, with a goal of with holding wheat from sale until a satisfactory price could be received. In 1924-1925, ten pools, with 96,800 members, marketed nearly 28 million bushels of wheat, only 3.8 per cent of the U.S. commercial crop. Net returns to members appear to have been slightly less than to non-members.

In 1924-25, 15 large-scale cotton associations handled eight per cent of the total ginnings. In 1925, 28 associations marketed 1.9 million cattle and calves, out of a total of 24 million marketed. Such figures contrast with those of specialty crops grown in limited areas. The dried prune associations, for example, handled 42.4 per cent of the marketing in 1924-25, while the rice associations accounted for 26 per cent of that crop.

The attempt to control the marketing of widely-grown crops failed. Even where temporary price increases were obtained, non-members often profited more than members. Many of the large-scale cooperatives went out of business, although some of the groups survived as producers' cooperatives offering business services to their members.

The leaders of the "orderly commodity marketing'; group resigned from their positions in the American Farm Bureau Federation early in 1924, but were unable to establish strong, independent organizations. The Farm Bureau thereafter endorsed cooperative marketing, but did not promote the idea of obtaining control of the market through farmer action alone.

Federal Farm Board

Meanwhile, farmers were pressing for action by the federal government. President Coolidge vetoed the McNary-Haugen bill for farm assistance in 1927 and again in 1928, making farm policy an issue in the 1928 campaign. After Hoover became President, Congress passed the Agricultural Marketing Act, which the President signed on June 15, 1929. Voluntary orderly marketing through cooperatives, particularly with the idea of ending seasonal gluts, was emphaiszed by supporters of the Federal Farm Board, which was established by the act.

The Federal Farm Board helped farmers organize cooperative marketing associations and made loans to them. It also made loans to wheat and cotton stabilization corporations set up by the cooperatives to control surpluses that would tend to depress prices. However, the depression of 1929 and subsequent years doomed the Farm Board.

The last report of the Farm Board contained this perceptive comment: Experience with stabilization thus demonstrates that no measure for improving the price of farm products other than increasing the demand of consumers can be effective over a period of years unless it provides a more definite control of production than has been achieved so far. In a few limited and specialized lines, cooperative associations have made no progress toward such control. For the great staple products, however, the problem still remains for future solution....

Farm Holiday Movement

As the depression deepened, the farm situation became desperate. Midwestern farmers, faced with the loss of everything they owned, demanded strong action by the federal government. In Iowa, under the leadership of Milo Reno of the Iowa Farmers Union, farmers began talking on "farm strike." The strike was to be launched on July 4, 1932, under the slogan of "Stay at Home - Buy Nothing - Sell Nothing." It was sponsored by the new Farmers' Holiday Association, formed in Des Moines in May 1932. The title "holiday" was chosen because many of the banks which had closed had used the term. The rhetroic was impressive:

Let's call a "Farmers Holiday"
A Holiday let's hold
We'll eat our wheat and ham and eggs
And let them eat their gold.

The strike was postponed a month, and began in August. The first activity was in the Sioux City area, where roads were blockaded and some violence resulted. The movement spread to Des Moines and Omaha, while farmers converged on state capitals in the Midwest to demand farm relief legislation and moratoriums on mortgage foreclosures. The farmers won temporary victories by obtaining higher milk prices in Sioux City and Omaha, but the gains were erased when the picketing ceased.

When governors of several Midwestern States met in

Farm strike

(Continued from Page 106)

Iowa in September 1932, Farm Holiday member asked the governors to declare an embargo on the movement of farm produce across state lines. The governor of Minnesota offered to declare an embargo and enforce it with the state militia if the governors of neighboring states would join with him. They declined, and no action was taken.

Strike activities ceased for a month in September and then were renewed on a sporadic basis, extending into 1933. In many areas, the protesters began using force to stop foreclosure sales of farms. This resulted in some state legislation to ease the debt situation.

Another national farm strike was scheduled for May 13, 1933, but was called off, partly because the Agricultural Adjustment Act was signed on May 12, 1933. However, a milk strike was carried out in Wisconsin that May. When a newly-formed committee failed to get higher milk prices, Wisonsin dairy farmers again went on strike in October 1933. Milo Reno had called a "last resport" farm strike to begin on October 21, 1933, but it did not materialize. Another strike threat in November also was averted.

The Wisconsin milk strike of October 1933 resulted in considerable violence before it died out in mid-November. It was the last major move under the "Holiday" banner. Action by the governor of North Dakota to embargo wheat shipments was related to the holiday movement, but was not really part of it.

The farm strikes themselves did not raise the overall level of commodity prices. However, even their critics concede that they dramatized for the nation the serious plight of agriculture and brought about more immediate and vigorous action on the part of state and federal governments to ease the crisis.

Withholding Actions in the 1960's

For many years, the programs offered by the federal government and reasonably good market prices, plus steady increase in productivity, created a decent climate for farmers. However, by the late 1950's many farmers were caught in a price-cost squeeze. Oren Lee Staley, president of the National Farmers Organization, which had been concentrating on collective bargaining since the late 1950's, wrote in 1960: "When a sufficient number of farmers make up their minds to price their production and hold for that price they will get a price as long as it is fair and reasonable." In a membership appeal, the NFO said: "Holding actions are farmers determining a price for their products and holding for that price. Thus, they use the same principle that everyone in America has already found necessary to be successful in their business operations. Holding actions are only used to implement our collective bargaining program."

Holding actions by the NFO have been of two types. Test holding actions of short duration involving a limited number of commodities sought to determine farmer support and market reactions. All-out holding actions had the goal of reaching agreements with processors to "stabilize prices and marketing conditions in the future."

The NFO's first all-out holding action began on August 28, 1962, and ended on October 2, 1962. This action called for withholding hogs, cattle, sheep, corn, and soybeans. The second all-out action began on August 20, 1964, and ended on October 1, 1964. This action called for withholding livestock from market.

In March 1967, NFO members in 25 states sought to increase milk prices for farmers by 2 cents a quart through milk withholding and dumping. Going to court against the wishes of Agriculture Secretary Orville L. Freeman, the Department of Justice obtained a temporary order in Des Moines, Iowa, barring the NFO from any use of threats or force to gain outside support for its milk strike. The milk dumping ended early in April.

Early in 1968, the NFO asked its members to stop selling grain until prices rose. A month later the action was extended to meat animals. Local farm groups killed and buried substantial numbers of hogs in March and April. Some of the animals were donated to charity. These particular withholding actions appears to have ended in April or May. The NFP actions were largely ineffective in raising prices.

Farm Withholding in the 1970's

During the 1970's, a number of local farm groups withheld or destroyed farm commodities. Large quantities of potatoes were destroyed in Virginia and Washington in the Spring of 1970. In the fall of the same year, many poultry producers in Alabama suspended operations for a short time. Dairy and beef producers in some areas undertook dramatic programs in the Fall of 1974. Most controversial was the slaughter and burial of calves in Minnesota and elsewhere. In some instances, the meat was donated to disaster victims. In many cities, NFO dairy farmers sold cheddar cheese from the backs of trucks at half the usual prices, claiming that they could not sell it in the usual distribution systems for even that much. A few weeks earlier, the president of the Georgia Farm Bureau Federation urged farmers to keep corn and soybeans off the market until prices advanced.

Protests continued into 1975, with the sporadic donation or destruction of calves, beef cattle, chickens, potatoes, and other commodities. For example, calves were slaughtered in a Texas community and the carcasses were given to needy persons. In other areas, ground beef was sold in cities by farmers off the backs of trucks at bargain prices, just as cheese had been a year earlier. Potatoes were burned or donated to the poor.

In the Fall of 1977, a new farm organization, American Agriculture, called for a national strike by farmers for better prices, and began setting up offices in farm areas. The parades of farmers with their tractors in rural areas, like the one in Plains, Georgia, on November 25, were partly to urge support for a nationwide farm strike on December 14.

Actions in recent years have had the same effect as the widespread actions of the 1930's. They have dramatized the cost-price squeeze faced by farmers as prices of farm products have declines and the prices of goods - such as gasoline, machinery, and fertilizer - purchased by farmers have continued to rise. More people are being made aware that the farmer is receiving a smaller and smaller proportion of every dollar spent for food, - but, the final effects of this year's actions are still to be measured.

Packer violating P & S Act

MAINLAND – T. M. Lanids, Inc., Mainland, a meat packing firm which purchases livestock for slaughter pruposes in southeastern Pennsylvania, northern Maryland, and the Shenandoah Valley area of Virginia, has been ordered to cease and desist from violating bonding requirements of a federal fair trade practices law for the livestock, poultry, and meat industries. The firm has now fued a bond, as required under the Packers and Stockyards (P & S) Act.

The cease and desist order, like a permanent injunction, was issued to insure future compliance with the Act.

T. M. Landis, Inc., consented to the order and waived oral hearing. The firm neither admitted nor denied the charges in an administrative complaint filed under the P & S Act.

40 yr. hog grower is Swine Breeder of Yr.

By JOANNE SPAHR

HARRISBURG – "I sure ıdn't expect it," shrugged a ıury, goateed Russel Corn-ılower after being named he Purebred Swine Breeder ıf the Year by the Penn-ylvania Swine Breeders Co-p.

"But I guess ıt's kınd of ıke a hog show–I like to see .he champion sow honors go .o the older one 'cause I 'ıgure the younger ones still ıave a chance," cracked the 61-year-old hog farmer from New Freedom R1 with a eprechaun-like grin.

Cornblower, who can't tell ı story wihtout a chuckle, .vas honored last Wednesday ıt the Pennsylvania Farm Show for over 40 years of ınvlovement in the purebred Berkshire business. Corn-'lower, who has been showing Berks at Farm Show since 1947, was chosen out of 350 individuals in the Pennsylvania Swine Breeders Co-op as their outstanding member. The co-op ıs the governing organization runnıng the Pennsylvania Farm Show swine competitıon and sale, and every exhibitor at the January show ıs a member. Last year's award winner was J. E. Lanıus of York R6.

At present Cornblower's operatıon consits of roughly 25 head of Berkshire sows fed in the bottom of a bank barn wıth the sows kept out ın lots. Most of the young pıgs are then fed to the market weıght of about 215 pounds.

Cornblower says he keeps the sows ın lots because he believes the pigs develop stronger through thıs method.

"But I don't think you can tell anybody how to raise pigs," says the experienced hog grower, "each person just has to decide for himself what will work for him."

Cornblower's acreage consists of 40 acres on the home farm, 40 acres on his mother's farm, and about 150 tillable acres farmed on the share.

Now ın partnership wıth hıs son Arlie, Cornblower raises practically all the feed for hıs animals.

Along wıth the hogs, the Cornblowers tend about 20 head of mixed cattle, raise about 200 capons a year (half of which they dress), and grow about 200 head of Muscovy ducks. They also sell hay.

Avid showmen, the elder Cornblower and his son have been involved in competition sınce Arlıe turned 14. Although they've slowed down in the past few years, the Cornblowers still compete ın the York Fair, at the Maryland State Fair in Tımonium, and at the Farm Show.

After 31 years at the Pennsylvania Farm Show, Cornblower has seen quite a few changes take place, although not as rapidly as he might like.

"It takes about 10 years from the time you make a suggestion until they implement the change," he jokes with a twinkle in his eye. "It kind of makes you feel good–it makes you think you really knew what you were talking about, after all."

As an example Cornblower points out that this year for the first time, all swine exhibitors were finally able to remove their animals after the sales.

Carcass shows have also changed in the past 40 eyars. According to Cornblower, Berkshires used to do relatively well, but when the ham/loin percentage became ımportant, the Berks dropped a bit in the carcass standings.

As far as changes in the hog busıness, in general, Cornblower says modern technology and medicine have ımproved the lot of the hog farmer by quite a bit.

"If you're on the ball, today, you can pick up on diseases and be on top of things," states the York County hog grower.

"When I first got pıgs, it took years to know what scours was, but today, with penicillin, and other drugs, you're way ahead."

A man who learned to pick a good hog by "eyeballing" it, Cornblower says that, today, he looks for something with eye appeal.

"That means a good underline, no genetic defects, a good ham and loin, and trimness," states the long-time swine breeder.

After 40 years in the business, Cornblower should know what to look for, and according to the award presented to him last Wednesday, he apparently does.

Russel Cornblower, New Freedom R1 (left) was the recipient of this year's Purebred Swine Breeder of the Year award presented by the Pennsylvania Swine Breeders co-op at the Pennsylvania Farm Show. Cornbower, a Berkshire breeder, has been in the hog business for 40 years. Bestowing the award was Dennis Grumbine, Myerstown R2, president of the organization.

Delmarva soybean meeting set for Feb.

OCEAN CITY, Md.–This year's Delmarva soybean meeting will be held ın Ocean City, MD. The annual crop meeting has been scheduled for February 2 at the Ocean City Convention Hall. Doors will be open from 8:30 a.m. to 3:30 p.m. The program itself will start at 9:45 a.m.

Highlights of this year's meeting will a panel discussion South American oybean production; a panel on soybean insects and their control; a talk on factors affecting soybean marketing; and a talk on "Everything You Wanted to Know About Soybean Problems but Were Afraid to Ask."

Master of ceremonies for the event will be Virgil E. Adams, Extension news editor from the University of Georgia.

The Delmarva soybean meeting is sponsored by soybean processors, allied agricultural industries and the Cooperative Extension Services of Delaware, Maryland, and Virginia. For further information, contact a county Extension agent or agribusiness firms.

York COUNTY DHIA MONTHLY REPORT

DECEMBER

A high record of 1,057 lbs. butterfat and 24,292 lbs. milk was provided by Jet Star, a 6 year old registered Holstein owned by Stump Acres, York. Second high was Angela a 6 year old registered Holstein owned by Earl Fuhrman, Hanover who produced 22,672 lbs. milk and 943 lbs. butterfat.

The high herd was Sinking Spring Farms, York, with 68.4 cows producing 54.6 lbs. milk and 2.16 lbs. butterfat. Second high was Lynn Wolf, Abbottstown, with 40.8 cows producing 55.9 lbs. milk and 2.05 lbs. butterfat.

Virginville Grange

VIRGINVILLE – The Virginville Grange met on January 4 for their monthly meeting. Plans were made at the time to attend the Kutztown Folk Festival and make funnel cakes.

Upcoming events include a dance on January 21 at the Grange hall. The February 1 meeting will include a speaker on wills. Then, on March 10 and 11, the county youth will perform a play entitled "Quit Your Kidding," at Fleetwood. The time is 8 p.m.

The juniors are collecting Campbell's soup labels for a projector for the deaf.

Sixty - second was the first for six

By DIETER KRIEG

HARRISBURG – The 1978 Farm Show was the 62nd, but for the Richard Peoples family of Volant it was the first.

That may be true for many another family as well, but that's probably where the similarity would end when you consider that all six Volant children came to the Farm Show as exhibitors. What's more, they all had Shorthorn beef cattle.

With that kind of representation in the show ring, it comes as no surprise that the Peoples family collected a few of the top ribbons, including first-place junior heifer calf, first-place Winter heifer calf, first-place senior heifer calf, first-place 2-year old bull, and best get-of-sire The family also had the champion and reserve champion senior bull, reserve grand champion bull, reserve junior champion bull, and reserve champion female calf.

Newcomers that they were to the Farm Show, the six Peoples from western Pennsylvania are not novices in the show ring. All but the eldest of the group, Richard, are members of the Lawrence County Baby Beef Club. This past Summer they showed at eight county fairs in Pennsylvania and neighboring Ohio, coming away with at least one championship ribbon from each. They've also exhibited their cattle at the Keystone Exposition, where they had the senior champion bull last year.

The six young adults who will remember 1978 as the first year they came to the Pennsylvania State Farm Show are, clockwise, Sheila, Jean, Marc, Richard, Joan and Eric. They're the children of Mr. and Mrs. Richard Peoples, Volant R2, and they all participated in exhibiting Shorthorn cattle in Harrisburg. Among their entries was this bull which stood as senior champion of the show.

With this having been their first Farm Show, the six young adults have some obvious first impressions.

Sheila, 16, said she enjoyed the Farm Show and was impressed with how the management had everything organized. She was surprised at some of the comments she heard from the visitors because it demonstrated how beef industry information isn't picked up by the general public. "I'd like to teach them something so they won't be as scared of the animals," the young lady commented.

While offering praise for the management of the Farm Show, Sheila did think that they should be able to do something about the throwing of trash and cider bottles in the Large Arena. She and others find the unruly conduct extremely annoying and oftentimes dangerous. "It's not funny when animals get out of hand, and it breaks our concentration, especially when you know the judge is looking at you," she commented. "Other than that, people have been really nice – I didn't expect it to be this nice – I like it, and the food was really good too," she concluded.

For Marc, also 16, the higher grade of competition was the highlight of the Farm Show. He likes the competitive spirit and atmosphere of an event like this, and admits the Farm Show is "a lot bigger than what I'm used to." He says he got lost when he first came.

Richard, 22, cut classes at Youngstown State College in order to join the rest of the family at the Farm Show. In his senior year towards a career in mechanical engineering, the young man sees the Farm Show as an event where exhibitors only bring the best they have to offer.

Learning more about fitting and showing was the big plus for 18-year-old Eric. He appreciated meeting different people and observing their techniques. To him, the Farm Show's contests are almost businesslike.

Twins Jean and Joan, 14, summed up their opinions of the Farm Show by saying they enjoyed it, except for the distractions which take place in the Large Arena. "We'd like to come back again next year," they both agreed.

Jean, Joan, Sheila, Eric, Marc, and Richard are the children of Mr. and Mrs. Richard Peoples, owners of the Mapleview Shorthorn Ranch near Volant. A former construction worker who spent his boyhood on a farm, the elder Peoples got into the cattle business in 1970. The family owns 184 acres and manages a cow and calf operation of 50 cows.

$9 top selling price for Farm Show lamb

HARRISBURG – Although no record prices were set during the annual sale of market lambs at the 62nd Annual Farm Show last week, figures were well above current market prices.

Julie Kuzemchak of 289 South Main Street, Pleasant Gap, Centre County, received $9 per pound for her grand champion individual lamb, a 122-pound Suffolk. Buyer was George's Foodliner Market, Bethlehem. The record price of $32 was set in 1972.

The grand champion pair of lambs, Hampshires, exhibited by Christian Herr, Narvon R2, was sold to Fox Markets of Middletown for 2.70 per pound. The record price for pairs was $4.25 set wo years ago.

The grand champion carcass lamb weighing 53 pounds and exhibited by Barbara Lynn Herr of Narvon R2, was sold to George's Foodliner Market for $2 60 per pound The record price in carcass asses is $5 per pound.

The reserve champion individual lamb, a 112-pound Suffolk exhibited by Sarah Brubaker of 2418 Harrisburg Pike, Lancaster, was sold to Donald Templeton of Ebensburg for $5.75 per pound.

The reserve grand champion pair of lambs, Hampshires, consigned by Brian Zerby of Knoxville R1, Tioga County, was sold to Acme Markets, of 124 North 15th Street, Philadelphia, for $2.20 per pound.

The resve champion carcass lamb, exhibited by Margaret Herr of Narvon R2, was purchased by Hornblower, Weeks, Noyes and Trask, Inc., of 189 North Queen Street, Lancaster, for $2.20 per pound.

Bred gilt sales average $247 at Farm Show

HARRISBURG – In sales of swine breeding stock at last week's Pennsylvania Farm Show, a grand total of 241 animals were sold with an average price of $246.84 per animal and a total volume of $59,490.

The grand champion Landrace gilt, "RA Jan 2nd 2-10," consigned by Tim Wessner, New Tripoli R2, was sold to Jay Blatt, Annville R2, for $600.

The reserve champion Landrace, consigned by Tim Blatt, Annville R2, was sold to Harlan Wessner, New Tripoli R2, for $435.

The average of the 27 animals in that sale was $330.55 with a total volume at $8,925.

In the Yorkshire sale, Calvin Lazarus & Son of Whitehall purchased the grand champion gilt consigned by Real Farms, Inc., of Tipton, Blair County.

The reserve champion, also consigned by Real Farms, was sold to William Buckman of Perkasie R1, for $420.

This breed sale totaled $10,350 for 38 animals and averaged $272.30 per animal.

The Spotted Swine sale grossed $8,830 for 41 animals with an average of $215.36 per animal. The grand champion of that breed, consigned by Lazarus Brothers of Germansville R1, was sold to Wayne Peffer of Carlisle for $370.

The reserve champion, "Scottown Shine," consigned by Wendell McKissick of Slippery Rock R3, was sold to Carol Burruss of Carlisle for $285.

The Poland China sale on Tuesday averaged the lowest of all the sales at $158.95 per animal. At a total of 19 animals in the sale, the gross volume was $3,020.

The grand champion Poland gilt, "M.C. Queen Melda," consigned by Keith McConnell of Volant, Lawrence County, was sold to Daniel Poole of Jefferson R2, Md., for $300.

The reserve champion "M.C. Delightful Girl," also consigned by Keith McConnell, was sold to Rocky Acres Farm of New Tripoli for $250.

The sales were completed on Wednesday with Chester Whites, Durocs, Berkshires, and Hampshires up for bids. Wednesday's shows were generally lower than those paid for last year's bred gilts.

The grand champion Chester White, "T.M. Sunup," consigned by James T. Parlett, Airville R2, was sold to Paul Panish of Iowa for $525.

The reserve champion Chester White, "T.M. Pansy," also consigned by Parlett, was sold to Terry Berkman of Rockwood R1. Berkman paid $340. That sale averaged $221.03 per animal for 29 gilts. The total volume of the sale came to $6,410.

The highest averaging sale for Wednesday was in the duroc breed with 40 animals selling for a total volume of $12,715 at an average of $317.99 per animals. The grand champion of that show, "DUF Hex Lass," consigned by Dutch Valley Farm, Manheim R5, sold to Rick Pfautz, Stevens, for $610.

The reserve champion, "K.D.F. Miss Moose," consigned by Kenneth Fetterolf of Centre Hall R1, was sold to Sherman Allen of Conneaut Lake for $470.

In the Berkshire sale, the grand champion gilt was purchased by George Innerset of Red Lion for $350. That animal had been consigned to the sale by Clayton Winebark of Rochester Mills R1.

The reserve grand champion Berkshire, "L.H.F. Master Maid," was also consigned by Winebark and was sold to Chris States of Homer City for $355.

The total number of animals in the Berkshire sale came to 28 with a total volume of $5,150, and an average price per animal at $187.50.

In the Hampshire sale, the grand champion gilt, "Blue Mountain Girl," consigned by Charles Bomgardner, Annville R3, was sold to Allen Farms and Sherman Allen of Conneaut Lake for $390.

The reserve champion "Miss Lusk," was purchased by Glenn Benner of Millerstown R2 for $330. The animal was consigned to the sale by Earl Rabenold, Kutztown R2. The number of animals in the Hampshire sale came to 19 with a total volume of $4090 and an average price per animal at $215.26.

Produce firm loses license

NEW YORK, N.Y. – The produce trading license of World Commodity Corp. of Union City, N.J., was suspended by the U.S. Department of Agriculture (USDA) for failure to pay a $17,615 reparation award issued by USDA in favor of a Florida broker for a trucklot of vegetables shipped in March 1977.

USDA's Agricultural Marketing Service ordered payment of the award after the firm failed to anwere the charges in the complaint.

As a result, Jose M. Seijas--the firm's officer, director, and major stockholder--is not eligible to operate in the produce business under the Perishable Agricultural Commodities Act (PACA) until he satisfies the award. Furthermore, he may not be employed by or affiliated with any licensed firm without USDA approval.

The PACA establishes a code of good business conduct for the produce industry. It requires that interstate traders in fresh and frozen fruits and vegetables be licensed and authorizes USDA to suspend or revoke a trader's license for violating the Act.

Erosion complaints received

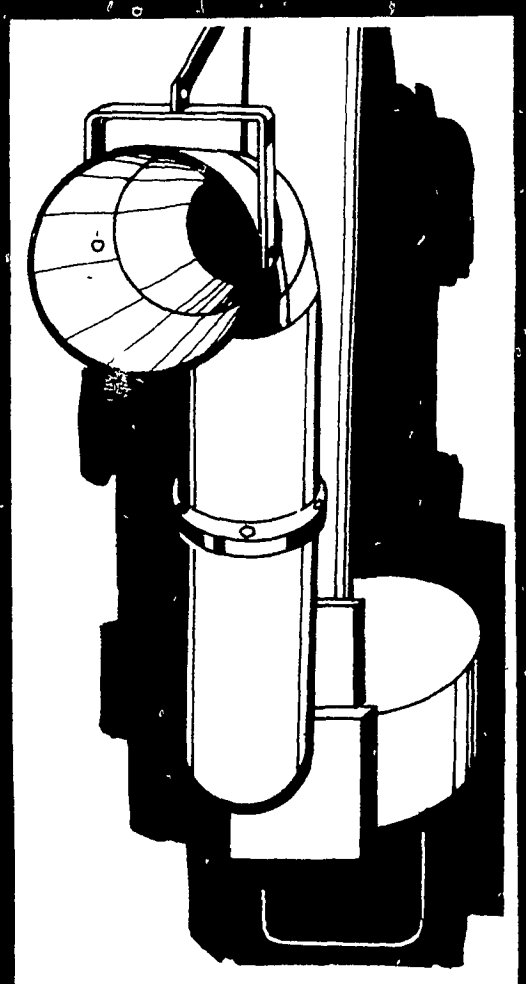
HARRISBURG – Afton Schadel, chief of the Department of Environmental Resources' Division of Soil Resources, says the Department, legislators and elected municipal officials have been receiving complaints from sportsmen and property owners about damage caused by soil washing from farmland.

When complaints are received, Schadel explained, DER-designated inspectors contact the property owner where the problem seems to begin. They locate the source of the problem and try to secure voluntary correction of the condition. No violation actions are taken when voluntary corrective measures are implemented.

DER is charged under the Clean Streams Law and its implementing regulations with preventing accelerated soil erosion and sedimentation. When landowners refuse to correct the condition and to conduct further land disturbing activities according to an erosion and sedimentation control plan, the Department is obliged to initiate compliance actions.

The DER spokesperson observed that the Department does not receive complaints about farmers or landowners who use conservation plans.

New!
Super-Charged!
BN103 Pump/Agitator.
...the capacity leader



The Badger BN 103 Pump/Agitator will **out-agitate**... **out-pump**...and **out-last** any other pit pump/agitator on the market today! It can fill a 3000 gallon tank in less than a minute! And the BN 103 is built to keep running hour after hour...in the heaviest material. The BN 103 is "super-charged" by special external cutter blades that force **more** material into the impeller...for a smoother, more uniform flow.

See your Badger dealer for complete details on the BN 103 Pump/Agitator...THE CAPACITY LEADER!

See your Badger Dealer for complete details.

Walebe Farms exhibited top Jersey

HARRISBURG -- For Karen and Cindy Waltemyer, preparing a small herd of cows for the Farm Show meant moving their cattle to different facilities and a whole new system.

The Waltemyer sisters are the daughters of Mr. and Mrs. Earl Waltemyer of Walebe Farms, Collegeville. A total of 400 cows are milked there, and as one might guess, free-stall housing and carousel parlors are not the ideal places for show cows. At least it's not easy to get them ready in those kind of facilities.

So for three weeks prior to the opening of the 62nd annual Pennsylvania Farm Show, Karen and Cindy arose bright and early each morning to feed, milk, brush, and clean the family's nine show cows. They were stabled in a different barn during that period and were milked with a portable machine – the same one they often use at fairs and shows.

The two girls went through the same routines twice each day. In the morning, before school, and once more after school. Leading and training the animals was also a part of the program, which in Cindy's estimation took up about five hours of their time each day.

The effort is all worth it, Cindy assures, expressing a love for dairy cattle and a desire to work with them as a veterinarian following graduation from the Virginia Polytechnic Institute. Presently, however, Cindy is still in high school. A former Montgomery County dairy princess, she is well versed in the dairy business.

Proof that Cindy and Karen did an outstanding job with their cattle can be had when one recognizes that Walebe Farms captured the grand championship of the show and the premier exhibitor banner.

Walebe Milestone Mimi, a 4-year old, stood as champion of the show, besting an entry by C.A. and Emmitt Rhein of Pine Grove. They showed a 6-year old named WK Advancer Sleeper BJ.

Cindy Waltemyer, 17, is a young dairy enthusiasts, who, like her father, believes that if the farmer has something to show, he should do it to the best of his ability. Walebe Farms' Jersey "display" is considered to be one of the finest, attracting many compliments from visitors. They do a good job of housekeeping too and placed second at the Farm Show this year among all the many competitors the week-long event hosted.

The junior champion of the show was a senior yearling, Quicksilver Pilots Sparkle Jam, shown by Karen Waltemyer. Denise Andrien of West Chester picked up the reserve banner with Shady-H11 SD VSS Liberty, a heifer calf.

Mildred Seeds of Downingtown was the premier breeder of the show.

In the yough division of the contests, Stephanie Cocher of Mansfield went to the top, followed by Cindy Waltemyer. Details follow, with youth division placings fiven in parentheses.

Heifer Calf

1. (1) Lori Sollenberger, Everett; 2. Mildred Seeds, 3. Denise Andrien, 4. (2) Elizabeth Wallaston, Toughkenamon.

Junior Yearling

1. Denise Andrien, 2. Ray Sollenberger, Everett; 3. Craig Rhein, Pine Grove; 4. Cindy Waltemyer.

Senior Yearling

1. Karen Waltemyer, 2. (1) Leon Sollenberger, Everett; 3. Bruce Heller, 4. (2) Philip Tischler, Downingtown.

3 or 4 Year Old Dry Cow

1. (1) Cindy Waltemyer, 2. (2) Lori Sollenberger.

Aged Dry Cows

1. Bruce Andrien, West

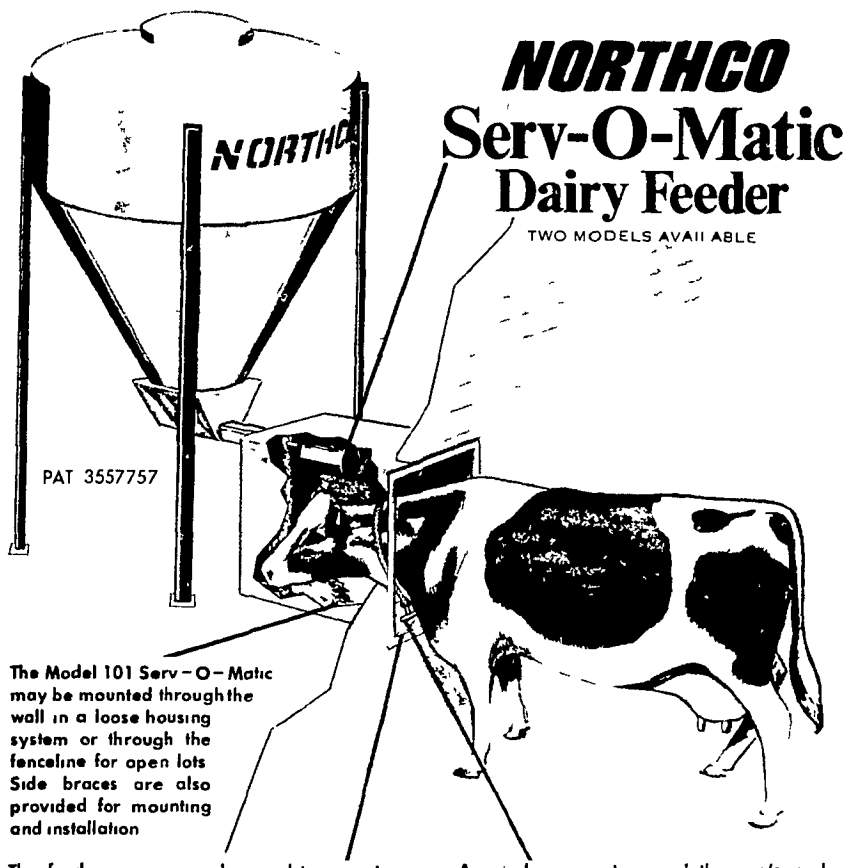
NORTHCO

Serv-O-Matic Dairy Feeder

TWO MODELS AVAILABLE



The Model 101 Serv-O-Matic may be mounted through the wall in a loose housing system or through the fenceline for open lots Side braces are also provided for mounting and installation

The feeder opening is designed to permit only one cow to eat at a time A 2 inch auger drops approximately 1 lb of concentrate per minute into the feeder this is the same rate the cow eats no feed remains in the feeder when she moves away

A simple magnet around the cow's neck will activate the feeder motor as she places her head into the feeder Cows without a magnet are unable to get feed

"Selectively" Provides More Feed to Top Producers

The Serv-O-Matic Dairy Feeder enables you to feed additional grain and concentrates only to the top producing cows in your herd! It eliminates the labor problem of separating the herd in a loose housing system to give individual attention to top producing animals.

The Serv-O-Matic is activated by a simple magnet fastened around the cow's neck. This way, only the cows you select can activate the feeder and receive additional ration . . . yet all animals can still be housed together.

Each cow producing 10 lb. or more over the herd average should receive extra feed. In actual trials, cows on the Serv-O-Matic consume an extra 10 lbs. of grain per day [while eating some less in the parlor]. Milk output shows an average increase of 1 lb. of milk for each pound of concentrate fed through the Serv-O-Matic . . . some as high as 5 lbs. of milk per pound of feed!

One Serv-O-Matic will normally handle 20-30 cows in an 80-120 cow herd. Normal procedure is to put fresh cows on extra ration and remove the magnet when production drops to a predetermined level.

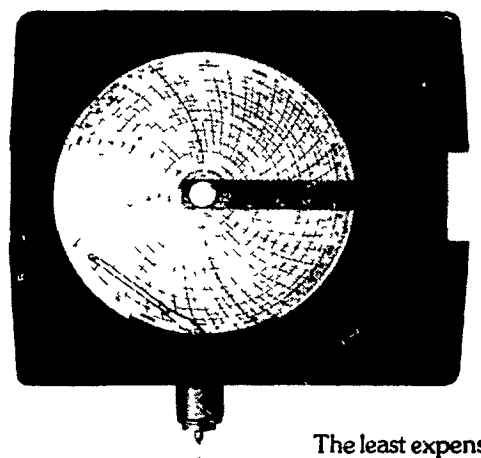
WHO'S MINDING THE MILK?



If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank Here's what it provides:

- Permanent proof that proper temperature was maintained.
- Record of cooling equipment efficiency.
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded.

Remember — if it prevents the loss of only one tank of product, the Sentinel has paid for itself It minds your milk.

Three USDA agencies merged

WASHINGTON, – The U.S. Department of Agriculture has created a new agency, the Economics, Statistics, and Cooperatives Service (ESCS), by the merger of the Economic Research Service, the Statistical Reporting Service, and the Farmer Cooperative Service, Secretary of Agriculture Bob Bergland announced recently.

"Our research efforts on the economics of agriculture, our research on cooperatives, and the reporting of agricultural statistical information are closely related," Secretary Bergland said. "The merger will enhance coordination of these activities and make the entire operation more efficient."

Secretary Bergland designated Kenneth R. Farrell, formerly deputy administrator of the Economic Research Service, to be acting ESCS administator. The new agency reports directly to USDA's director of economics, policy analysis, and budget, Howard W. Hjort.

Some of the key functions of the new agency are to:

—Provide economic analysis on domestic and international agricultural supply and demand; on food supplies and prices, nutrition and labeling; on the production distribution and marketing of agricultural products; on the management of natural resources, and on development of rural communities and the welfare of rural people.

—Collect and report statistical information on U.S. agriculture, including estimates of crop and livestock production, demand and supply.

—Provide research and technical assistance on the economic and marketing aspects of cooperatives.

Farm and Home Foundation meets

LANCASTER – The annual meeting of the Lancaster County Farm and Home Foundation will be held this coming Thursday evening at the Farm and Home Center. A meal will be served, beginning at 6:30 p.m.

The guest speaker for the event is former congressman Edwin D. Eshelman.

Know Where the Activities Will Be?

Brown Swiss

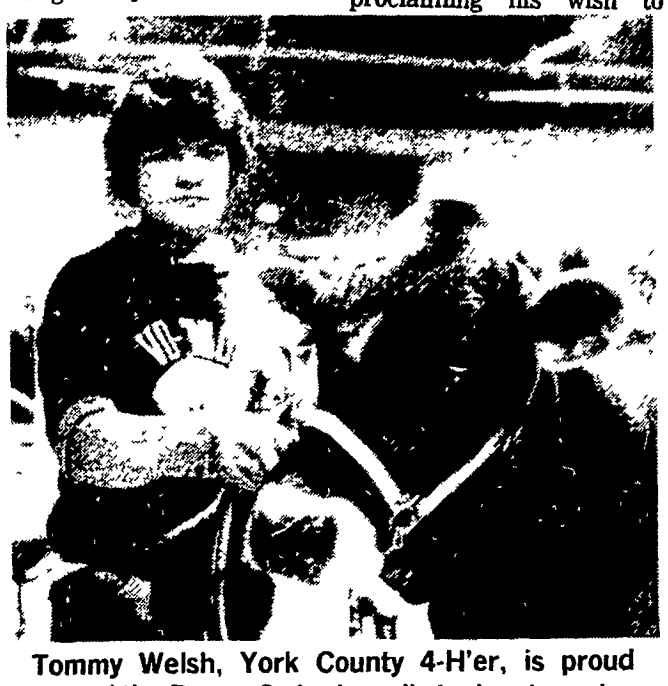
(Continued from Page 98)

at home and admits to having a strong interest in dairy farming. Very much familiar with the breed, including their sale reports, he prefers the Brown Swiss cattle for their gentleness and good marketability.

Eighteen-year old Ronald realizes that there won't be enough room for everyone at home and has already broadened his interests. Employed part-time as a mason's helper, he's still undecided about his future

The youngest boy of the group, Allen, is 10 and he wastes no time in proclaiming his wish to become a farmer. A member of the South Schuylkill County 4-H Cattle Club, he was at the halter several times during Farm Show competition. He has two animals of his own.

Anne, 14, thinks she will probably go into volunteer church work, rather than pursue a career in dairy husbandry. She also has two cows and enjoys participating at events such as the Farm Show.



Tommy Welsh, York County 4-H'er, is proud owner of the Brown Swiss breed's junior champion at the Farm Show.

The Daubert's grand champion this year was High Spruce LA Bunny, a 3-year old. Their reserve grand champion, a 2-year old, goes by the name of Wind Mill Amelia. Aside from showing at the Farm Show, the Schuylkill County dairy farm family also exhibits annually at the Pennsylvania All-American, a contest which draws Brown Swiss entries from eight states.

The junior champion of the Farm Show's Brown Swiss event was owned by York Countian Tommy Welsh. He exhibited Sand Rock Del Trudy. David Feidt of Millersburg held the reserve spot.

Following are placings for both the open and junior divisions of the Brown Swiss show at this year's Farm Show. Junior exhibitor's placings in the junior show are designated by parentheses.

Heifer Calf

1. (1) Gregg German, Pottstown; 2. (2) Wasyl Onulack, Coopersburg.

Junior Yearling

1. (1) Tommy Welsh, East Berlin; 2. Delaware Valley College, Doylestown; 3. (2) Kerry Boyd, Ephrata.

Senior Yearling

1. (1) David Feidt, 2. (2) Allen Daubert, 3. Donald Buffington.

Junior Get of Sire

1. (1) David Feidt, 2. (2) Wasyl Onulack, 3. (3) Kerry Boyd.

Aged Dry Cow

1. (1) Katherine Feidt, Millersburg.

Two Year Olds

1. (1) Dennis Daubert, 2. Ronald Daubert, 3. (2) Dennis Daubert.

Three Year Olds

1. Dean Daubert, 2. (1) Ronald Daubert, 3. (2) David Feidt.

Four Year Olds

1. Delaware Valley College, 2. William Daubert.

Aged Cows

1. William Daubert, 2. (1) Donald Bubbington, Millersburg.

Ronald Haas, Orefield, was named this year's champion showman of the junior market swine competition at Farm Show last week.

Haas is swine showman

HARRISBURG – Ronald Haas, age 16, Orefield R2, Lehigh County was named the 1978 junior market swine showmanship champion at the 62nd Annual Farm Show last week. Ronald first beat his twin brother Donald for the first place ranking in the 15-year-and-over category of the contest, (Donald placed second) and then he went on to earn the top title of the entire competition.

Taking first place in the 11-years-and-under division on Thursday was Brian Bankert, Hanover R3, York County. In the 12-to-14-year-old division, Willi Wilson, Mertztown R2, Lehigh County, was placed first.

A complete listing of the results follows.

11 years and under

1. Brian Bankert, Hanover R3; 2. Melissa Trostle, Red Lion R2; 3. Bonnie Wessner, New Tripoli R2.

12 to 14 years

1. Willi Wilson, Mertztown R2; 2. Steve Trostle, Red Lion R2; 3. Tom Arnold, Lebanon R7.

15 years and over

1. Ronald Haas, Orefield R2; 2. Donald Haas, Orefield R2; 3. Stanley Heisey, Elizabethtown R4.

Grand Champion

Ronald Haas, Orefield R2.

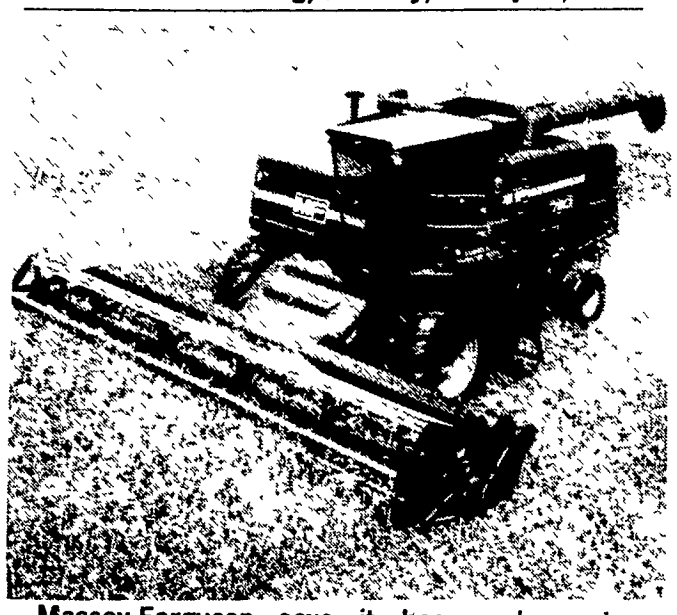
MF announces 1978 combine changes



Massey-Ferguson says it has made major changes on its 1978 combines.

DES MOINES, Iowa - Massey-Ferguson has announced several major changes in the MF 760 and MF 750 combines for 1978.

The all-new MF exclusive Cyclone Radiator Air Intake, with no moving parts, provides cleaner air to improve engine cooling. The system works by drawing air through stationary vanes, forming a vortex around and through a cone-shaped screen. Air passes on through the screen, but dirt and trash are deposited on the outside of the cone housing by centrifugal force. Suction from the radiator fan then removes dirt and trash through a special opening.

There's also a new simplified unloading auger with 11 ft.-long spout. The new unloader pipe can take a four-foot extension to provide more cleanance between the combine and accompanying wagon or truck for unloading on-the-go.

The new electro-hydraulic system allows the operator to control header height and ground speed with one lever. An electro-magnetic header throwout and an automatic header height flotation system are options.

The MF 760 combine is powered by a 354 cubic-inch Perkins turbo diesel engine with a 540 cubic-inch Perkins V-8 diesel as an option. A bigger radiator and larger fuel tank are options with the 540 cubic-inch engine in the MF 760. Power for the MF 750 is supplied by a 372 cubic-inch Perkins diesel with the 354 cubic-inch turbo diesel optional.

Other standards features of both combines include four-speed constant mesh transmission, comfort cab with new luxury seat, Quick-Attach tables and corn heads, new multi-ram header lift system, paddle elevator, heavy duty Hi-Inertia rasp bar cylinder, on-the-go cylinder speed control, power unplugging, steep slope saver, triple screen cascade shoe, twin-fan delivery, variable speed fan control, rasp bar returns cylinder, and twin-ram steering.

USDA hearing set in Lanc. on rates at posted stockyards

LANCASTER – Livestock producers, stockyard operators, market agencies, consumers--anyone with a stake in the livestock marketing industry--will have a chance to air their feelings on the issue of rate regulations at posted stockyards on February 14.

On that date the USDA will conduct a hearing at the Treadway Resort Inn, 222 Eden Road, Lancaster, from 9 a.m. to 5 p.m. and from 7 p.m. to 9 p.m.

The hearing is designed to give the USDA the opportunity to find out if the public thinks the present rate program at posted stockyards has adequately met the needs of a changing livestock marketing industry.

According to the USDA, there are nearly 2000 posted stockyards in the nation—stockyards that are regulated under the Packers and Stockyards (P&S) Act. These markets handled about 98 million head of livestock worth more than $14 billion in 1976. For services rendered, producers paid $287 million as commission and yardage.

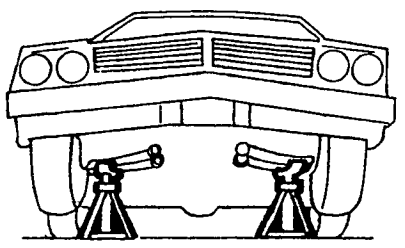
One aim of the P&S Act, Secretary Bob Bergland said, is to insure that livestock producers selling their livestock at public markets receive reasonable services and facilities at reasonable rates. Under the Act, all proposed rates and charges at stockyards must be submitted to P&S officials of the U.S. Department of Agriculture (USDA) for approval.

Written comments as well as oral comments will be accepted at the hearings, according to Charles Jennings, deputy adiministrator for Packers and Stockyards (P&S) with USDA's Agricultural Marketing Service.

Jennings said anyone unable to take part in the meetings may send written comments to him at USDA, rm. 3039-S., Washington, D.C. 20250, before Feb. 21.

Auto Service Tips

The do-it-yourself auto mechanic should never rely on a bumper jack to support a vehicle while doing wheel or undercarriage work. If you plan to work beneath the car, support it solidly with jack stands or wheel ramps



PUBLIC SALE

SATURDAY, MARCH 4, 1978

1:00 P.M.

Located 1⅔ miles north of Pillow, Pennsylvania, ⅔ mile east of Route 225. Watch for sale signs!

2 FARMS — 211 ACRES

FARM #1 consists of 128 acres, more or less, located in Jordan Township, Northumberland County -

TRACT #1 consisting of 83 acres, more or less, having frontage on Township Roads 311 and 315, having thereon constructed a 2½-story frame dwelling with 8 rooms and 1½ baths. Plant lovers' corner

Garden disease control starts now

DOVER, Del. – This is a good time for gardeners to sit back with all their new seed catalogs and start planning for the next growing season. In many respects, the decisions you make now are very important. They may make the difference between success and failure in the garden next Summer, points out University of Delaware Extension plant pathologist Bob Mulrooney.

With all the varieties to choose from, a gardener–especially a novice–can feel quite lost when it comes to making a choice. You'll find the job much easier if you limit your selection to those fruits and vegetables that are well adapted to your particular growing area.

Another way to narrow your choice is to look for disease resistance. This feature is one of the most important advancements in plant breeding, and is a real benefit to home vegetable gardeners. Selecting resistant plants can save you the expense and discouragement of watching crops die just as they're about to produce bounty you expected.

Many varieties of tomato, potato, eggplant, cataloupe, cucumber, pepper, cabbage and sweet corn are now bred for resistance to specific plant diseases, points out Mulrooney. Again, catalogs or the seed packet itself, are your best sources for this information. Seed companies readily advertise this feature, since it's a main selling point.

Perhaps the most beneficial resistance that has been bred into today's vegetables is resistance to wilt diseases. Many varieties of tomato and cataloupe are now resistant to either fusarium or verticillium wilt fungi. Some are resistant to both. Look for disease-resistant plants and buy those whenever you can, advises the plant pathologist.

There's something else you can do now toward making sure your gardening efforts next Summer aren't fraught with disease disasters. Make a plan. Decide where you're going to plant what. Then write it down and save your plan. You'd be surprised at how easy it is to forget where certain vegetables were last Summer, especially sitting in an arm chair watching the snow fall on your garden plot.

Making a plan has two advantages. The first is that you know quite accurately how much seed you'll need and which vegetables you want to grow. Many people would like to plant some vine crops – such as cantaloupe and watermelon – but they usually find that these take up too much room for the return in fruit. Most garden plots can be used more productively to grow tomatoes, beans, and other bush-type plants which have a higher rate of return for the space they occupy.

Another advantage to making a plan is that once you've decided the vegetables you want, you know where they're planted each year. Why is this important? A high percentage of vegetable diseases–particularly root diseases–can be prevented in the home garden by rotation.

Changing the location of a vegetable from year to year in a garden prevents the build-up of plant pathogens in the soil, explains Mulrooney. This is especially true for cantaloupes, tomatoes, beans, eggplant, potatoes, strawberries, and watermelons. If you're in the habit of planting your tomatoes or pole beans in the same area year after year, some day it's going to catch up with you.

Even resistant plants can be attacked under severe pressure from wilt pathogens when susceptible kinds of vegetables have been grown in the same soil over a long period of time.

Rotation doesn't cost a thing. But dead plants and fungicides do. Practice some of the basic principles that agriculturists have used for years. Plant smart, and you'll certainly reap the benefits.

Get hooked on begonias

DOVER, Del. – Houseplants and one's ability to grow them have become a kind of status symbol in modern suburbia today. The latest houseplants–like fashions in hairstyles, foods and clothes–are merchandised and promoted to the gardening elite.

This is not necessarily bad, says University of Delaware Extension horticulturist Dr. Charles Dunham.

Dunham advises beginners to start with plants that have stood the test of time–those that have proven themselves over and over again as "good" houseplants.

One such group–the begonia–was popular even when houseplants were still confined to the kitchen.

Begonias are both flowering and foliage plants. They produce beatufiul flowers but are attractive even when they are not in bloom. Though not every begonia is easy to grow, many make very satisfactory houseplants.

They require a loose, humusy soil mixture such as might be made from one part soil,, two parts leaf mold or woods humus and one part sand. Add a tablespoonful bone meal per quart. Many people also find the new synthetic peatlite mixes work well for begonias.

Other requirements of these natives of the tropics are a sunny window in Winter and partial shade in the Summer. Never let begonias become dry, cautions Dunham. But at the same time, the soil must drain well and not become soggy. Don't over fertilize begonias. Diluted soluble fertilizers are best.

Some of the easiest begonias to grow include the wax begonia (B. semper florens), the beefsteak begonia (B. feasti), the star begonia (B. heracleifolia) and some of the smaller hybrids like Cleopatra, Bow Joe, and China Doll

The wax begonia is one of the most dependable of the whole group. It is literally in bloom all of the time and comes in a number of forms, with green and red leaves, single and double flowers, in colors ranging from white through a number of pinks and reds. It roots easily from cuttings.

Begonias are old favorites, good plants for beginners and good plants for anyone with a nostalgia for the plants that grandmother used to grow. But watch out. There are thousands of begonia species and hybrids. Before you know it, you could get hooked on them.

SPECIAL HORSE & MULE SALE

WEDNESDAY, JANUARY 25, 1978

At 12:00 Noon

Located at Paul Z. Martin's Sale Stables, 2 miles East of Intercourse along Route 340, Lancaster County, Pennsylvania.

Carlin named sales manager

VINELAND, N.J. -- William G. Carlin, known for his leadership in Pennsylvania poultry organizations, has been named national Leghorn sales manager for Hubbard Farms, it was announced by Lowell R. Blass, Hubbard's director of sales.

Carlin has long been active in the Pennsylvania Poultry Federation, and served as its president of Producers Cooperative Exchange, an egg marketing cooperative in Coatesville, Pa., and a former flock supervisor in the contract program of the Pennsylvania Farm Bureau Cooperative.

Carlin will make the Hubbard Farms plant at Lancaster, his headquarters in the immediate future.

of

97 Acre Farm

SAT., FEBRUARY 11, 1978

at 1 P.M.

Located along Rt. 568. First farm East of Jct. New 222 & 568 Brecknock Twp., Berks Co., Pa.

GROUND: 97 acres, approx. 65 acres tillable, remainder in meadowland, with stream, small amount woodland.

TERRAIN: Most rolling, some gentle slope.

BARN: Frame with cement block addition, 32 stanchions, also horse stable, and calf pens. 300 gal. bulk tank, 12'x45' stave silo, 40'x64' metal implement shed with workshop, 1100 bushel steel corn crib.

ZONING: R-2 Governor Mifflin School District.

COMMENTS: The ground to this farm is generally rolling with some gentle slope, meadowland with nice stream. The condition of buildings is fair to good, also a good location with easy access to new Rt 222.

INSPECTION: Anytime by appointment. Call Horning Farm Agency, Inc. 215-286-5183. Terms 10% down day of sale, settlement on or before April 1, 1978.

Auctioneer's Directory

Babies weighing 4 lbs. 6 oz. or less are the highest risk of death or life-long damage, reports The National Foundation-March of Dimes. The volunteer health agency urges pregnant women to receive early, prenatal care. Those women who have early, regular prenatal care are less likely to have a low-birthweight baby.

FEED LESS HAY?

YES — You can feed your cows less hay when you feed PURINA GOLDEN BULKY

WHAT IS GOLDEN BULKY?

Purina Golden Bulky has long been a favorite of profit-minded dairymen because this bulky, nutritious feed can be used so many different ways to help increase milk production and add income to dairy operations throughout America.

Golden Bulky was first fed to cows and heifers in the early 1900's. Since its introduction, Purina Dairy scientists have made many improvements which have added to its versatility and milk-making qualities.

It is a bulky, nutritious, easy-to-feed 10% protein ration containing molasses. Cows really love its sweet, succulent flavor! It is a versatile ration which fits well into feeding programs for milk cows, heifers or dry cows. With its fortification of minerals and Vitamins A and D it makes an excellent supplement in roughage programs with hay, pastures or corn silage.

Because of its versatile qualities it has often been called "A dairyman's best friend."

GOLDEN BULKY HAS MANY USES

- Top Feed 2 gallons per day to stretch hay supply 2 gal. = 6 lbs. of Hay
- Helps fussy, high producing cows produce even more milk when top fed with regular milking ration.
- Mix 50-50 with grain for dry cow and heifer ration.
- Replaces molasses in home mix rations.
- Very palatable for use with Show cows, Cows in Transit, sick cows.

**BECAUSE PURINA GOLDEN BULKY IS VERY PALATABLE
YOU CAN TOP FEED IT TO YOUR HIGH PRODUCING COWS
AND HELP THEM PRODUCE EVEN MORE MILK**

STRETCH YOUR HAY AND SAVE $$$$

PURINA GOLDEN BULKY

$5.00 OFF ON PURCHASE OF ONE TON

Additional Savings Available On Larger Quantities. Contact Your Purina Dealer Today.
